	with Supplier Agents.				
		ng on 14 September 2017			
	accordance with F2.6.1	0) the P332 Workgroup t	o pause work on the		
	P332 solution – P332 w	as effectively placed on I	nold. The Panel		
	believed the Significant	Code Review (SCR) on H	alf Hourly Settlement		
	(HHS) could change the	baseline against which F	2332 was being		
	· · ·	•	_		
	developed and assessed. Periodic checkpoints were scheduled to check whether P332 should re-start, remain on-hold or be withdrawn.				
	Check whether 7352 Should re-Start, remain on-hold of De Withdrawn.				
	The Panel approved a seven-month extension to the Assessment				
	Procedure at its meeting on 10 May 2018. The rationale for the				
	extension was to allow enough time for the outcome of Ofgem's policy				
	work to be known and for the Target Operating Models (TOMs), which				
	are being developed as part of the SCR, to be further developed. The				
	Panel approved a nine-month extension to the P332 Assessment				
	Procedure at its meeting	g on 13 December 2018,	returning with the		

Assessment Report to the September 2019 Panel meeting. This was on the basis that the preferred Target Operating Model (TOM) to be taken
forward in Ofgem's Significant Code Review (SCR) on Electricity
Settlement Reform represents a material change from the current
baseline against which P332 would be assessed. Further, Ofgem is also
considering two areas of policy which will have an impact on P332:
Consultation on supplier agent functions under market-wide
<u>settlement reform and Future of supply market arrangements – call for</u>
evidence (includes Supplier Hub). The Proposer is monitoring the
development of the SCR and these policy areas to consider whether
P332 should be withdrawn or work restarted.
At the September 2019 Panel meeting, the Proposer provided his view
that his issue has not yet been addressed in any of the wider Ofgem
initiatives.

P361: Revised treatment of BSC Charges for Lead Parties of Update					
Interconnector BM Units					
Date Raised:	31 October 2017	Proposer:	Nord Pool Spot AS		
Target	TBC	Current Status:	With Authority		
Implementation			(submitted 13 July		
Date:			2018)		
Latest Update:		is suggests that P361 has			
	,	decision can no longer be			
	·	t to the Authority, and su			
		BSC Panel at its meeting	•		
	,	making a determination of	on whether it believes		
	P361 has timed out.				
Next Event:		r information from Ofger			
Issue:	The EU Third Package (Article 2 of Regulation 714/2009) expects				
	Interconnectors to be treated as an extension of the Transmission				
	System and not as Production or Consumption. However, for the				
	purposes of calculating BSC Charges, BM Units in Great Britain are				
	currently treated as either a Production BM Unit (generation) or a				
	Consumption BM Unit (demand). The Proposer asserts that the				
	treatment of Interconnector BM Units in the BSC Charges calculations				
Comment Calatians	is not aligned with the EU Third Package.				
Current Solution:	This Modification Proposal seeks to exclude Interconnector Balancing Mechanism (BM) Units from the Main Funding Share and SVA				
	, ,	•			
	(Production) Funding Share BSC Charges, in order to better facilitate				
History:	the EU Third Package. The first P261 Workgroup meeting was held on Monday & January.				
nistory.	The first P361 Workgroup meeting was held on Monday 8 January				
	2018. The Workgroup discussed the issue and the proposed solution.				
	The Workgroup agreed to seek additional legal guidance on the defect.				
	A second Workgroup meeting was held on 12 February 2018. The				
	Workgroup discussed the legal guidance provided by ELEXON and				
	1				

agreed to seek additional external legal advice on the issues and EU law.

On 22 February 2018, Ofgem rejected the Proposer's request to treat P361 as an Urgent Modification Proposal. Ofgem did not believe the case for urgency had been clearly demonstrated.

A third Workgroup meeting was held on 13 March where external legal guidance was presented and discussed. Subsequently, the Proposer amended his solution to only exclude Interconnector BM Units Credit Energy Volumes from the Main Funding Share and SVA (Production) Funding Share calculations.

A fourth Workgroup meeting was held on 18 April 2018, where the Service Provider Impact Assessment of the Proposed solution was discussed and the Assessment Procedure Consultation documentation finalised. The Assessment Procedure Consultation was issued on the 26 April 2018, with responses due by15 May 2018.

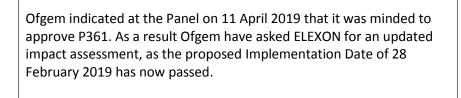

The fifth Workgroup was held on 24 May 2018, where the Assessment Consultation responses were discussed. The Workgroup raised an Alternative Modification, whereby the revised formula for the Main Funding Share and SVA (Production) Funding Share would be effective from the date of Authority decision. The formal implementation date would still remain as previously discussed, as the 28 February 2019.

The Assessment Report was presented to the Panel on 14 June 2018. The Panel initially recommended that both the Proposed and Alternative Modifications be rejected. The Report Phase Consultation was subsequently issued on 20 June 2018, with responses due by 3 July 2018.

The Draft Modification Report was presented to the Panel on 12 July 2018. The Panel recommended that both the Proposed and Alternative Modifications be rejected. The Final Modification Report was submitted to the Authority on 13 July 2018.

P361 is with the Authority for decision. Ofgem initially published an indicative decision date of 17 August 2018 but they have since been in contact notifying ELEXON that this decision date could not be met due to further legal analysis of the issue.

Following the submission of the Final Modification Report to Ofgem in July 2018, Ofgem requested a revised BSC impact assessment and Implementation Date in May 2019, as the original Implementation Date expired. ELEXON provided the revised impact assessment and a suggested Implementation Date of 27 February 2020, where an Ofgem decision is received by 31 August 2019.

P371: Inclusion of non-BM Fast Reserve actions into the Update						
Imbalance Price cal	Imbalance Price calculation					
Date Raised:	11 September 2018	Proposer:	UK Power Reserve

	decision on 19 Septemb		1			
Issue:		nethodology for pricing r				
	calculation of the imba	lance price exclusively fo	r Settlement Periods in			
	BM and Non-BM STOR.	The aim was to capture	the value that that			
	capacity is providing to	the system at times of m	nargin tightness.			
	At the time the new me	ethodology was limited to	o STOR because STOR			
	was considered "the m	ain source of reserve", no	ow the GB balancing			
	system has undergone a range of changes, whereby Reserve products					
	have been rationalised and harmonised. There is a lack of harmonised					
	treatment between STOR and Fast Reserve and it is necessary to					
	extend the application of the Reserve Scarcity Price (RSP) calculation					
	methodology to Fast Reserve.					
	The Proposer believes that there is no reason for a different treatment					
	of the two Reserve products and Fast Reserve should have been					
0	captured already within P305. This Modification Proposal aims to include non-RM East Reserve					
Current Solution:	This Modification Proposal aims to include non-BM Fast Reserve actions in the calculation of the Imbalance Price, by including them in					
		djustment Data file. This				
	_					
	Imbalance Price more reflective of the actions taken by the System Operator.					
History:	P371 was raised by UK Power Reserve on 11 September 2018. The					
,	Initial Written Assessment was presented to the Panel on 13					
	·					
	September 2018 and the Panel agreed to progress the Modification to					
	the Assessment Procedure. The first industry Workgroup was held on					
	24 October 2018. 14 actions, including detailed analysis were					
		nd National Grid to joint	•			
	level of analysis requested by the Workgroup in order that it can fully					
	develop an appropriate	solution, the Assessmer	nt Procedure has taken			

longer than initially anticipated. This resulted in the Panel extending the Assessment Procedure by four months at its February 2019 meeting. The second Workgroup for P371 was held on 13 March 2019 where the Workgroup agreed two possible solutions to P371. ELEXON undertook Impact Assessments to assess the costs and implementation times of potential solutions.

