,	•	s associated with Custom	·	
	with Supplier Agents.	s associated with eastern	er 5 contracting an ectry	
		ng on 14 September 2017		
	accordance with F2.6.10) the P332 Workgroup to pause work on the			
	P332 solution – P332 was effectively placed on hold. The Panel			
	believed the Significant Code Review (SCR) on Half Hourly Settlement			
	(HHS) could change the baseline against which P332 was being			
	developed and assessed. Periodic checkpoints were scheduled to			
	check whether P332 should re-start, remain on-hold or be withdrawn.			
	·			
	The Panel approved a seven-month extension to the Assessment			
	Procedure at its meeting on 10 May 2018. The rationale for the			
	extension was to allow enough time for the outcome of Ofgem's policy			
	work to be known and for the Target Operating Models (TOMs), which			
	are being developed as part of the SCR, to be further developed. The			
Panel approved a nine-month extension to the Procedure at its meeting on 13 December 20				
			•	
	Assessment Report to the September 2019 Panel meeting. This was on			
	the basis that the preferred Target Operating Model (TOM) to be taken			
	forward in Ofgem's <u>Significant Code Review (SCR) on Electricity</u> <u>Settlement Reform</u> represents a material change from the current			
	<u>Settlement Reform</u> re	oresents a material chang	e from the current	

baseline against which P332 would be assessed. Further, Ofgem is also considering two areas of policy which will have an impact on P332:

Consultation on supplier agent functions under market-wide

settlement reform and Future of supply market arrangements – call for evidence (includes Supplier Hub). The Proposer is monitoring the development of the SCR and these policy areas to consider whether P332 should be withdrawn or work restarted.

At the September 2019 Panel meeting, the Proposer provided his view that his issue has not yet been addressed in any of the wider Ofgem initiatives and that he is minded to reduce the scope to Meter Operator Agents only.

The Panel sought Ofgem's views as to whether P332 is in line with Ofgem's current strategic direction and whether P332 is or will be within scope of any of Ofgem's programmes of work. Ofgem provided its view on 9 October 2019. Ofgem believe P332 is not and is unlikely to be in scope of any of its programmes of work and P332 could be investigated separately from considerations of a fundamental change to the whole market design, especially considering the proposed narrowed scope of the modification.

P361: Revised trea	tment of BSC Charges	for Lead Parties of	No Update	
Interconnector BN				
Date Raised:	31 October 2017	Proposer:	Nord Pool Spot AS	
Target	TBC	Current Status:	With Authority	
Implementation			(submitted 13 July	
Date:			2018)	
Latest Update:	Further ELEXON analysis suggests that P361 has 'timed out' and therefore an Authority decision can no longer be made. ELEXON provided its assessment to the Authority, and subsequently explained			
	'	BSC Panel at its meeting		
	2019. The Authority is	making a determination	•	
	P361 has timed out.			
Next Event:	+	P361 is awaiting further information from Ofgem.		
Issue:	The EU Third Package (Article 2 of Regulation 714/2009) expects			
	Interconnectors to be treated as an extension of the Transmission			
	System and not as Production or Consumption. However, for the			
	purposes of calculating BSC Charges, BM Units in Great Britain are			
	currently treated as either a Production BM Unit (generation) or a			
	Consumption BM Unit (demand). The Proposer asserts that the			
	treatment of Interconnector BM Units in the BSC Charges calculations			
Commant Calestians	is not aligned with the EU Third Package.			
Current Solution:	This Modification Proposal seeks to exclude Interconnector Balancing			
	Mechanism (BM) Units from the Main Funding Share and SVA (Production) Funding Share BSC Charges, in order to better facilitate			
	the EU Third Package.			
History:	The first P361 Workgroup meeting was held on Monday 8 January			
	2018. The Workgroup discussed the issue and the proposed solution.			

The Workgroup agreed to seek additional legal guidance on the defect. A second Workgroup meeting was held on 12 February 2018. The Workgroup discussed the legal guidance provided by ELEXON and agreed to seek additional external legal advice on the issues and EU law.

