Date and time	10 September 2021 17:00	Purpose	For your review
To	CVA and SVA Release Circular distribution lists	From	BSC Change

February 2022 Release – Review of Configurable Items

1. What is the purpose of this circular?

- 1.1 This circular is to invite BSC Parties and any interested third parties to review the draft versions of the BSC Configurable Items (CIs) that we are amending for:
- P402 ‘Enabling reform of residual network charging as directed by the Targeted Charging Review’.
- 1.2 Please return your comments to releases@elexon.co.uk, using the review form provided as Attachment 1 to this circular, by **17.00 on 24 September 2021**.

2. Who is impacted by the Modification(s)?

- 2.1 P402 will impact:
- LDSOs;
 - NETSO; and
 - Elexon as the BSCCo.

3. Which BSC Configurable Items do I need to review?

- 3.1 The following BSC CIs will require your review. Please click the links to review the changes. You can download the redlined changes from the relevant Modification or CP webpages or the [Release Circulars webpage](#).

No	Modification/CP	BSC CI(s)
1	P402	BSCP515 – Licensed Distribution SVA Data Catalogue Volume 1 SVA Data Catalogue Volume 2

4. What will happen after the industry review?

- 4.1 Elexon will consider all review comments and update the documents as required. Elexon will also inform the outcome of any comments to the relevant reviewer where necessary.
- 4.2 We will then take the documents and a summary of any consultation responses to the responsible Committee(s). The Committee papers will note any comments that we didn't action and the reasons why, and any subsequent course of action undertaken as a result.

5. When will the BSC Configurable Items become effective?

- 5.1 The Implementation Date for P402 is:
- 24 February 2022 as part of the February 22 BSC Release.
- 5.2 If you have any queries about this circular, please email Releases@elexon.co.uk.

Appendix 1

1. What's new for P402?

- 1.1 This Modification will ensure that data is provided to the National Electricity Transmission System Operator for setting and recovering Transmission Network Use of System demand residual charges. This proposal supports the implementation of Ofgem's Targeted Charging Review Significant Code Review Decision.
- 1.2 The approved P402 solution sees LDSOs compiling this data, sending it directly to National Grid and so not to relying on BSCCo or BSC Systems and Agents for these purposes.
- 1.3 This would require LDSOs to provide Billing and Tariff Setting data, including UMS data, to NETSO. Elexon will support LDSOs in the identification of CVA Registrants.
- 1.4 P402 was approved by the Authority on 24 March 2021 for implementation on 24 February 2022.
- 1.5 This Circular invites you to comment on the changes to the following BSC CIs for P402:
 - BSCP515;
 - SVA Data Catalogue Volume 1;
 - SVA Data Catalogue Volume 2;
- 1.6 For more in on P402 please contact **Ivar Macsween** on 020 7380 4270 or email bsc.change@elexon.co.uk.
