CIRCULAR

TYPE & NUMBER	ELEXON Circular – EL02175
Date	6 January 2015
To	BSC Parties
From	BSC Operations
Purpose	For information

REMIT and European Transparency Regulation Data not being received from National Grid

What is happening?

Since approximately 17.30 (GMT) on Monday 5 January 2015 we have not been receiving the European Transparency Regulation data from National Grid or REMIT data submitted by Parties to National Grid via the automated processes implemented for P291 and P295.

How will I be impacted?

We are currently working with National Grid to resolve this issue but until this is resolved no other European Transparency Regulation data usually provided by National Grid will be published on the BMRS website or sent to the ENTSO-E website.

Please note that you may still submit REMIT data via the ELEXON Portal, although if you are not already set up as a REMIT user on the ELEXON Portal, this option will not be available to you today.

We will still continue to publish other transparency data (Actual Generation Output per Generation Unit, Imbalance Prices and Aggregated Imbalance Volumes) sourced from BSC Systems as this is not dependent on input from National Grid.

Do I need to take any further action?

No, we will send out a Circular when we have a further update, however if you have any questions please contact the BSC Service Desk bscservicedesk@cgi.com.
