Meeting name	BSC Panel	Meeting number	295
Date and time	10 October 2019	Actions from	BSC Panel
Venue	ELEXON	Classification	Public

No	Meeting no	Paper	Action	Owner	Due date	Action update	Status	Public /Conf
1.	292 (02)	292/08	The Panel asked ELEXON to carry out a review of the process and tenure of appointment of Panel Committees members.	ELEXON	October 2019	Addressed by paper 295/12	To be closed	Public
2.	293 (05)	293/14	A PM queried whether there was scope for maps to be added to BMRS to make the Network Mapping Statement data more intuitive. ELEXON noted that this would not be possible for this year but agreed to discuss this with the PM outside of the meeting in order to explore this possibility for the future.	ELEXON	October 2019	ELEXON contacted Panel member to discuss action; Panel member forwarded comparison spreadsheet. Teleconference with NETSO scheduled for 14 October to understand why data sources differ, and agree course of action.	Open	Public
3.	294 (01)	294/03	The BSC Panel agreed that ELEXON would write a letter to Ofgem on behalf of the Panel detailing the changes to the scope of P332 since it was originally raised and requesting clarification in respect of which elements of the new scope would and would not fall within scope of any of Ofgem's work programs or Significant Code Reviews. for the letter would also ask for advice	ELEXON	September 2019	This letter was sent to Ofgem on Thursday 19 September 2019.	To be Closed	Public

			on whether the issue the Modification sought to address was still valid and whether the Modification should now be progressed, and whether its scope would need to be further revised if it were to be progressed.					
4.	294 (02)	Ofgem Report Verbal Update	A PM requested that the Ofgem Representative look into Generation Storage Licences to ensure that it would not be forcing storage providers to become Capacity Market parties.	Ofgem	November 2019		Open	Public
5.	294 (03)	294/09	A PM suggested that if Interconnectors were engaged in this practice as suggested by the paper, they may be in breach of the Grid Code and should be reported to Ofgem. The NGEESO Representative took an action to investigate the PM's concerns regarding interconnectors and to confirm whether NIV chasing has a systemic impact on balancing costs. The NGEESO Representative noted that they would engage with ELEXON's analyst who had produced the paper to progress this.	NGESO	November 2019	<p>1. The data presented in Panel paper 294/09: INVESTIGATIONS INTO NET IMBALANCE VOLUME CHASING ('NIV CHASING') IN GB ELECTRICITY MARKET had grouped the Interconnector and Non Physical Trader data and there is no concern that Interconnectors/Interconnector users are NIV chasing.</p> <p>2. We recognise that Parties may NIV chase before Gate Closure/Submission Deadline as a Trading Strategy.</p>	Open	Public

						<p>3. Where Parties that do not submit FPN data and are registered in the SVA arrangements change power in real time to NIV chase, ELEXON does not have data to investigate this.</p> <p>4. Having discussed this with National Grid ESO we do not plan to investigate NIV chasing any further at this time.</p>		
6.	294 (04)	Verbal	The BSC Panel instructed ELEXON to cease operation of this process and agreed to write a letter to Ofgem requesting clear advice indicating why resuming operation of the processes would be in the best interest of consumers, the industry or efficiency.	ELEXON	September 2019	The letter was sent on Friday 13 September 2019 the day following the September Panel meeting. The contents of the letter are reflected within the September Panel minutes.	To be Closed	Public
7.	294 (05)	Verbal	The BSC Panel also agreed that in order to ensure that processes were efficient for future operation, ELEXON should raise a BSC Issue to work with industry in identifying changes to improve the current processes. This should give consideration	ELEXON	November 2019		Open	Public
