

Approval of Configurable Item changes for the February 2023 Release

Date of meeting **2 August 2022**

Paper number **ISG256/01**

Owner/author **Chris Arnold**

Purpose of paper **Decision**

Classification **Public**

Document version **V1.0**

Summary **This paper invites the ISG to approve the changes to BSC Configurable Items as part of the February 2023 Release.**

1. Changes required for the February 2023 Release

1.1 This paper invites the Imbalance Settlement Group (ISG) to approve changes to BSC Configurable Items that have been amended for:

- P376 'Utilising a Baselining Methodology to set Physical Notifications'

1.2 P376 was approved on 6 August 2021 for implementation on 23 February 2023.

1.3 As the ISG is responsible for the Configurable Items listed in section 3 of this paper, Elexon is presenting the amendments to these documents to the ISG for approval. We received a single comment as a result of this review which led to an update of the section number in the text so that sections 4.6.1 and 4.6.2 are clearly defined in BSCP503.

2. Industry Review

2.1 We published the amended Configurable Items on 5 July 2022 and invited the industry to review via a Release Circular with any comments requested by 19 July 2022. We received a single comment as a result of this review as described in section 1.3.

2.2 The amended documents are now ready for approval by the ISG.

3. Configurable Items for approval

3.1 Details of the changes can be found in attachment A to this paper.

3.2 Table 1 lists the documents amended by P376 and the committees that Elexon seeks approval from.

Impact	Approving Committee	Category
BSCP01 – 'Overview of Trading Arrangements'	ISG and SVG	1
BSCP15 – BM Unit Registration	ISG and SVG	1
Interface Definition and Design Part 1 Document	ISG	1
Interface Definition and Design Part 2 Document	ISG	1

Impact	Approving Committee	Category
Interface Definition and Design Part 1 Spreadsheet	ISG	1
Interface Definition and Design Part 2 Spreadsheet	ISG	1

4. Recommendations

4.1 We invite the ISG to:

- a) **APPROVE** the changes to the documents listed in Table 1 for the February 2023 BSC Release.

Appendices

Appendix 1 – Summary of changes in the February 2023 Release requiring changes to BSC Configurable Items

Attachments

Attachment A – Draft BSC Configurable Items for February 2023 BSC Release.

Appendix 1

1. What's new for P376?

- 1.1 P376 will allow the expected flows at Supplier Volume Allocation (SVA) Metering Systems participating in the Balancing Mechanism (BM) to be calculated using an approved Baseline Methodology. The new Settlement Expected Volume calculated from the baseline values will be decoupled from the Physical Notification used by the National Grid Electricity System Operator (NGESO) for dispatch. It will be used in Settlement to calculate Non-Delivery Charges, allowing balancing service providers to be more accurately recompensed for their actual change from normal usage and the impact this change has on the system, thus enabling greater participation.
- 1.2 P376 was approved by the Authority on 6 August 2021 for implementation on 23 February 2023.
- 1.3 This Circular invites you to comment on the changes to the following BSC CIs for P376:
- BSCP01
 - BSCP15
 - IDD Part 1 document
 - IDD Part 2 document
 - IDD Part 1 Spreadsheet
 - IDD Part 2 Spreadsheet
- 1.4 For more on P376 please contact **Chris Arnold** on 020 7380 4221 or email bsc.change@elexon.co.uk.
