

CP1558 Podcast: New Registration data items and processes to support the MHHS transition transcript

Hello, my name is Aylin Ocak and I'm the lead analyst for CP1558 'New Registration data items and processes to support the Market-wide half hourly settlement transition'. In this podcast I'm going to talk you through the background, solution and proposed implementation of the Change Proposal.

In its Market-wide Half Hourly Settlement transition consultation, the Code Change and Development Group recommended that a subset of Registration Service data items required for Market-wide Half Hourly Settlement are introduced in February 2023, about 18 months before migration is due to commence in October 2024. This is because these items are so critical to the Market-wide Half Hourly Settlement rules and processes that going live with poor quality data would lead to avoidable time and effort being spent fixing issues during the 12 month migration period.

This change proposal will deliver Code Change and Development Group's transition recommendation by

- Creating Connection Type, Connection Type Effective From Date (EFD) and Associated Import/Export Metering System Identifier (MSID) as BSC owned data items in the Energy Market Data Specification.
- Recognising Energy Direction and Metered Indicator in BSCP501 and BSCP515.
- Modifying existing processes in BSCP501 and BSCP515 to require that these data items are populated on connection of a new SVA Metering System and can be amended if the Licensed Distribution System Operator is made aware of a change or an incorrect value.

This Change Proposal is a document only change, impacting BSCP501 and BSCP515. The Parties that are expected to be impacted are Supplier Meter Registration Agents and Licensed Distribution System Operators.

The proposed implementation date will be 23 February 2023. You can find more information on the CP webpage which will be updated as the Change Proposal progresses. On the webpage you can also find my contact details if you have any questions regarding the Change Proposal.

Thank you.
