Question 1: Do you agree with the CP1561 proposed solution?

Summary

Yes	No	Neutral/No Comment	Other
1	1	0	0

Responses

Respondent	Response	Rationale
Power Data Associates	Yes	None provided.
British Gas	No	We would suggest that introducing 2 new flows (flow and response flow) doesn't make sense, why not just do the same as the D0386 and D0381 in which the flows are used in both directions with a response group added by the respondent. This would be a simpler and more cost effective solution.

Question 2: Do you agree that the draft redlining delivers the CP1561 proposed solution?
