COST UPDATE & SURVEY RESULTS

Costs update and Survey results

- ENA has confirmed the operational costs for the Radio Teleswitch Service over 2023/24: **£4,919,049.00**
- The survey was live for 5 working days and received 10 responses

CONCLUSION

Conclusions

- Since the lack of representativeness among Generators was still high, and there was no clear correlation between the Industry role and the preferred solution, the recommendation to the BSC Panel is to extend the current contract with the ENA for a final year.
- It is important to note that Elexon does not intend to recover the RTS costs on behalf of industry beyond March 2024. Suppliers will need to take appropriate action to phase out the use of the RTS by March 2024.
