Purpose	For Review
From	Change Delivery
Date	12 February 2010

Invitation to Review of Configurable Items amended for the February 2010 BSC Systems Release (P246)

What is the purpose of this circular?

This Circular invites you to review the one Configurable Item that has been amended as part of the solution to approved Modification P246 'Reporting to LDSOs of Aggregated Metering Data for Embedded Networks'.

The Authority approved P246 on 28 January 2010 with the Implementation Date of 31 March 2010. ELEXON will deliver P246 as part of an extended February 2010 Release to minimise implementation costs.

For further information on P246 please visit the [P246 webpage](#) and for further information on the February 10 Release please visit the [February 10 Release webpage](#).

How does P246 impact BSC Systems?

P246 will provide an interim solution to help host Licensed Distribution System Operators (LDSOs) meet the new obligations introduced by the new Common Distribution Charging Methodology on 1 April 2010, until such time that an enduring solution is introduced. The Supplier Volume Allocation Agent (SVAA) will provide aggregated NHH settlement data to host LDSOs.

What Configurable Items are impacted?

The SVAA Service Description has been amended to reflect the new activities to be introduced for P246. The document can be found on the [February 2010 Release Amended Documents webpage](#):

Document	Version	Impact
SVAA Service Description	v11.5	P246

When should I return my comments by?

Please return any comments to us by **12:00pm on 19 February 2010**. We apologise for the short review period but the Modification has a tight schedule.

How do I submit comments?

Please use the review form provided to send any comments to releases@elexon.co.uk. For more information on this circular, please contact the Change Implementation Team via releases@elexon.co.uk.