The Third P371 Workgroup was held on 5 June 2019 where the Workgroup agreed its preferred solution. The Assessment Procedure Consultation was Issued on 17 June 2019 for 15WD.

Responses to the Assessment Procedure Consultation were due on 5 July 2019. The final Workgroup was held on 16 July for the Workgroup to consider consultation responses.

The Assessment Report was presented to the Panel on 8 August 2019.

The P371 Report Phase Consultation was issued 13 August with responses due by 27 August 2019.

P374: Aligning th	e BSC with the EB GL c	hange process and	Update	
derogation appro				
Date Raised:	5 November 2018	Proposer:	SSE	
Target	5WD following	Current Status:	With Authority

		•	ally, P374 aims to reflect	
		overnance arising from t	• •	
	terms and conditions r	elated to balancing from	Articles 4, 5, 6, 10 and	
	18 of the EB GL.			
Current Solution:	To amend BSC Derogat	To amend BSC Derogation arrangement to make clear the parts of the		
	BSC that form the terms and conditions related to balancing - which			
	then cannot be subject to a BSC Derogation, in accordance with EB GL			
	Articles. Additionally amending BSC change procedure to reflect that			

changes to certain parts of the BSC will have to go through a revised change process, in accordance with EB GL Articles.

At its third meeting, P374 Workgroup members voted to raise an Alternative Modification that is identical to the Proposed, except in that it will not explicitly preclude derogations from BSC provisions that constitute Article EBGL Article 18 terms and conditions related to balancing. Instead, it will allow each derogation application to be assessed on a case-by case basis against the existing derogation criteria set out in BSC Section H 10.4.3(d), which do allow derogations to be granted from any BSC provision which constitutes Legal Requirement or Relevant European Legal Requirement as defined in the BSC.

History:

P374 was raised by SSE on 5 November 2018. The Initial Written Assessment was presented to the Panel on 8 November 2018. The Panel believed there was insufficient information to decide how to proceed (options included to proceed to the Definition, Assessment or Report phase). The Panel, therefore, deferred its decision and wrote to Ofgem to seek further information to enable it to make a decision at its next regular meeting on 13 December 2018. The Panel determined at its meeting on 13 December 2018 that P374 should be submitted to the Assessment Procedure. The first Workgroup was held on 20 February 2019. Discussions focused on the scope of the Modification, ELEXON took an action to draft an Alternative solution regarding how EBGL Article 62 impacts BSC Section H. The second Workgroup meeting was scheduled to take place on 12 March but was cancelled due to quoracy issues. We updated the Panel verbally on 14 March 2019 and achieved guoracy for the second Workgroup, held on 24 April 2019. ELEXON asked for an extension for P374 at the 11 April BSC Panel meeting, this was due to quorcacy issues. The BSC Panel granted P374 with a two month extension until July 2019. The second Workgroup was held on 24 April 2019 to discuss solution options. During the course of the Workgroup it became clear that

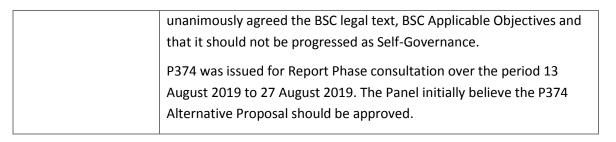

The third Workgroup meeting was held on Friday 7 June 2019 to review proposed legal text for two options. The Workgroup agreed to raise an Alternative solution. The Workgroup also requested a onemonth extension to P374, which was approved by the BSC Panel at its meeting on 13 June 2019. This was due to the agreement of the solutions taking one more meeting to agree than planned.

further work was required to amend the legal text and as such another

meeting was required to further develop the solution.

However, the Workgroups were delayed due to quoracy issues. Further delays were experienced as the agreement of the solution took longer than anticipated.

The final P374 Workgroup was held on Thursday 25 July whereby the majority of the Workgroup voted for the alternative solution. They also

P375: Settlement of Secondary BM Units using metering Update

History:	volumes provided by the Balancing Service Provider (BSP). P375 was raised by Flexitricity on 10 December 2018. The Initial					
	Written Assessment was presented to the Panel on 13 December 2018					
	and was entered into the Assessment Procedure. P375 and P376 are					
	being progressed separately, but with the same Workgroup Members					
	and being held on the same day, where appropriate.					
	1					

The first Workgroup meeting, held jointly with P376, was held on 25 January 2019, where the Workgroup explored the issue by discussing possible effects on the Boundary Site and how links with National Grid would affect the eventual solution. The representative from Flexitricity acting as the Proposer for this Modification has changed, with another representative assuming the duties of the Proposer going forward.

The second Workgroup meeting was held on 18 March 2019 in conjunction with P376. Discussions focussed on metering standards and processes for secondary asset metering for use for balancing services and settlement, and the line loss methodology to be applied. The Workgroup also considered how the asset meters should be registered and it was agreed that SVAA would best fulfil the registration role, building on the TERRE solution. ELEXON took a number of actions to start to develop the business requirements, which will be used to conduct impact assessments.

The third Workgroup meeting was held on 16 May 2019. The purpose of the meeting was to review the draft Code of Practice for Asset Metering behind the Boundary Point and the work in progress Business Requirements. The Workgroup agreed that further consideration of the assurance regime, reporting and the types of behind the Boundary Point meters that should be included in the P375 solution are required. In particular, whether the types of measuring devices envisaged under P379 are included. Minor updates to the new Code of Practice were also identified.

It was clear that these elements required at least three more Workgroup meetings, in addition to Workgroup meetings to finalise and review the business requirements and legal text before the Assessment Consultation is issued. This will not be possible in the time available under the existing P375 timetable. A six-month extension was therefore requested by the Workgroup.

The BSC Panel approved a six-month extension to the P375
Assessment Procedure at their meeting on 13 June 2019. The P375
Assessment Report will be presented to Panel at its January 2020 Panel meeting.

The fourth Workgroup was held on 4 July 2019. Discussions focussed on the customer journey registration process and the role a Meter Operator Agent should play. The Workgroup reviewed a use case to illustrate a 'metering by differencing' approach with multiple VLP actions on a site. The Workgroup also reviewed appropriate Performance Assurance Techniques for VLPs.

