

Introduction Seminar - ELEXON and the Balancing and Settlement Code (BSC) Arrangements

Who Should Attend? This one day seminar will interest newcomers to the industry or customers that have recently entered the market and want to gain a high level understanding of the BSC Arrangements and roles of other market participants.

Course Overview: this course will cover:

- The BSC Arrangements and ELEXON;
- Changing the BSC;
- Central Volume Allocation, Imbalance Settlement and Credit;
- Supplier Volume Allocation;
- National Grid's Role as System Operator;
- Ofgem's Role in the BSC Arrangements;
- A day in the life of a Generator, a Supplier and a Distributor.

Course Objectives: at the end of the seminar delegates, will have a high level understanding of:

- The roles of the industry's main players and how they interact with the BSC;
- How the Balancing Mechanism works;
- Imbalance Settlement processes;
- How prices are calculated and applied;
- The processes for calculating and allocating volumes of energy to Suppliers;
- The 'profiling' arrangements;
- Market information available and where it can be found.

Date: seminar dates are published on the [Regular Events](#) page of www.elexon.co.uk.

Duration: one day (10.00 – 16.00)

Location: [ELEXON Offices](#)

Cost: this course is free of charge to BSC Parties and BSC Party Agents. ELEXON may charge other organisations for training services.
