

Designation Request Form - BSCP40/07	Request Number <i>(mandatory by BSCCo)</i>
Title of proposed Modification Enabling Elexon to support the (currently in draft) Energy Intensive Industry Electricity Support Payments and Levy Regulations 2024	
Rationale for Requesting Designation <p>Our proposed modification to the BSC has no direct relevance or impact to the core BSC activities and as such, interest from BSC Parties may be limited. Neither Elexon nor EMR Settlement Limited (EMRS) are able to raise Modifications to the BSC.</p> <p>Therefore, Low Carbon Contracts Company Ltd (LCCC) is requesting to be designated a Third Party Proposer to raise the attached Modification Proposal. We believe this is the most efficient route to progress this change and avoids the need to burden a BSC Party with the responsibility of being a proposer of a Modification Proposal of this nature. LCCC's interest in this results from its close relationship with Government, with Elexon (through EMRS) and its role in other government payment schemes which have been facilitated through the BSC.</p>	
Reasons why Applicant has an interest in the Code/issue <p>Elexon has access to expertise in undertaking settlement for government payment schemes through its subsidiary EMRS (which provides services on behalf of LCCC and Electricity Settlements Company (ESC)). As a result of this expertise, Elexon has been approached by the government regarding a future opportunity for to conduct additional collection and payment services for the Network Charging Compensation (NCC) Scheme.</p> <p>We would like to progress a Modification Proposal to enable Elexon to support the Department of Business and Trade's Energy Intensive Industries' NCC Scheme.</p> <p>This will be a separate and distinct role as the Energy Intensive Industry (EII) Levy Administrator (collecting monies from Suppliers to support the scheme) and EII Support Payments Administrator (operating the scheme and providing monies to the EII Parties).</p> <p>The administration of the scheme will require the development of new calculation and payment systems that will utilise BSC data, but will not amend existing BSC Central Systems.</p> <p>Amendments are proposed to BSC Section C 'BSCCo and its Subsidiaries'. All elements of the proposed Modification will be enabling, for example other funding mechanisms may be available through the regulations.</p>	
Additional Details which may support the application <p>LCCC has previously sought and been granted designation as a Third Party Proposer to raise previous Modification Proposal P435 'Enabling EMRS to undertake preparatory work for potential future settlement services to LCCC', which was approved by Ofgem on 14 April 2022, and implemented on 25 April 2022.</p>