Recommendation	Procedure, returning to allow time for analy	a four month extension to with the Assessment Repo ysis of various baselines to ex solution requested by t	ot in March 2020. This is be done with GB data
Issue:	ELEXON raised Issue 71 'Introduction of a baselining methodology as an alternative to Physical Notifications' on 15 June 2018. This Modification builds on the back of this Issue and formally raises a Modification Proposal relating to the same defect. Modification Proposal P344 'Project TERRE implementation into GB market arrangements' seeks to align the Balancing and Settlement Code (BSC) with the European Balancing Project TERRE (Trans European Replacement Reserves Exchange) requirements. The solution developed by the P344 Workgroup allows customers (or independent aggregators acting on their behalf) to participate in TERRE (and the BM) independently of their electricity Supplier, by registering a 'Secondary BM Unit'. The P344 solution is intended to facilitate participation in the BM and TERRE by a wider range of industry market participants, including customers and independent aggregators. However, in the P344		
Current Solution:	solution, the existing BM Settlement arrangements remain unchanged. This Modification proposes to allow the Final Physical Notification which feeds into the Settlement of Trading Charges to be created via a Baselining Methodology. This Modification builds on the work of Issue 71 .		
History:	The Initial Written Assessment was presented to the Panel on 13 December 2018 and was entered into the Assessment Procedure. P376 was raised by Enel Trade S.P.A. on 11 December 2018. The first Workgroup meeting, held jointly with P375, was held on 25 January 2019, where the Workgroup explored the issue by discussing possible effects on the Boundary Point and how links with National Grid would affect the eventual solution.		

The second Workgroup for P376 was held in conjunction with P375 on 18 March 2019 to begin the process of designing a solution and exploring assurance methods in order to protect the integrity of the eventual solution. ELEXON worked with the Proposer to identify characteristics of baseline methodologies currently used in other markets. The third Workgroup was held on 3 June 2019, where the Workgroup considered baseline methodologies. ELEXON worked with the Proposer to draft initial Business Requirements and considered what analysis, if any, should be undertaken on preferred baselining methodologies.

P379: Multiple Suppliers through Meter Splitting			Update
Date Raised:	3 January 2019	Proposer:	New Anglia Energy
Target	November 2020	Current Status:	Assessment
Implementation	(subject to		Procedure
Date:	Assessment of		
	Modification and		
	associated delivery		
	timescales through		
	impact assessment)		
Latest Update:	The P379 Workgroup 9	meeting was held on 24	September 2019. At
		sented on Key design co	
	Workgroup discussed t	he P379 high level Busine	ess Requirements, the
		og and complex use case	
	process of drafting the	detailed Business Requir	ements to be reviewed
	by the WG at the next r	neeting to be held in No	vember 2019.
Next Event:	The next P379 meeting will be held in November 2019 to review the		
	detailed P379 Business	•	
Issue:	In the view of the Proposer, this Modification will address a significant		
	barrier to competition in the market rules whereby multiple Trading		
	Parties are unable to compete for behind the Meter energy volumes,		
	measured at the same Settlement Meter at the BSC Boundary Meter		
	Point. The Proposer outlines that the existing arrangements do not		
	adequately facilitate the development of local energy markets and		
		effectively mean there is	
		lier, over a consumer's e	
		any given time, restrictin	g competition and
	innovation.		
Current Solution:	This Modification will enable individual consumers to be supplied by		
	multiple Trading Parties, including Suppliers through a Balancing and		
	Settlement Code (BSC) Settlement Meter at the Boundary Point. It will		
	amend the market rules to support development of non-traditional business models and innovation, expanding upon the solution to be		
		odification P344 'Project	
	implementation into GB market arrangements'. It will achieve this through the creation of a new Party Agent role, the Customer		
1	through the creation of	a new Party Agent role,	tne Customer

Notification Agent (CNA), who would reconcile power flows through the Settlement Meter, enabling accurate allocation of volumes and costs, which in turn will allow Trading Parties to reflect these volumes in their bills and payments to consumers. **History:** P379 was raised by New Anglia Energy on 3 January 2019 with the Initial Written Assessment presented to the BSC Panel at its meeting on 10 January 2019. The Panel determined that P379 should be submitted to the Assessment Procedure, with the Assessment Report to be presented to the Panel at its meeting on 12 September 2019. The Panel requested an interim report on P379 at its June 2019 meeting. The first P379 Workgroup meeting was held on 27 February 2019. The group considered the Terms of Reference and discussed views on the proposal. ELEXON took a number of actions arising from the meeting, including further areas for consideration. Following the first Workgroup discussions ELEXON updated and issued

Following the first Workgroup discussions ELEXON updated and issued two use cases for the Workgroups review prior to the next meeting.

The second P379 meeting was held on 3 April 2019. The purpose of the meeting was to:

- To clarify the P379 issue and scope;
- To discuss Workgroup views and feedback on use cases 1 (Electric Vehicle) and 2 (Exempt supply);and

For Ofgem to provide an overview on Network Access and Forward-Looking Charge Arrangements Significant Code Review.

The third P379 Workgroup was held on 18 April 2019. The purpose of the meeting was to finish discussions on the Exempt Supply Use Case. To provide more background information on Exempt Supply requirements Ofgem presented on the Exempt Supply framework and how this works within the current market. In addition ELEXON provided an overview of the existing options for non-licenced entities selling power over the Distribution Network Operator's (DNO) network and how the P379 solution could potentially work.

An interim report was presented to the Panel on 13 June 2019, as agreed as part of the approved P379 progression plan. The Panel approved a six-month extension and advised the Workgroup to consider how the Modification could be scoped to deliver earlier. A meeting was held on 27 June 2019 to finish discussing balance responsibility and the Party Agent Role.

The P379 WG6 and WG7 meetings were held on 23 and 24 July 2019 respectively. The Workgroup considered two 'operating models' for the P379 solution, highlighting the key priorities and areas of concern. A key part of P379 is the provision of metered data for assets (e.g.

electric vehicle) behind the Boundary Point Meter. ELEXON provided an update on P375, which is looking at metering systems not installed at the Boundary Point. Further P375 updates will be provided to the P379 Workgroup.

The P379 Workgroup 8 meeting was held on 13 August 2019. ELEXON presented the detailed proposed, and alternative models covering the different entities and functions involved in multiple supply. The Workgroup agreed with processes in both models. The Workgroup also considered the following items: P379 FAQ, Performance assurance, data flows and whether multiple supply will be optional or mandatory.

P382: Amendmen	ts to the BSC to reflect	the United	Update
Kingdom's withdra	wal from the Europea	n Union without a	
deal	-		
Date Raised:	4 March 2019	Proposer:	National Grid ESO
Target	To be confirmed	Current Status:	Report Phase
Implementation	pending outcome of		
Date:	Brexit		
Latest Update:	The Panel reviewed the	draft Modification Repo	ort at their meeting on
		red making a decision ur	
	· ·	C's exit from the EU. The	·
	•	nended early in the morr	•
		it the latest. The Panel fe	
	1	hat the P382 proposed d	= -
	_	then e.g. as a result of ot	
		he meantime or changes	to legislation by the
	Government.		
	1 '	ty over whether P382 wi	· ·
		the event of a no-deal e	
	would be to defer their	the most economic and e	efficient thing to do
Next Event:		Modification Report will	ha procented to the
Next Event.		119. The Panel will be ask	
		382 based on the latest in	
	of the Panel meeting.	obe based on the latest h	normation at the time
Issue:		ithdrawal Act (2018) will	allow the BSC to
	•	diately following exit day	
	•	es, which may lead to cor	•
		nt Brexit legislations, and	•
	soon as possible.		, ,
	It should be noted that	some revoked EU Legisla	ation may not lead to
	the BSC being amended	d as it is more efficient fo	r these parts of the
		t' until further details em	_
		J post-Brexit. An example	
	_	'Project TERRE' which w	on't become 'active'
	until December 2019.		

