### Invitation to review Configurable Items amended as part of the November 2011 BSC Systems Release

#### **Why do I need to review these documents?**

The [November 11 Release](#) includes approved Modification P253 "Improving the accuracy of the credit calculation for SVA participants"; the changes to Configurable Items for P253 have not been seen by participants yet – this is your opportunity to comment on the proposed changes.

If you are a HHDA, an HHDC or an NHHDA you will be impacted by these changes, so your comments would be of great value to us.

The [November 11 Release](#) also includes changes to the SVA Data Catalogue Volume 1 to remove P-flows relating to PARMS Serials which have been rendered obsolete by either CP1325 ("Removal of Obsolete PARMS Serials", implemented in the November 10 Release) or CP1334 ("New PARMS Serials: Amendments to BSCP533 and BSCP533 Appendices", implemented in the June 11 Release). These changes were not issued for review with CP1325 and CP1334, so this is your opportunity to comment on the changes.

#### **What else is in the November 11 Release?**

The [November 11 Release](#) also includes other approved Change Proposals but, as all amended Configurable Items were for these CPs have already been reviewed and approved, they are not included in this review.