On 22 February 2018, Ofgem rejected the Proposer's request to treat P361 as an Urgent Modification Proposal. Ofgem did not believe the case for urgency had been clearly demonstrated.

A third Workgroup meeting was held on 13 March where external legal guidance was presented and discussed. Subsequently, the Proposer amended his solution to only exclude Interconnector BM Units Credit Energy Volumes from the Main Funding Share and SVA (Production) Funding Share calculations.

A fourth Workgroup meeting was held on 18 April 2018, where the Service Provider Impact Assessment of the Proposed solution was discussed and the Assessment Procedure Consultation documentation finalised. The Assessment Procedure Consultation was issued on the 26 April 2018, with responses due by15 May 2018.

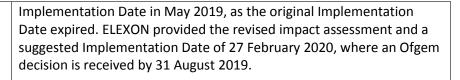

The fifth Workgroup was held on 24 May 2018, where the Assessment Consultation responses were discussed. The Workgroup raised an Alternative Modification, whereby the revised formula for the Main Funding Share and SVA (Production) Funding Share would be effective from the date of Authority decision. The formal implementation date would still remain as previously discussed, as the 28 February 2019.

The Assessment Report was presented to the Panel on 14 June 2018. The Panel initially recommended that both the Proposed and Alternative Modifications be rejected. The Report Phase Consultation was subsequently issued on 20 June 2018, with responses due by 3 July 2018.

The Draft Modification Report was presented to the Panel on 12 July 2018. The Panel recommended that both the Proposed and Alternative Modifications be rejected. The Final Modification Report was submitted to the Authority on 13 July 2018.

P361 is with the Authority for decision. Ofgem initially published an indicative decision date of 17 August 2018 but they have since been in contact notifying ELEXON that this decision date could not be met due to further legal analysis of the issue.

Following the submission of the Final Modification Report to Ofgem in July 2018, Ofgem requested a revised BSC impact assessment and

Ofgem indicated at the Panel on 11 April 2019 that it was minded to approve P361. As a result Ofgem have asked ELEXON for an updated impact assessment, as the proposed Implementation Date of 28 February 2019 has now passed.

P371: Inclusion of	f non-BM Fast Reserve	actions into the	No Update		
Imbalance Price calculation					
Date Raised:	11 September 2018	Proposer:	UK Power Reserve		
Target	25 June 2020 (June	Current Status:	With Authority		
Implementation	2020 Release)				
Date:					
Latest Update:		cation Report was presen			
		here it recommended P3	• • • • • • • • • • • • • • • • • • • •		
Next Event:		ation Report was sent to	the Authority for		
leave	decision on 19 Septem		rocomia into the		
Issue:	, ,	methodology for pricing r			
		lance price exclusively fo			
	BM and Non-BM STOR	. The aim was to capture	the value that that		
	capacity is providing to	the system at times of n	nargin tightness.		
	At the time the new m	ethodology was limited t	o STOR because STOR		
	was considered "the m	ain source of reserve", n	ow the GB balancing		
	system has undergone	a range of changes, whe	reby Reserve products		
	have been rationalised and harmonised. There is a lack of harmonised				
	treatment between STOR and Fast Reserve and it is necessary to				
	extend the application of the Reserve Scarcity Price (RSP) calculation				
	methodology to Fast Reserve.				
	The Proposer believes of the two Reserve pro captured already withi	or a different treatment hould have been			
Current Solution:	This Modification Proposal aims to include non-BM Fast Reserve actions in the calculation of the Imbalance Price, by including them in the Balancing Service Adjustment Data file. This will make the Imbalance Price more reflective of the actions taken by the System Operator.				
History:	P371 was raised by UK Power Reserve on 11 September 2018. The				
	Initial Written Assessment was presented to the Panel on 13				
	September 2018 and the Panel agreed to progress the Modification to				
	the Assessment Procedure. The first industry Workgroup was held on				
	24 October 2018. 14 actions, including detailed analysis were				
		, 0:::::::	-		

identified for ELEXON and National Grid to jointly complete. Due to the level of analysis requested by the Workgroup in order that it can fully develop an appropriate solution, the Assessment Procedure has taken longer than initially anticipated. This resulted in the Panel extending the Assessment Procedure by four months at its February 2019 meeting. The second Workgroup for P371 was held on 13 March 2019 where the Workgroup agreed two possible solutions to P371. ELEXON undertook Impact Assessments to assess the costs and implementation times of potential solutions.