Current Solution:	The BSC will be amended to reflect where EU regulations will not be retained in EU law and will make the BSC inoperable/confusing. If parts of the BSC are no longer applicable (as the associated EU regulation will not be retained), they may however, not necessarily need to be changed as allowing them to be dormant (i.e. not used but still there) may be more appropriate depending on the circumstances.
History:	P382 was raised on 4 March 2019 by National Grid ESO and the Initial Written Assessment was presented to the Panel on 14 March 2019. The Panel agreed, at its meeting on 14 March 2019, to progress P382 directly to the Report Phase and initially agreed that P382 should be approved. The Report Phase Consultation was issued on 18 March 2019 and closed on 29 March 2019. One response was received and agreed with the Panel's initial recommendations.

P383: Enhanced re	porting of demand da	ata to the NETSO to	Update
facilitate CUSC Mo	difications CMP280 a	nd CMP281	
Date Raised:	6 March 2019	Proposer:	Innogy
Target	April 2021	Current Status:	Assessment
Implementation Date:			Procedure
Latest Update:	The P383 Draft Modific	cation Report was presen	ted to the BSC Panel on
	12 September 2019. Th	ne BSC Panel recommend	ed that P383 should be
	approved. The P383 Fir	nal Modification Report w	vas sent to the
	Authority for a decision	n on 20 September 2019.	
Next Event:	P383 is awaiting Autho	rity decision. If the Autho	ority approve P383 then
	the Modification will be	e implemented on 1 Apri	2021.
Issue:	Connection and Use of	System Code (CUSC) Mo	dification Proposal
	CMP281 and ELEXON's	Workgroup Alternative (CUSC Modification to
	CMP280 both require a	aggregated metered data	from specific storage
	facilities' half-hourly (H	IH) Metering Systems, sh	ould they be approved.
	However, the BSC does	s not currently specify pro	ocesses or rules for
	collecting and aggregat	ting metered data from H	H Metering Systems
	that measure the Impo	orts (and Exports) for spec	cific storage facilities
	that would be required	I for CMP280 and CMP28	1. Therefore, for the
	BSC to continue to sup	port the Transmission Co	mpany with its
	network charging, new	BSC processes will be re-	quired to enable the
	identification, aggregat	tion and reporting of met	ered data, and to
	enable the BSC Panel to	o establish appropriate a	ssurance.
Current Solution:	The Proposer suggests	a Modification of the BS0	C and a certain number
	of its Code Subsidiary D	Documents so that they d	escribe processes that
	enable Imports and Exp	ports from Half Hourly (H	H) Metering Systems
	for specific SVA registe	red storage facilities to b	e aggregated and
	reported to the Transm	nission Company.	

History:	P383 was raised on 6 March 2019 by Innogy. The P383 IWA was presented to the BSC Panel on 14 March 2019, who submitted it into the Assessment Procedure.
	The first Workgroup was held on 29 April 2019. The Workgroup have identified a solution, agreed on the Applicable BSC objectives, and agreed that it should not be progressed as Self-Governance.
	ELEXON held the second Workgroup meeting on 11 June 2019 where they discussed the legal text, business requirements and the Service Provider Impact Assessment.
	P383 was sent out for Assessment Procedure Consultation on 2 July 2019, with responses due by 22 July 2019.
	The final P383 Workgroup was held on Monday 29 July 2019. The Workgroup agreed on the Applicable BSC Objectives, the draft legal text, that P383 should not be progressed as Self-Governance, the proposed Implementation Date, and that there were no alternative solutions.
	P383 was issued for Report Phase Consultation on 13 August 2019, with responses due by 27 August 2019. The Panel initially believe P383 should be approved.

P385: Improving th	e efficacy and efficier	ncy of the Section H	Update
Default provisions			
Date Raised:	3 April 2019	Proposer:	Centrica
Target	Feb 2020 BSC Release	Current Status:	Assessment
Implementation			Procedure
Date:			
Latest Update:	The third and final P385	5 Workgroup meeting to	ok place on 30
	September, where Mer	nbers will consider respo	nses to the
	Consultation and provide	ded final views on the P3	85 solution. The
	Workgroup have unani	mously recommended th	e Solution with no
	alternatives identified.	They recommend that Page 1985	385 be governed under
	the Self Governance Cr	iteria.	
Next Event:	The Assessment Report	will be presented to the	BSC Panel on 10
	October 2019.		
Issue:	The frequency of Balancing and Settlement Code (BSC) Parties failing		
	to pay their debts and o	defaulting on the BSC has	s increased in 2018.
	After a period of 10 year	ers without a Supplier of	Last Resort event,
	there was a single occurrence in 2016 followed by an unprecedented 7		
	events in 2018 . This ha	s resulted in greater exp	osure to unpaid
	Trading Charges which	are then mutualised acro	oss other BSC Parties.
	The BSC Panel has the a	ability to take mitigating	action and provide
	financial protection wh	en an Event of Default is	triggered, but the
	current arrangements i	n BSC Section H 'General	' are overly complex
	and prolong the period	before an Event of Defa	ult is declared.

Current Solution:	P385 proposes amendments to the Default arrangements in BSC Section H 3 'Default' in order to increase visibility to industry of Parties at risk and to potentially allow for earlier remedial action by the BSC Panel.
History:	On 3 April 2019, Centrica raised P385. ELEXON presented the Initial Written Assessment at the 11 April BSC Panel meeting, where the Panel agreed to progress P385 to the Assessment Procedure. Following experiencing difficulty confirming a date for the first Workgroup meeting, due to quoracy issues, ELEXON externally engaged prospective Members and secured the necessary number of voting Workgroup Members.
	The first Workgroup for P385 was on 17 June 2019. The Workgroup developed a large amount of the solution, identifying an approach where parameters for certain Events of Default are placed under Panel control.
	The second Workgroup for P385 took place on 15 July 2019, where all remaining areas of the solution were agreed. The Workgroup is currently reviewing the draft Assessment Procedure Consultation. The Assessment Procedure Consultation closed on 21 August 2019. There were 3 responses from Suppliers, all of whom are supportive of the proposal and its recommendation as a Self-Governance Modification.

P390: Allowing exte	ensions to ELEXON's b	ousiness and	Update	
activities, subject to	activities, subject to additional conditions			
Date Raised:	12 August 2019	Proposer:	E.ON	
Target	5 Working Days after	Current Status:	Assessment Phase	
Implementation	Authority decision			
Date:				
Latest Update:	P390 was raised by E.O	N on 12 August 2019. EL	EXON have been	
	working to reach a quo	rate Workgroup in order	to hold the first P390	
	Workgroup meeting. The	nis has involved direct en	gagement with	
	industry members with	experience as a Workgro	oup member for similar	
	modifications, as well a	modifications, as well as reminding industry about the Modification via		
	communications chann	els.		
Next Event:	ELEXON will look to set a date for the first Workgroup following			
	sufficient membership and will continue to promote the Workgroup			
	until the quoracy thresl			
Issue:	The BSC restricts the activities of ELEXON and in the absence of a			
	specific Modification any additional activities cannot be pursued by			
	·	ose activities would be o	f benefit to BSC Parties,	
	industry generally and/or the consumer).			
	1 ' '	difications have been ned	•	
	· ·	vide the Warm Homes D		
	service, EMR settlement, and to participate in gas performance			
	assurance framework a	nd REC manager appoint	tment processes.	

