# Workgroup Initial Votes

## Proposer's views against the Applicable BSC Objectives – Initial Vote (1/2)

---

- A. The efficient discharge by the Transmission Company of the obligations imposed upon it by the Transmission License
  - The P392 solution ensures the effective discharge of Transmission Company (Electricity System Operator) obligations through delegations
- B. The efficient, economic and coordinated operation of the National Electricity Transmission System
- C. Promoting effective competition in the generation and supply of electricity and (so far as consistent therewith) promoting such competition in the sale and purchase of electricity

## Proposer's views against the Applicable BSC Objectives - Initial Vote (2/2)

- D. Promoting efficiency in the implementation of the balancing and settlement arrangement
  - P392 ensures the BSC Change process satisfies the requirements under EBGL Articles 6 and 10.
  - Whilst EBGL Article 18 change process does not improve the efficiency of the current BSC change framework itself, implementing an aligned process whereby both BSC Change and Article 18 change processes are progressed together, is the most efficient way of progressing BSC Modifications that impact Article 18 terms and conditions.
  - By delegating NGESO responsibilities to ELEXON as the BSCCo and the BSC Panel, industry parties will have clarity on the process for BSC changes that impact Article 18 terms and conditions
- E. Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency [for the Co-operation of Energy Regulators]
  - P392 will ensure BSC Modifications that impact Article 18 terms and conditions can be progressed in compliance with EBGL change provisions
- F. Implementing and administering the arrangements for the operation of contracts for difference and arrangements that facilitate the operation of a capacity market pursuant to EMR legislation
- <sup>15</sup>G. Compliance with the Transmission Losses Principle

# Self-Governance - Initial Vote

- Self-Governance criteria:
  - A. is unlikely to have a material effect on:
    - i. existing or future electricity consumers; and
    - ii. competition in the generation, distribution, or supply of electricity or any commercial activities connected with the generation, distribution, or supply of electricity; and
    - iii. the operation of the national electricity transmission system; and
    - iv. matters relating to sustainable development, safety or security of supply, or the management of market or network emergencies; and
    - v. the Code's governance procedures or modification procedures; and
  - B. is unlikely to discriminate between different classes of Parties.
- Both the Proposer and ELEXON agree that P392 should **not** be treated as Self-Governance as it will have a material effect on Self-Governance criteria (v)