The Third P371 Workgroup was held on 5 June 2019 where the Workgroup agreed its preferred solution. The Assessment Procedure Consultation was Issued on 17 June 2019 for 15WD.

Responses to the Assessment Procedure Consultation were due on 5 July 2019. The final Workgroup was held on 16 July for the Workgroup to consider consultation responses.

The Assessment Report was presented to the Panel on 8 August 2019.

The P371 Report Phase Consultation was issued 13 August with responses due by 27 August 2019.

P374: Aligning the	No Update				
derogation approach					
Date Raised:	5 November 2018	Proposer:	SSE		
Target	5WD following	Current Status:	With Authority		
Implementation	Authority decision				
Date:					
Latest Update:	At its meeting on 12 Se	ptember, the BSC Panel	unanimously		
	recommended to the A	uthority that the P374 A	ternative Modification		
	be approved and the Pr	roposed Modification rej	ected. The P374 Final		
	1	as submitted to the Auth	ority for decision on 18		
	September 2019.				
Next Event:	Ofgem will determine whether to approve the Alternative or Proposed				
	P374 Modifications for implementation 5WD following authority				
	decision.				
Issue:	P374 seeks to ensure that the BSC is aligned with the European				
	Electricity Balancing Guideline (EB GL – Regulation 2017/2195)				
	derogation and change process by ensuring that BSC Modifications are				
	not implemented until the EB GL change process has completed and				
	that BSC Derogations cannot be granted for provisions that meet the				
	EB GL balancing terms and conditions. Specifically, P374 aims to reflect				
	changes to the Code Governance arising from the application of the				
	terms and conditions related to balancing from Articles 4, 5, 6, 10 and				
	18 of the EB GL.				

Current Solution:

To amend BSC Derogation arrangement to make clear the parts of the BSC that form the terms and conditions related to balancing - which then cannot be subject to a BSC Derogation, in accordance with EB GL Articles. Additionally amending BSC change procedure to reflect that changes to certain parts of the BSC will have to go through a revised change process, in accordance with EB GL Articles.

At its third meeting, P374 Workgroup members voted to raise an Alternative Modification that is identical to the Proposed, except in that it will not explicitly preclude derogations from BSC provisions that constitute Article EBGL Article 18 terms and conditions related to balancing. Instead, it will allow each derogation application to be assessed on a case-by case basis against the existing derogation criteria set out in BSC Section H 10.4.3(d), which do allow derogations to be granted from any BSC provision which constitutes Legal Requirement or Relevant European Legal Requirement as defined in the BSC.

History:

P374 was raised by SSE on 5 November 2018. The Initial Written Assessment was presented to the Panel on 8 November 2018. The Panel believed there was insufficient information to decide how to proceed (options included to proceed to the Definition, Assessment or Report phase). The Panel, therefore, deferred its decision and wrote to Ofgem to seek further information to enable it to make a decision at its next regular meeting on 13 December 2018. The Panel determined at its meeting on 13 December 2018 that P374 should be submitted to the Assessment Procedure. The first Workgroup was held on 20 February 2019. Discussions focused on the scope of the Modification, ELEXON took an action to draft an Alternative solution regarding how EBGL Article 62 impacts BSC Section H. The second Workgroup meeting was scheduled to take place on 12 March but was cancelled due to quoracy issues. We updated the Panel verbally on 14 March 2019 and achieved guoracy for the second Workgroup, held on 24 April 2019. ELEXON asked for an extension for P374 at the 11 April BSC Panel meeting, this was due to guorcacy issues. The BSC Panel granted P374 with a two month extension until July 2019. The second Workgroup was held on 24 April 2019 to discuss solution options. During the course of the Workgroup it became clear that