	C I : I : I I I I I I I I I I I I I I I
	Such individual Modifications to extend ELEXON's vires are time
	consuming and can be an unnecessary distraction for industry. They
	can also result in ELEXON being unable to pursue an opportunity
	within a required timeframe.
Current Solution:	A framework into the BSC that allows the ELEXON Board to determine
	whether ELEXON can undertake additional activities provided certain
	conditions are met.
	All of the conditions introduced in previous Modifications to ELEXON's
	vires, P330 'Allowing ELEXON to tender for the Uniform Network Code
	Gas Performance Assurance Framework Administrator (PAFA) role' and
	P365 'Enabling ELEXON to tender for the Retail Energy Code (REC)' are
	included, plus some additional conditions to safeguard the interests of
	BSC Parties.
History:	P390 was raised by E.ON on 12 August 2019. The IWA was presented
	to the Panel on 12 September 2019. ELEXON are ascertaining the most
	appropriate date for the first Workgroup, proposed for early October
	2019 subject to the availability of the minimum number of members to
	be quorate.
	be quotate.

P391: Introducing Desktop Audits		Update	
Date Raised:	12 September 2019	Proposer:	BSC Panel
Target	Feb 2020 BSC Release	Current Status:	Report Phase
Implementation			
Date:			
Latest Update:	P391 was raised by the	BSC Panel on 12 Septem	ber 2019 who agreed
	that P391 meets the Se	lf-Governance criteria ar	nd should be
	progressed straight to t	the Report Phase.	
	P391 was issued for Re	port Phase Consultation	on 16 August 2019,
	with industry invited to	respond by 5pm 27 Sep	tember 2019.
Next Event:	The BSC Panel will cons	sider these reponses as p	art of the Draft
		its meeting on 10 Octobe	er 2019, where it will
	agree its final recomme		
Issue:	,	em is selected for audit, t	•
	•	carried out on-site (and f	•
		ent (MOA) to attend the	•
	resource intensive for both the Technical Assurance Agent (TAA) to		
	undertake and audited Parties to support. The PAF Review reviewed		
	the TAM technique from November 2018 to February 2019, with the		
		presented to the PAB on 3	•
		ew's recommendations (1	
	· · · · · · · · · · · · · · · · · · ·	of the recommendations	
	· ·	wer intensity audit check	
	''	ection Visits as directed	within the annual audit
	scope.	. Lul Book	
Current Solution:	1	oses to amend the BSC to	
	1	allow for Desktop Audits	to act as a supplement
11:-1	to existing on-site Inspe		h - :: 2010
History:	P391 was raised by the	BSC Panel on 12 Septem	per 2019.

P392: Amending B	SC Change Process for	EBGL Article 18	Update
Date Raised:	2 October 2019	Proposer:	National Grid ESO
Target	4 April 2020	Current Status:	Initial Written
Implementation			Assessment
Date:			
Latest Update:	P392 was raised by Nat	ional Grid ESO on 2 Octo	ber 2019.
Next Event:	The P392 Initial Writter	n Assessment will be pres	sented to the BSC Panel
	on 10 October 2019, wh	here they will decide hov	v best to progress with
	this Modification.		
Issue:	National Grid Electricity System Operator (NGESO) is delegating some		
	of its powers and obliga	ations under European El	ectricity Balancing
	Guideline (EBGL) Article	es 4, 6 and 10 to either of	f the Balancing and
	Settlement Code Comp	any (BSCCo), or the BSC I	Panel. The BSC
	therefore needs to be a	mended to reflect the B	SCCo's and BSC Panel's
	increased powers and o	obligations under the del	egation to facilitate the
	EBGL change process w	ithin existing BSC change	e processes.
Current Solution:	Update the relevant BS	C processes to capture the	ne specific powers and
	obligations delegated to	o the BSCCo or the BSC P	anel (as relevant) from
	NGESO, and clearly set	out the change process t	hat shall apply to any
	BSC Modification propo	osal seeking to amend an	y of the EBGL Article 18
	terms and conditions.		
History:	P392 was raised by Nat	ional Grid ESO on 2 Octo	ber 2019.

Change Proposals Updates and Decisions

CP1516: New Inter	connector Fuel Type	Categories: ElecLink	Update	
& IFA2				
Date Raised:	7 March 2019	Proposer:	National Grid	
Target	18 December 2019	Current Status:	Awaiting	
Implementation			Implementation	
Date:

		on Date, it will be implem		
	2019 as part of an ad-h	noc December 2019 BSC F	Release.	
Issue:	The Balancing Mechan	ism Reporting Service (BN	MRS) is used for	
	reporting operational of	data, relating to the Great	t British (GB) electricity	
	Balancing and Settleme	ent Code (BSC) arrangem	ents. In part, it	
	receives, stores and pu	ıblishes data relating to tl	he Interconnectors to	
	•	s information is available		
		and xml/csv downloads, a		
	Push services and TIBC		, , , , ,	
	Two new High-voltage	Direct Current (HVDC) In	terconnectors	
		connecting the GB bidding zone to other bidding zones are currently		
	under construction. The ElecLink and IFA2 interconnectors between GB			
	and France are due for	commissioning in Noven	nber 2019 and June	
	2020 respectively.			
Current Solution:	_	require a separate 'Fuel		
	1	connector for reporting p	•	
	•	ary to make changes to th	•	
	1	tegories', before ElecLink	_	
	1	et participants data in a tr	·	
	1	for implementing CP1510 ata for Eleclink and IFA2 v		
	, 55 5	NTFR) on BMRS. Disaggre		
		ebpage on the BMRS, from	~	
	'	e to pull data via an API, (
	1 '	on the BMRS. The reason		
		ect to be in place until at		
	is because P344 'Projection	ct TERRE implementation	into GB market	
	1	Γhe publication of Europe	•	
	Guideline (EB GL) balar	ncing data by BMRS' and	CP1516 all require	

	changes to BMRS for implementation in the November-December 2019 time period. The delivery of these changes over the same timeframe created constraints, that if not addressed would have
	impacted the delivery of P344.
History:	CP1516 was raised on 7 March 2019 after being presented to the
	Imbalance Settlement Group (ISG) for information as a verbal update
	on 19 February 2019 (ISG214).
	CP1516 was published for consultation on 17 May 2019, with responses due by 5pm Thursday 13 June.
	CP1516 was presented to the BSC Panel for decision on 11 July 2019. The Panel approved CP1516 for implementation on 30 November 2019.
	As the Panel are required to approve new Fuel Types, it was efficient for the Panel to also approve the changes to the BSC subsidiary documents at the same time, which are being amended via CP1516.

