

Approval of Configurable Item changes for the February 2023 Release

Date of meeting **28 July 2022**

Paper number **258/09**

Owner/author **Chris Arnold**

Purpose of paper **Decision**

Classification **Public**

Document version **V1.0**

Summary **This paper invites the PAB to approve the changes to the Self Assessment Document (SAD) as part of the February 2023 Release.**

1. Changes required for the February 2023 Release

- 1.1 This paper invites the Performance Assurance Board (PAB) to approve changes to Self Assessment Document that has been amended for:
- P376 'Utilising a Baselining Methodology to set Physical Notifications'
- 1.2 P376 was approved on 6 August 2021 for implementation on 23 February 2023.
- 1.3 As the PAB is responsible for the SAD, Elexon is presenting the amendments to these documents to the PAB for approval.

2. Industry Review

- 2.1 We published the amended Configurable Items for the February 2023 Release, which included the SAD, on 5 July 2022 and invited the industry to review via a Release Circular with any comments requested by 19 July 2022. We received no comments following the industry review. We received a single comment from IMServ as a result of this review which led to an update of the section number in the text so that sections 4.6.1 and 4.6.2 are clearly defined in BSCP503.
- 2.2 The amended SAD is now ready for approval by the PAB.

3. Configurable Items for approval

- 3.1 Details of the changes can be found in attachment A to this paper.
- 3.2 Table 1 lists the documents amended by P376 and the committees that Elexon seeks approval from.

Impact	Approving Committee	Category
Self Assessment Document (SAD)	PAB	3

4. Recommendations

- 4.1 We invite the PAB to:
- a) **APPROVE** the changes to the documents listed in Table 1 for the February 2023 BSC Release.

Appendices

Appendix 1 – Summary of changes in the February 2023 Release requiring changes to BSC Configurable Items

Attachments

Attachment A – Draft SAD v7.1 for February 2023 BSC Release.

Appendix 1

1. What's new for P376?

- 1.1 P376 will allow the expected flows at Supplier Volume Allocation (SVA) Metering Systems participating in the Balancing Mechanism (BM) to be calculated using an approved Baseline Methodology. The new Settlement Expected Volume calculated from the baseline values will be decoupled from the Physical Notification used by the National Electricity Transmission System Operator (NETSO) for dispatch. It will be used in Settlement to calculate Non-Delivery Charges, allowing balancing service providers to be more accurately recompensed for their actual change from normal usage and the impact this change has on the system, thus enabling greater participation.
- 1.2 P376 was approved by the Authority on 6 August 2021 for implementation on 23 February 2023.
- 1.3 For more in on P376 please contact **Chris Arnold** on 020 7380 4221 or email bsc.change@elexon.co.uk.