The third Workgroup meeting was held on Friday 7 June 2019 to review proposed legal text for two options. The Workgroup agreed to raise an Alternative solution. The Workgroup also requested a onemonth extension to P374, which was approved by the BSC Panel at its meeting on 13 June 2019. This was due to the agreement of the solutions taking one more meeting to agree than planned.

further work was required to amend the legal text and as such another

meeting was required to further develop the solution.

However, the Workgroups were delayed due to quoracy issues.
Further delays were experienced as the agreement of the solution took
longer than anticipated.
The final P374 Workgroup was held on Thursday 25 July whereby the
majority of the Workgroup voted for the alternative solution. They also
unanimously agreed the BSC legal text, BSC Applicable Objectives and
that it should not be progressed as Self-Governance.
P374 was issued for Report Phase consultation over the period 13
August 2019 to 27 August 2019. The Panel initially believe the P374
Alternative Proposal should be approved.

P375: Settlement of Secondary BM Units using metering Update					
behind the site Boundary Point					
Date Raised:	10 December 2018	Proposer:	Flexitricity		
Target	TBC pending Service	Current Status:	Assessment		
Implementation	Provider Impact		Procedure		
Date:	Assessment				
Latest Update:	A Service Provider Imp	act Assessment is being	conducted and we are		
	looking at how P375 in	teracts with P376 and P3	379 to ensure the three		
	solutions are compatib	le. The sixth Workgroup	was held on 6		
	November 2019 to dis	cuss areas of the solutior	n that still require		
	refinement and interac	ction with other Modifica	ntions.		
Next Event:		one on finalising the solu			
	Business Requirement	s and, potentially, the Im	pact Assessment before		
	preparing the Assessm	ent Consultation for issu	e before the end of the		
	year.				
Issue:		The BSC currently only allows metering at the defined Boundary Point			
		ent purposes. However, v			
	for consumers to participate in the BM and other alternative balancing				
	products, which will be settled under the BSC framework, there is a				
	need to allow Settlement from metering behind the Boundary Point at				
	the asset which is delivering the Balancing Service. This Issue arose				
	through the development of the Project TERRE arrangements through				
	BSC Modification Proposal P344 'Project TERRE implementation into				
	GB market arrangements', but may become relevant to other				
	Balancing Services in the future. The need to allow Settlement from				
	metering behind the Boundary Point is due to the desire to further				
		either perceived or due to	·		
	barriers to entry to participate in balancing products.				
Current Solution:		e Secondary Balancing M			
	(to be introduced by P344 'Project TERRE' (Trans European				
	Replacement Reserves Exchange)) using metering equipment behind				
	the defined Boundary Point for Balancing Services (known as 'behind				
	the Meter'), rather than settling using Metering Equipment at the				
	Boundary Point as per current BSC obligations. This will allow				
	balancing-related services on site to be separated from imbalance-				