CP1519: Treatmen	nt of Low Capacity Cor	nections for Site	Update	
Specific Line Loss F	actor Calculations			
Date Raised:	16 July 2019	Proposer:	UK Power Networks	
Target	27 February 2019	Current Status:	Committee decision	
Implementation				
Date:				
Latest Update:	CP1519 was approve by	the ISG on 17 September	er 2019	
Next Event:	CP1519 will be presented	ed for decision to the SV	G on 8 October 2019	
	for Implementation on release.	27 February 2020 as par	t of the February 2020	
Issue:	Line Loss Factors (LLFs)	are calculated and applie	ed to Metered Volumes	
	to account for distribut	ion losses. LLFs are calcu	lated on an individual	
	basis for sites connected at Extra High Voltage (EHV) and on a generic			
	basis for other connections.			
	There are an increasing number of EHV Sites with a 'main' connection			
	and a subordinate small-scale connection. The subordinate connection			
	is often 1 MVA or less and the majority are ancillary import			
	connections for Generating Plant and Apparatus e.g. to power aircraft			
	avoidance lights on wind turbines when the turbine is not Generating			
	its own power. Subordinate connections have low maximum demand			
	· · · · · · · · · · · · · · · · · · ·	if they were single conne		
	right, would be connected at lower voltage levels with generic LLFs.			
Current Solution:	CP1519 proposes to apply Generic LLFs appropriate to the voltage of			
	connection to sites with a capacity less than 1 MVA. This would			
	formalise a default replacement process for low consumption sites			
History:	within Principle 17 of the LLF calculation principles within BSCP128. CP1519 was raised on 16 July 2019 and the progression paper			
instory.				
	presented to the ISG or	n 23 July 2019 and SVG o	n 6 August 2019.	

CP1520: Clarification	on to 'Change of Own	ership' process in	Update
BSCP537			
Date Raised:	8 August 2019	Proposer:	ELEXON
Target	18 December 2019	Current Status:	Assessment
Implementation			
Date:			
Latest Update:		industry consultation or	n 9 September 2019,
	with responses due by	4 October 2019.	
Next Event:			
Issue:		nip process in BCSP537 i	· · ·
	leading to confusion ar ownership.	ound the requirements	following a change of
Current Solution:	·	troduce a new Change o	f Ownership letter
		, which will be used for	•
	1		ons, despite the Change
	of Ownership of the co		, ,
	'	. ,	
	In addition to the Char	nge of Ownership letter,	Qualified Persons (other
	than Suppliers and VLPs) will be required to provide a separate		
	statement confirming whether a Material Change has been made as		
	per BSCP537 section 2.6.1.		
	The solution to this CP will amend section 2.6 of BSCP537 to reflect the		
	revised process. This includes changing 'Applicant' to 'Qualified		
	person' and citing the Change of Ownership letter.		
	CP1520 also proposes to allow PAB to make a decision on whether the		
	Qualified Person needs	s to:	
	a) Re-Qualify; or		
	b) Not Re-Qualify	•	
	b) Not Re-Quality	,	
History:	CP1520 was raised on	8 August 2019 by ELEXO	N.
	CP1520 was presented to the ISG on 20 August 2019, PAB on the 29		
	August 2019 and SVG on 3 September 2019. All three committees		
		been raised and the pr	
	timetable.	a been raised and the pr	oposeu progression
	timetable.		

CP1521: BSCP70 Amendments for IA and IEA			Update	
Date Raised:27 August 2019Proposer:			ELEXON	
Target	Target February 2020 Current Status:			
Implementation				
Date:				

ELEXON Report – July 2019 BSC Panel Meeting

Latest Update:	The CP Progression Paper was presented to the ISG on 17 September	
	2019.	
Next Event:	CP1521 will be issued for industry consultation from 14 October to 8	
	November in CPC batch CPC00798.	
Issue:	BSCP70 currently omits Interconnector Administrator (IA) and	
	Interconnector Error Administrator (IEA) from being required to	
	undergo CVA Qualification Testing. As there are four new	
	Interconnectors scheduled to go live over the next four years (with a	
	further seven planned) there is a potential risk to Settlement if the IAs	
	and IEAs for the new Interconnectors have not demonstrated that they	
	are able to send and receive the relevant Settlement data flows	
	to/from BSC Central Systems.	
Current Solution:	BSCP70 is amended to include IA and IEA in the data flows relevant to	
	IEAs and IAs for CVA Qualification Testing.	
History:	CP1521 was raised by ELEXON on 27 August 2019.	
	The CP Progression Paper was presented to the SVG on 3 September	
	2019 for information.	

Issues Updates and Decisions

Issue 69: Perform	ance Assurance Fram	Update	
Date Raised:	30 March 2017	ELEXON	
Latest Update:	The main review of the Supplier Charges technique has commenced. The Issue 69 Working Group meeting on 19 September 2019 will review our initial ideas for change. The recommendation of the Qualification workshop was presented to PAB (224/06) at its meeting on the 26 September 2019. PAB approved the recommendation to raise a number of Modifications and Change Proposals with a view to implement them in approximately 18 months.		
Next Event:		orking Group- to review Such a view to further refine for the PAB.	
Issue:	ELEXON and the Performance Assurance Board (PAB) are aware of opportunities to further enhance the application of the risk-based Performance Assurance Framework (PAF) envisaged in P207 'Introduction of a new governance regime to allow a risk based Performance Assurance Framework (PAF)' to utilise and reinforce its effectiveness to address the challenges of a changing industry. This Issue Group will explore the issues and identify possible solutions for each work stream: Smart Metering, PAF procedures, data provision		
History:	and Performance Assurance Techniques. The first work stream was Smart Metering, with two meetings held on 25 April 2017 and 24 May 2017 respectively. The interim Issue Report for Smart Metering was presented to the PAB in June 2017, and tabled at the BSC Panel in July 2017. ELEXON took a paper to the November 2017 PAB meeting that provided recommendations on mitigating the key smart risk areas identified. A high-risk area was identified in relation to the Supplier-Agent interface and as a result CP1500 'Amend the BSCP537 Appendices to add a requirement for Suppliers and MOAs to demonstrate the ability to send and receive Smart Meter Configuration details' was raised, seeking to include the D0367 data flow in the Qualification process. The second work stream is on PAF procedures. This work stream will focus on a new design for the PAF, covering what is currently the Risk Evaluation Methodology (REM), Risk Evaluation Register (RER), Risk Operating Plan (ROP) and the reporting.		

The first Workgroup on PAF procedures was held on 17 January 2018. In the meeting, ELEXON presented a proposed design to the group for review and comment. The second meeting was held on 10 April 2018 to align with work we are doing for the Performance Assurance Framework review. Additionally, ELEXON presented a related draft Modification Proposal ('Amendments to Section Z to better facilitate the production of the Risk Evaluation Methodology, Risk Evaluation Register and Risk Operating Plan') and associated draft redlined Legal text to the Workgroup in order to gain their endorsement toward its principles.

The third meeting for this work stream was held on 12 June 2018 where the Workgroup discussed a newly drafted version of the RER. At this meeting, as the Workgroup consisted of SVA experts only, they could not provide feedback on the CVA risks listed within the RER. Therefore, a dedicated session for CVA experts to provide feedback on the RER was held on 25 July 2018. The fourth and final meeting for the PAF Procedures Work Stream will be held on 15 August 2018. At this meeting the ELEXON will present the final design of the PAF along with its component parts.

Modification P368 'Amendments to Section Z to better facilitate the production of the Risk Evaluation Methodology, Risk Evaluation Register and Risk Operating Plan' was approved by the BSC Panel at its meeting on 12 July 2018 and will be implemented in the November 2018 BSC Release. This Modification arose from work completed by the Issue 69 group relating to PAF procedures.

The last Issue Group for the PAF Procedures work stream was held on 15 August 2018, with subsequent teleconference meetings held on 30 and 31 August 2018. During these sessions, ELEXON presented the final design of the PAF along with its component parts, on which the Issue Group members provided guidance and comment.

