CIRCULAR

TYPE & NUMBER	ELEXON Circular – EL02658
Date	30 May 2017
To	BSC Parties and other interested parties
From	BSC Operations
Purpose	For information

Defaulting of Teleswitch file for Settlement Days 28 May 2017 and 29 May 2017

What has happened?

No switching data were received on the **28 and 29 May 2017** for South Scotland region (Teleswitch User 13) for two Teleswitch Groups. These issues prevented the out-turn Teleswitch file (D0277) from being created and processed as usual. ELEXON was made aware of issues with the Central Teleswitch Control Unit (CTCU) system. This is currently under investigation by the CTCU Operator.

What action has ELEXON taken?

The Supplier Volume Allocation Agent (SVAA), in accordance with BSCP508 'Supplier Volume Allocation Agent', and in agreement with ELEXON, has defaulted the missing Teleswitch files to the most appropriate Teleswitch file for the same day type to run the Daily Profiling Production. Teleswitch instructions for Settlement Day 21 May 2017 have been applied for Settlement Days 28 and 29 May 2017.

Will further Settlement Days be affected?

It is likely that 30 May 2017 will also be affected. We will review the file once received to assess if a further default is required. If so, we will send a further Circular tomorrow.

Do I need to take any further action?

No, however if you have any questions please contact riccardo.lampini@elexon.co.uk.
