

4.3 CP Form

Change Proposal – BSCP40/02	CP No: CP1552 <i>Version No: 1.0</i> <i>(mandatory by BSCCo)</i>
Title (mandatory by originator) ‘Reflecting BSCP501 timeframes in BSCP520 processes’	
Description of Problem/Issue (mandatory by originator) <u>What is the issue?</u> <p>BSCP520 ‘Unmetered Supplies Registered in SMRS’ does not include explicit timeframes for various Supplier obligations. The timeframe for these processes are found in BSCP501 ‘Supplier Meter Registration Service’. However, as these processes are not reflected in BSCP520, there is a risk of market participants not fully understanding the expected timescales.</p> <u>Further information</u> <p>BSCP520 does not clearly reflect the BSCP501 timeframes for several Supplier actions, this includes obligations such as sending a D0205 (Update Registration Details) to Energise or De-Energise a Meter Point Administration Number (MPAN), or to remove a related flag from an Unmetered Supplies (UMS) MPAN as part of the faster switching process and disconnection of UMS MPANs.</p>	
Proposed Solution (mandatory by originator) The proposed solution for this CP is to reflect the timeframe from BSCP501 in BSCP520: <ul style="list-style-type: none"> • ‘As soon as possible and in any event within 5 Working Days of <ul style="list-style-type: none"> i. the effective date of the change; or ii. receiving notification that a change is required if this occurs after the effective date of the change.’ found in BSCP501 section 3.3.1, into the sections in BSCP520 with similar actions that require updating. <p>The sections in BSCP520 that require updating are:</p> <ul style="list-style-type: none"> • 3.1 Establishment of a new UMS Inventory – section 3.1.23 • 3.2 Amendment to Inventory – section 3.2.11 • 3.7 Change of Energisation State of an MSID – section 3.7.3 • 3.7 Change of Energisation State of an MSID – section 3.7.9 • 3.8 Disconnection of an MSID – section 3.8.2 <p>Footnotes will also be added to BSCP520 and BSCP501 to create a cross-reference between the documents. This will ensure there is both clarity for market participants in the reflected timescales, and also for future changes to ensure any amendments to either BSCP501 or BSCP520 are reflected between the documentation.</p>	
Justification for Change (mandatory by originator)	

At present, there is a risk that Unmetered Supplies Operators (UMSOs) may struggle to gain support and participation in these obligations from Suppliers, as it may not be clear that the BSCP501 timescales should apply to the processes in BSCP520 that do not currently have explicit timescales listed.

To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? (mandatory by originator)

[BSC Section S – Supplier Volume Allocation](#)

Estimated Implementation Costs (mandatory by BSCCo)

Less than £1k of effort to implement the necessary document changes.

BSC Configurable Items Affected by Proposed Solution(s) (mandatory by originator)

[BSCP520 ‘Unmetered Supplies Registered in SMRS’](#)

[BSCP501 ‘Supplier Meter Registration Service’](#)

Impact on Core Industry Documents or System Operator-Transmission Owner Code (mandatory by originator)

None

Related Changes and/or BSC Releases (mandatory by BSCCo)

None

Requested Implementation Date (mandatory by originator)

30 June 2022 (Standard June 2022 BSC Release)

Reason:

This is the next standard Release that this CP can be scheduled for, to ensure clarity for market participants.

Version History (mandatory by BSCCo):

This is the first version of this CP.