The third work stream, the Review of the PATs, aimed to catalogue the current performance assurance techniques (PATs), identify limitations or areas for improvement (based on stakeholder feedback and further discussion with technique owners), and integrate those improvements into a set of new PATs.

The first working group for this work stream took place on 30 November 2018. The working group discussed the key ideas for change to the audit techniques, and identified some additional potential improvements

The final work stream aims to identify and test alternative methods of data provision that will place less burden on participants to provide data, and will help support more accurate risk appraisal.

The first working group for this work stream took place on 3 October 2018, with subsequent working groups scheduled for roughly every quarter.

ELEXON presented the latest version of the Risk Register to the Performance Assurance Board (PAB) at its meeting on 29 November 2018, requesting that the document be approved for public consultation. The PAB commented positively on the revisions made to the Register, including the introduction of a materiality (£) figure associated with each risk to measure its impact, and noted that the reduction in the number of distinct risks, whilst maintaining total coverage of all potential risk events, made the Register more accessible and easier to navigate. The first Issue 69 working group for the Performance Assurance Techniques work stream was held on 30 November 2018. Summary notes from the Workgroups were sent to members. Following the consultation period ending 21 December 2018, the PAB approved the new Risk Register on 31 January 2019.

The Performance Assurance Board (PAB) suggested engagement with the Issue 69 workgroup (in particular Suppliers) on Supplier Charges review.

The dates for workstreams on Supplier Charges review and BSC Audits as part of Issue 69 have been confirmed. Engagement with Issue 69 stakeholders for both the Performance Assurance Techniques Review and Data Provision workstreams is expected in spring 2019.

The workstreams for the Supplier Charges review and the BSC Audit was held on Tuesday 14 May and Wednesday 15 May 2019 respectively.

Issue 69 will now be focussing on Qualification and Re-Qualification well as Supplier Charges.

The Issue 69 Qualification and Re-Qualification Workshop was held on Tuesday 2 July 2019. Following this Workshop a paper was presented to PAB providing an update on the review of the Qualification and re-Qualification Performance Assurance Technique. The PAB noted the updates and agreed to a sub-group to discuss options to include in the final Qualification and Re-Qualification PAF Review recommendations report. Following the meeting of the sub group the PAF team presented their recommendation at September PAB meeting on 26 September 2019.

	<u>Issue 73:</u> Review of fault management and resolution timescales			
Date Raised:	12 October 2018. Proposer:	SSE Ltd		
Latest Update:	ELEXON held a teleconference on 27 September 2019 for the Issue Group to reach consensus and vote on the solutions that will be recommended in the Issue Report. The Issue Group recommends three			
•				
	CPs be raised to progress changes to the communication process,			
	Service Level Agreements, and LDSO involvement on the fault			
	rectification process.			
Next Event:	The Issue Report will be tabled for the Panel or	8 November 2019.		
Issue:	Several issues have been identified in the fault	resolution process		
	where a MOA is not best placed to rectify fault:	s on Measurement		
	Transformers owned by the Licensed Distribution	on System Operator		
	(LDSO). This results in the Meter Operator Age	nt (MOA) being unable		
	to resolve the fault in a timely manner to rema	in complaint with the		
	BSC. The notification process used in the faults	process should also be		
	amended to reflect the recommendations of th	e Fault Investigation		
	Review Group (FIRG).	Review Group (FIRG).		
History:	Issue 73 was raised by SSE on 12 October 2018.			
	The first Workgroup was held on 22 November 2018 where			
	amendments were proposed to the FIRG proce			
	The second Workgroup was held on 7 February	2010 to agree the CD		
		The second Workgroup was held on 7 February 2019 to agree the CP that would carry forward FIRG recommendations, discuss potential		
	SLAs and begin defining LDSO process.			
	SLAS and begin defining LD3O process.			
	ELEXON has used data from Workgroup members	·		
	service level agreements for resolving faults an	d draft redlining to		
	carry forward proposed changes .			
	The third Workgroup for Issue 73 was held on 1	13 June 2019, for the		
	Workgroup to consider the proposed SLAs and	process for involving		
	Distributors in the fault resolution process.			
	ELEXON adapted the draft redlining for the pro	nosed Change Pronosals		
		to take account of comments made by the Issue 73 Workgroup.

	ELEXON presented an update to the Issue Reso	•		
	August 2019, following which it will determine Group meeting is required.	whether another issue		
	Group meeting is required.			

Issue 78: Measurement and monitoring of Settlement performance		Update	
Date Raised:	29 March 2019	Opus Energy Limited	
Latest Update:	29 March 2019 Proposer: Opus Energy Limited Having allowed the PAF review work to progress over the summer an Issue Group meeting was held on 28 August 2019. All matters		

	discussed by the Issue Group have been deferred to the PAF review		
	with a caveat that if it is felt that PAF Review actions do not address		
	the issues raised, subsequent changes can be raised at a later date.		
Next Event:	The Issue Report will be presented to the Panel on 10 October 2019.		
Issue:	The Proposer believes that impending industry-wide challenges around		
	Settlement Performance will stem from Suppliers' two-tiered customer		
	portfolios:		
	Those with smart Meters and thus, in due course, Half-Hourly		
	(HH) Settled; and		
	Those without, who will forever remain non-HH (NHH)		
	This Issue is already impacting a large number of Suppliers and that		
	will increase with the smart Meter rollout and move to mandatory HH		
	Settlement, as the remaining pot of non-smart and NHH customers will		
	have a greater proportion of hard-to-read (HTR) sites.		
History:	Issue 78 was raised by Opus Energy Limited on 29 March 2019.		
	The first meeting was exceptionally well attended (25+ attendees) on		
	24 April 2019. ELEXON analysed Supplier Charge data from various		
	, , , , ,		
	sources and modelling various options to assess potential material		
	impacts. Options being investigated include, but are not limited to:		
	Amending Supplier Charge rates to various values. Removing all		
	Supplier Charges, removing some Supplier Charges, increasing and		
	decreasing target levels to between 0% and 100% and combinations of		
	each of these options.		
	Following discussion with the Proposer in terms of how Issue 78		
	overlaps with the PAF Review, the Proposer expressed their intent to		
	continue with 178 with a view to investigating if there are any short		
	term solutions to 'fill the gap' ahead of any PAF Review changes being		
	made. It was agreed that any synergies between I78 and the PAF		
	Review should continue to be explored and pursued where applicable once the PAF review had time to formulate some initial ideas and as		
	such there was some delay between the first and second Issue Group		
	meetings to allow for PAF review work to feed into Issue 78.		
	incedings to allow for the review work to reed into issue 76.		

<u>Issue 80:</u> Increase in minimum data storage requirements within the relevant Metering CoPs			Update
Date Raised:	16 April 2019	Proposer:	Association of Meter
			Operators (AMO)
Latest Update:	An Issue 80 meeting was held on 19 September 2019. The Workgroup discussed Meter manufacturer feedback and clarified the proposed Change Proposals to be raised as an outcome of Issue 80. The Workgroup are seeking a Party to raise two CPs. In the event that a BSC Party does not volunteer ELEXON will raise the CPs on behalf of the Issue 80 Workgroup.		

