### 1. Introduction

- 1.1 At the December 2023 PAB Meeting, Elexon presented the proposed changes to BSCP537 and Section J of the BSC to update the current Qualification processes to align with the MHHS Target Operating Model (TOM) (PAB275/05).
- 1.2 The paper, original proposed changes and the PAB Headline Report can be found on the [PAB275 webpage](#).
- 1.3 At the meeting, the PAB provided a number of comments on the proposed changes. Elexon has therefore updated the documents following these comments.
- 1.4 This paper seeks endorsement from the PAB for the (revised) attached code changes, where Endorsement is defined as follows:
  - a) Endorsement is an action which shows the PAB's support for the PAF related MHHS code changes, reflecting the design principles discussed within the Performance Assurance Working Group.
  - b) Endorsement for MHHS related code changes is a feedback exercise to allow the PAB to provide commentary around PAF changes prior to the MHHSP consultation stage.
  - c) Endorsement is **not** an approval of the code drafting.
  - d) Endorsement does **not** prohibit further comments being made by PAB Members during the MHHSP consultation stage, either as PAB representatives, industry representatives, or representatives of their respective companies.

### 2. Recommendations

- 2.1 We invite the PAB to:
  - a) **ENDORSE** the changes made to BSCP537 and Section J of the BSC.
