1. Introduction

1.1 Scope and Purpose of the Procedure

The purpose of this procedure is to ensure maintenance of an accurate, up-to-date set of Supplier Volume Allocation standing data. The standing data is used by the Supplier Volume Allocation Agent (SVAA) to ensure the correct working of its internal processing and by the Central Registration Agent (CRA) for use in maintaining a list of BSC Agent details. The procedure covers the management and control of **all** changes made to the standing data in the Supplier Volume Allocation, System with the exceptions of:

- SVA Metering System data registered in SMRS; and
- Market Domain Data (MDD) which is handled exclusively in BSCP509 (Changes to Market Domain Data)²; and
- Data Aggregator standing data changes which are required to be implemented for a Settlement Date only to enable a Supplier Volume Allocation Run to be completed. These changes are processed by the SVAA as contractual obligations and raised as problems with the ~~National Help Desk (NHD)~~[BSC Service Desk](#).

Changes can be as the result of a request to add, change or delete individual standing data items.

1.2 Main Users of Procedure and their Responsibilities

The main users of this procedure are:

- Suppliers, via their relevant authorised signatory or alternatively their nominated Non Half Hourly (NHH) Balancing Mechanism (BM) Unit representative, to raise / confirm Supplier / Supplier Agent and NHH BM Unit changes.
- The Balancing and Settlement Code Company (BSCCo) who authorises Supplier / Supplier Agent related changes.
- The SVAA who notifies the CRA of changes to the SVAA contact details.
- The SVAA who processes any changes to the Supplier / Supplier Agent standing data and notifies the relevant Supplier of such changes via a monthly report; and
- The SVAA who processes any change to the NHH BM Unit Supplier Volume Allocation standing data. Prior to providing any NHH BM Unit data to the SVAA, Suppliers are required to ensure that their relevant authorised signatory or nominated NHH BM Unit representative has been registered as a relevant Authorised Person in accordance with BSCP38.

² MDD also maintains information regarding the GSP Groups in which Licensed Distribution System Operators (LDSOs) and Supplier Meter Registration Agents (SMRAs) are operating.

1.3 Use of the Procedure

The key milestones for changes to standing data are established as follows:

- Following a Supplier's initial entry into the market, Supplier and Supplier Agent related standing data must be provided no later than five Working Days (WD) after the first Supply Start Date (SSD) for the Supplier appointment in the GSP Group.
- Following the initial registration of standing data, subsequent updates must be confirmed by the Supplier no later than ten WD following receipt of a monthly report of Standing Data changes from SVAA.

The Supplier must ensure that Non Half Hourly Balancing Mechanism (BM) Unit changes are received by the SVAA no later than Gate Closure for the period to which the BM Unit applies. BM Unit changes provided after this timescale will not be processed by the SVAA.

The SVAA must ensure that any changes to their contact details must be provided to the CRA within 1 WD of those changes becoming effective.

The remaining sections in this document are :

- Section 2 - This section is no longer in use.
- Section 3 - Interface and Timetable Information: this section defines in detail the requirements of each business process.
- Section 4 - Appendices: this section contains relevant supporting information. In addition, Appendix 4.1.1 Data Flows contains references to the ~~BSC~~ SVA Data Catalogue.

1.4 Balancing and Settlement Code Provision

This BSC Procedure has been produced in accordance with the provisions of the Balancing and Settlement Code (the Code). In the event of an inconsistency between the provisions of this BSC Procedure and the Code, the provisions of the Code shall prevail.

1.6 Acronyms and Definitions

1.6.1 Acronyms

The terms used in this BSC Procedure are defined as follows:

AFYC	Average Fraction of Yearly Consumption
BCA	BSC Change Administrator
BM	Balancing Mechanism
BSC	Balancing and Settlement Code
BSCCo	Balancing and Settlement Code Company
BSCP	Balancing and Settlement Code Procedure
CRA	Central Registration Agent
GSP	Grid Supply Point
LDSO	Licensed Distribution System Operator
MDD	Market Domain Data
NHD	National Help Desk
PARMS	Performance Assurance Reporting and Monitoring System
PC	Profile Class
Ref	Reference
SMRA	Supplier Meter Registration Agent
SMRS	Supplier Meter Registration Service
SSC	Standard Settlement Configuration
SSD	Supply Start Date
SSR	Supplier Settlement and Reconciliation
SVA	Supplier Volume Allocation
SVAA	Supplier Volume Allocation Agent
WD	Working Day

1.6.2 Definitions

Full definitions of the above acronyms are, where appropriate, included in the Balancing and Settlement Code.

Effective Date - The date from which the SVA Settlement standing data change will become effective.

Self-Service Gateway - An online portal, accessible through the BSC Website, that allows authorised users to provide and maintain registration data, including (but not limited to) the data defined in this BSCP.

All other terms are as defined in the Balancing and Settlement Code.

4.1.2 Business Events triggering SVA Settlement Standing Data Changes

The following business events will trigger changes to Supplier Volume Allocation standing data:

4.1.3 Supplier starts or stops trading in a GSP Group

This is triggered, for example, by the Change of Supplier event. This triggers a change at the GSP Group for a given Supplier.

4.1.3.1 Data Aggregator starts or stops operating in a GSP Group

This may be triggered, for example, by the Change of Supplier event or by a Supplier appointing a new Data Aggregator or changing an existing Data Aggregator. This triggers a change for a Data Aggregator / Supplier relationship at a given GSP Group.

4.1.3.2 Data Collector starts or stops operating in a GSP Group

This may be triggered, for example, by the Change of Supplier event or by a Supplier appointing a new Data Collector or changing an existing Data Collector. This triggers a change for a Data Collector / Supplier relationship at a given GSP Group.

4.1.3.3 NHH BM Unit data in a GSP Group

This is triggered by a change to the Profile Class / Standard Settlement Configuration / GSP Group combinations allocated to a BM Unit by the Supplier.

4.1.3.4 SVAA Agent Contact details

The SVAA will notify the CRA of any change to its contact details including e.g. change of address, telephone, e-mail address.