Next Event:	The Issue 80 Final Report to be submitted to the October 2019 BSC Panel meeting.
Issue:	The minimum data storage requirements within the Half Hourly Metering Codes of Practice (CoPs) are regarded as very low and should be increased.
History:	Issue 80 was raised by AMO on 16 April 2019. The first Issue 80 meeting date was scheduled for 24 June 2019. A Request for Information inviting Meter Manufacturer, Party Agents, Parties and other interested parties views of the proposed change was issued prior to the meeting for group's consideration. The first Issue 80 Workgroup was held on 24 June 2019. The Workgroup discussed the issue and reviewed the RFI responses. The Workgroup agree there is a need to increase meter memory and a Change Proposal should be raised. Before raising the change ELEXON will further engage with meter manufactures to determine the impact of increasing meter memory. Given the Issue 80 Workgroup recommendation, ELEXON with Meter Manufacturers to determine the impact of increasing meter memory. Meter Manufacturer feedback and discussed with the Workgroup before finalising the Issue 80 Report.

Issue 81: Determining the benefits of Run-up/Run-down rates and Last Time to Cancel Synchronisation (LTCS)			Update	
publication on BM Date Raised:	12 June 2019	Proposer:	National Grid ESO	
Latest Update:	We are seeking availability of Issue Group Members for the first meeting. Issue 81 struggled to find Members to be quorate but recently reached the minimum five Members.			
Next Event:	ELEXON is planning to hold the first Issue 81 meeting in late October or early November.			
Issue:	Analysis on P297. NGE opportunity to identify items originally in P297 of Run-up/Run-down r	ectricity System Operator SO received feedback that consumer benefits, by e might be assessed to su ates and Last Time to Car MRS, and how these can	at there may be an exploring how the data apport the development ncel Synchronisation	
History:	Issue 81 was raised by	Issue 81 was raised by National Grid ESO on 12 June 2019.		

Issue 82: Expand th	ue 82: Expand the BSC Panel's ability to raise		
Modification Propo	sals		
Date Raised:	19 June 2019 Proposer: ELEXON		
Latest Update:	The Issue 82 meeting w	as held on 20 August 201	19. The Workgroup
	considered whether the	e BSC Panel's ability to ra	ise Modifications
	should be expanded. Th	ne Workgroup recommer	nded that no
	Modification be raised	to expand the BSC Panel	s ability to raise
	Modifications.		
Next Event:	The Issue 82 Final Report will be submitted to the October 2019 BSC Panel meeting.		
Issue:	Currently BSC Section F	2.1.1 restricts the BSC Pa	nel's ability to raise
	Modification Proposals. Issue 82 seeks to expand the Panel's ability to		
	raise Modification Proposals. ELEXON believes that expanding the		
	Panel's ability to raise Modification Proposals would:		
	Increase the effectiveness of the Panel, and thereby the BSC;		
	Reduce the burden on BSC Parties to be Proposers;		
	 Promote improvements in the BSC's self-governance arrangements; and 		
	 Help maintain consistency with the Panel's objectives as set out in the BSC. 		
History:	Issue 82 was raised by I	ELEXON on 19 June 2019.	

	<u>Issue 83</u> : Ensuring that the Buy Price Adjustment reflects all additional balancing costs incurred by NGESO					
additional balancing		3E3U				
Date Raised:	1 July 2019	Proposer:	Sebmcorp UK			
Latest Update:	The first Workgroup was held on 7 August 2019, where it discussed the components that are incorporated in the Buy Price Price Adjustment and how these could continue to be reflected in the Imbalance Price.					
Next Event:	Issue Group to further o	Issue 83 will be held 11 consider what componente to be reflected in pricin	its make up the BPA			
Issue:	The Issue will consider the principles set out in Article 52(2) of the Commission Regulation (EU) 2017/2195 of 23 November 2017, establishing a guideline on electricity balancing to assess how the components of the Buy Price Price Adjustment can continue to be used in the Imbalance Price calculation. This will aim to ensure that it					

	continues to be reflective of the actions taken by National Grid Electricity System Operator.
	In addition to this, Issue 83 will consider what components are included in the Buy Price Price Adjustment, including reserve actions, to ensure that it continues to be properly reflective.
History:	Issue 83 was raised by Sebmcorp UK on 1 July 2019.

Issue 84: Enable the	e cost recovery of the	Radio Teleswitch	Update
Service (RTS) arrang	gements extension		
Date Raised:	10 July 2019	Proposer:	SSE Electricity Limited
Latest Update:	·	s presented at the Septe	mber BSC Panel
	meeting. The BSC Pane	l:	
	Noted the Issue	e 84 draft report.	
	Noted that the	RTS should continue to s	support customers and
	the BSC is the o	orrect mechanism to sup	pport RTS costs
	recovery.		
	Supports a con	tract change between EL	EXON and the ENA for
	the recovery of	operational RTS costs ur	nder the BSC.
	Industry Parties have be	een formally notified of t	the Issue 84 Outcome.
	· ·	act changes with the ENA	
		ct changes between the	ENA and ELEXON have
	been agreed.		
Next Event:	ELEXON has started eng	gaging with the ENA to d	iscuss the RTS Contract
	changes. The industry v	vill be notified once cont	ract changes are
	agreed.		
Issue:	The current billing and	cost recovery of teleswit	ch payments for
	Suppliers, operated by	the ENA, is not fit for use	e. There is not sufficient
	default arrangements,	including a mutualisatior	process. Further, new
	, ,	narket are not obliged to	• •
	, , , , ,	N to support Energy UK ir	resoling this common
	industry issue.		
History:	Issue 84 was Raised by	SSE Electricity Limited or	n 10 July 2019. The
	Issue 84 meeting was h		
	At the 31st of July mee	ting the Issue Group cons	sidered options to
	extend the existing RTS	Contract between the E	NA and ELEXON, to
	facilitate RTS cost recov	ery across all Trading Pa	rties.

- Solution 1 Option a) This will result in a change to the existing RTS contract between the ENA and ELEXON to also facilitate the RTS operational cost recovery.
- Solution 2 Option b) or c) If a BSC Party wishes to do so, they
 can raise a Modification to introduce a requirement for the
 BSCCo to recover the costs of RTS under the BSC. Solution 2
 could be delivered through one of the below options:
 - Option b) calculating costs proportionately across all Suppliers or;

Option c) calculating costs by RTS User market share basis.

Issue 85: Removal	Update					
once every 12 mon						
Date Raised:	27 August 2019	TMA				
Latest Update:	Issue 85 was raised by	ΓMA on 27 August 2019.				
Next Event:	We will be looking to he	old the first Issue 85 Wor	kgroup at the end of			
	October 2019, subject t	to Issue Group Member's	availability.			
Issue:	There is an obligation o	n the NHHDC to visit de-	energised sites			
	annually (footnote 99 f	rom BSCP404). Originally	, the obligation only			
	applied to sites where r	no remote communication	n was available. That			
		9 in 2005. The Obligation	9			
		Supplier Licence obligati	-			
		gations, such as LC 21b.4				
	1 ''	ased approach to ensure				
	regularly enough to avo	oid health and safety issu	es. This leaves the			
	NHHDC agents exposed; unless they are instructed by the Supplier to					
	visit de-energised annu	ally, they are in breach o	f BSCP504.			
History:	Issue 85 was raised by	TMA on 27 August 2019.
