About This Document

You can find the definitions of the terms and acronyms used in this document in the [BSC Glossary](#)¹.

This document provides information on a new Change Proposal (CP) and outlines our proposed progression timetable for this change.

We are presenting this paper to the SVG on 2 April 2024 to consider the proposed solution, whether it is suitable as a housekeeping change and if so, make a decision on whether to approve this Housekeeping CP. There are 3 parts to this document:

- This is the main document. It provides a summary of the solution, impacts, anticipated costs, and proposed implementation approach, as well as our proposed progression approach for this CP.
- Attachment A contains the CP proposal form.
- Attachment B contains the proposed redlined changes to deliver the CP solution.

1. Summary

Not sure where to start?

We suggest reading the following sections:

- Have 5 minutes?
Read section 1
- Have 15 minutes?
Read sections 1, 4, 5 and 6
- Have 30 minutes?
Read all sections
- Have longer? Read all sections and the annexes and attachments

Why change?

Changes made by [CP1590 'Enabling use of DTN agent appointments process for P434'](#) to [BSCP520: Unmetered Supplies Registered in SMRS²](#) which went 'live' within the BSC in February 2024 reference relevant appointment flows, however, 3.1.12 unnecessarily references a D0148 – 'Notification of Change' to other parties.

This is referenced correctly in step 3.1.15, however, the inclusion of D0148 within 3.1.12 creates ambiguity as it is not required at this point in the process and could cause confusion amongst users of the procedure – members from industry have also queried with Exelon seeking clarity on this step.

The purpose of this change is to remove any ambiguity for Suppliers who may be considering the use of Data Transfer Network (DTN) derived Dataflows ahead of the mandated go live date specified in [P434 'Half Hourly Settlement for UMS Metering Systems³'](#).

Solution

The Change Proposal will remove D0148 from 3.1.12 in BSCP520: Unmetered Supplies Registered in SMRS. The change will ensure references to the Data Transfer Network flows (D0148 in this case) is inputted for its correct use.

Impacts and costs

This is a document only change and will cost <£1k to implement. Exelon anticipates a low positive impact on Suppliers wishing to use the DTN derived Dataflows as per BSCP520. Implementing this change will remove potential confusion by D0148's inclusion in 3.1.12.

Implementation

We recommend to the SVG that this be approved as a Housekeeping change and does not require a CP Consultation.

The proposed implementation date is 27 June 2024 as part of the June 2024 Release.

Housekeeping Change

Involves the correction of manifest errors, minor errors and inconsistencies, including typographical errors (e.g. punctuation errors, spelling mistakes, incorrect font, incorrect capitalisation) incorrect cross-referencing, and the removal of redundant text.

Housekeeping CPs do not require a CP Consultation, however market participants can raise an objection to this approach if they believe there will be an impact.

2. Why Change?

What is the issue?

Changes made by CP1590 'Enabling use of DTN agent appointments process for P434' to BSCP520: Unmetered Supplies Registered in SMRS which went 'live' within the BSC in February 2024 reference relevant appointment flows, however, 3.1.12 unnecessarily references a D0148 – 'Notification of Change' to other parties.

This is referenced correctly in step 3.1.15, however, the inclusion of D0148 within 3.1.12 creates ambiguity as it is not required at this point in the process and could cause confusion amongst users of the procedure – members from industry have also queried with Elexon seeking clarity on this step.

The purpose of this change is to remove any ambiguity for Suppliers who may be considering the use of Data Transfer Network (DTN) derived Dataflows ahead of the mandated go live date in P434 'Half Hourly Settlement for UMS Metering Systems'.

Background

CP1590 'Enabling use of DTN agent appointments process for P434' (implemented on 29 February 2024) introduced changes to BSCP520 'Unmetered Supplies Registered in SMRS' to document that Data Transfer Network flows could be used by Suppliers, if appropriate, to appoint agents.

CP1590 was progressed and implemented to enable Suppliers who may be considering the use of DTN derived Dataflows to meet the requirements to migrate their Unmetered Supply (UMS) portfolios over the 12 months up to the UMS mandate go live date, e.g. Suppliers with large portfolios of Non Half-Hourly (NHH) UMS Metering System Identifiers (MSIDs) who are seeking to automate the Change of Measurement Class (CoMC) of the relevant NHH UMS MSID to Half-Hourly (HH) settlement.

3. Solution

Proposed solution

The Change Proposal will remove D0148 from 3.1.12 in BSCP520. This will ensure references to the Data Transfer Network flows (D0148 in this case) is inputted for its correct use.

Proposer's rationale

The purpose of this change is to remove any ambiguity for Suppliers who may be considering the use of DTN derived Dataflows ahead of the mandated go live date in P434 'Half Hourly Settlement for UMS Metering Systems'.

Proposed redlining

The redlining changes can be found in Attachment B.

4. Impacts and Costs

BSC Party & Party Agent impacts and costs

BSC Party & Party Agent Impacts	
BSC Party/Party Agent	Impact
Suppliers – Low impact	<p>There should be a low but positive impact on Suppliers wishing to use the DTN flows as per BSCP520.</p> <p>Making this change will remove ambiguity in the process by removing an unnecessary step (D0148 in 3.1.12).</p>

It should be noted it is optional to use the proposed DTN data flow exchanges implemented as part of CP1590.

Central impacts and costs

Central impacts

Regarding BSCCo, the overall cost to implement this Change Proposal is limited to BSCP520 and will be <£1k. BSC Agents and BSC Systems should not be impacted.

Central Impacts	
Document Impacts	System Impacts
<ul style="list-style-type: none">BSCP520	<ul style="list-style-type: none">N/A

Impact on BSC Settlement Risks

Impact on BSC Settlement Risks
No impact on Settlement Risks.

Impact on Market-wide Half Hourly Settlement (MHHS)

Impact on MHHS
No anticipated impacts on MHHS.

Central costs

The central implementation costs for this CP will be approximately <£1k.

5. Implementation Approach

Recommended Implementation Date

CP1590 was implemented to support processes that are required under the P434 decision for the commencement of moving UMS MSIDs into HH settlement in April 2024 - 12 months prior to the UMS Mandate GoLive Date.

As we believe this to be a housekeeping document only change, we recommend an implementation date of 27 June 2024 as part of the June 2024 Release.

6. Proposed Progression

Progression timetable

We believe this CP qualifies as a Housekeeping change as the change to BSCP520 is minimal. We therefore seek approval of the change from the SVG to implement this CP.

We recommend to the SVG that this CP be approved as a Housekeeping change and does not require CP consultation. Following SVG’s recommendation, we will issue an email to industry opening a 15 Working Day objection window to allow Parties and Party Agents to object to the CP being a Housekeeping CP. Should an objection come through, the CP will go out for CP Consultation and then back to SVG for final decision. If no objection comes through we recommend that the CP goes straight to implementation as part of the June 2024 Release.

Progression Timetable	
Event	Date
CP Progression Paper presented to SVG for information	02 April 24
Housekeeping Objection window	03 April 24 - 23 April 24
Proposed Implementation Date	27 June 24 (June 24 Release)

If the SVG believe this requires a CP Consultation then this will be consulted on as part of April 2024’s CP Consultation with the Standard CP Consultation Questions.

7. Recommendations

We invite the SVG to:

- **AGREE** that this CP is a Housekeeping CP as defined in BSCP40;
- **APPROVE** the proposed changes to BSCP520;
- **APPROVE** this CP for implementation on 27 June 2024 as part of the standard June 2024 Release; and
- **NOTE** that Elexon will issue the Final CP Report which will then be subject to a 15 Working Day objection period.
