

MHHS - Architecture Working Group - Terms Of Reference

Purpose

1.1
The objective of the MHHS project is to develop and then implement an enduring process for MHHS that delivers benefits for consumers by maximising the opportunities provided by smart metering in enabling a smart, flexible energy system

1.3
The AWG will identify the required system architecture changes to BSC central systems, other code administrator systems, and define the interface specifications

Scope

2.1

AWG will deliver the recommendations to the OFGEM TOM team

- 2.2** AWG recommendations will be consistent with:
- OFGEM policy decisions
 - CCDG recommendations
 - OFGEM strategic objectives and principles
 - DWG TOM design
 - NCSC security & design principles
 - The MHHS SRO
 - Other market arrangements

2.3
The OFGEM TOM Team will escalate the AWG's TOM development recommendations to the Senior Responsible Owner (SRO), who will be advised by the Design Advisory Board as required, for decision as appropriate. Final decision-making on the TOM design, and system architecture rests with the SRO

Deliverables
