### **Issue affecting High Grade BMRA Website**

We've been advised that three web pages on the High Grade BMRA (Balancing Mechanism Reporting Agent) website are not automatically updating following the implementation of the November 09 Release on 5 November 2009.

#### **Which web pages are affected?**

The 'Market Activity – Latest Acceptances' web page and the 'High Grade Market Depth' web page are the two main pages affected by this issue. The System Prices graphs on the Home page of the website are also affected.

#### **Why has this issue occurred?**

This issue has occurred because the web pages and graphs detailed above were not updated to 'listen' for the new TIBCO messages which were introduced on 5 November as part of the November 09 Release. The 'Market Activity – Latest Acceptances' web page should have been updated to 'listen' for the new BOALF TIBCO messages and the 'High Grade Market Depth' web page and System Prices graphs should have been updated to 'listen' for the new DISEBSP TIBCO messages.

#### **Should this issue have been picked up during testing?**

Yes, it should have. We're looking at the specific tests carried out by the BSC Central Services Agent to determine why this issue was not picked up. We're also conducting a full review of the testing that was undertaken for the November 09 Release to identify if any other issues were missed.

#### **When will the issue be fixed?**

The fix for the issue affecting the 'Market Activity - Latest Acceptances' web page and the System Prices graphs on the Home page will be deployed today, 20 November 2009. A fix for the remaining page affected will be developed and deployed as soon as possible.

#### **Is there anything else I need to know?**

We'll update the [BSC Central Services Portal](#) when the initial fix has been deployed and will update it again when the second fix is deployed.