	related activities, more accurately reflecting the balancing-energy volumes provided by the Balancing Service Provider (BSP).
History:	P375 was raised by Flexitricity on 10 December 2018. The Initial Written Assessment was presented to the Panel on 13 December 2018 and was entered into the Assessment Procedure. P375 and P376 are being progressed separately, but with similar Workgroup Members and as such, Workgroup meetings will be held together where appropriate.
	The first Workgroup meeting, held jointly with P376, was on 25 January 2019. The Workgroup discussed possible effects on the Boundary Site and how links with National Grid would affect the eventual solution.
	The second Workgroup meeting was on 18 March 2019 in conjunction with P376. The Workgroup discussed metering standards and processes for secondary asset metering for use for balancing services and settlement as well as the line loss methodology to be applied. The Workgroup also considered how asset meters should be registered.
	The third Workgroup meeting was on 16 May 2019. The Workgroup reviewed the draft Code of Practice for Asset Metering behind the Boundary Point and the work in progress Business Requirements. The Workgroup agreed that further consideration of the assurance regime, reporting and the types of behind the Boundary Point meters that should be included in the P375 solution are required
	The BSC Panel approved a six-month extension to the P375 Assessment Procedure at their meeting on 13 June 2019. The P375 Assessment Report will be presented to Panel at its January 2020 Panel meeting.
	The fourth Workgroup was held on 4 July 2019. The Workgroup discussed the customer journey registration process and the role of Meter Operator Agents. The Workgroup reviewed a use case to illustrate a 'metering by differencing' approach with multiple VLP actions on a site as well as Performance Assurance Techniques for VLPs.
	The fifth P375 Workgroup was held on the 20 August 2019. The Workgroup conducted a detailed review of the business requirements and Asset Metering Code of Practice 11.

P376: Utilising a Baselining Methodology to set Physical	Update
Notifications for Settlement of Applicable Balancing	
Services	

Date Raised:	11 December 2018	Proposer:	Enel Trade S.P.A.	
Target Implementation Date:	ТВС	Current Status:	Assessment Procedure	
Latest Update:	The fourth Workgroup was held on the 14 August 2019 to consider and develop the Business Requirements. ELEXON issued a Request for Information to support analysis on 23 September 2019 with responses due 11 October 2019. ELEXON is working with industry participants to ensure we have sufficient data to produce meaningful analysis to support the P376 solution. We are also workOing with the teams for P375 and P379 to ensure the Business Requirements are supportive of each other.			
Next Event:		ill be held late November formation and finalise th		
Issue: Current Solution:	ELEXON raised Issue 71 'Introduction of a baselining methodology as an alternative to Physical Notifications' on 15 June 2018. This Modification builds on the back of this Issue and formally raises a Modification Proposal relating to the same defect. Modification Proposal P344 'Project TERRE implementation into GB market arrangements' seeks to align the Balancing and Settlement Code (BSC) with the European Balancing Project TERRE (Trans European Replacement Reserves Exchange) requirements. The solution developed by the P344 Workgroup allows customers (or independent aggregators acting on their behalf) to participate in TERRE (and the BM) independently of their electricity Supplier, by registering a 'Secondary BM Unit'. The P344 solution is intended to facilitate participation in the BM and TERRE by a wider range of industry market participants, including customers and independent aggregators. However, in the P344 solution, the existing BM Settlement arrangements remain unchanged.			
Current Solution:	This Modification proposes to allow the Final Physical Notification which feeds into the Settlement of Trading Charges to be created via a Baselining Methodology. This Modification builds on the work of Issue 71.			
History:	The Initial Written Assessment was presented to the Panel on 13 December 2018 and was entered into the Assessment Procedure. P376 was raised by Enel Trade S.P.A. on 11 December 2018. The first Workgroup meeting, held jointly with P375, was held on 25 January 2019, where the Workgroup explored the issue by discussing possible effects on the Boundary Point and how links with National Grid would affect the eventual solution. The second Workgroup for P376 was held in conjunction with P375 on 18 March 2019 to begin the process of designing a solution and exploring assurance methods in order to protect the integrity of the eventual solution.			

ELEXON worked with the Proposer to identify characteristics of
baseline methodologies currently used in other markets.
The third Workgroup was held on 3 June 2019, where the Workgroup considered baseline methodologies.
ELEXON worked with the Proposer to draft initial Business Requirements and considered what analysis, if any, should be undertaken on preferred baselining methodologies.

P379: Multiple Suppliers through Meter Splitting			Update
Date Raised:	3 January 2019	Proposer:	New Anglia Energy
Target	November 2020	Current Status:	Assessment
Implementation	(subject to		Procedure
Date:	Assessment of		
	Modification and		
	associated delivery		
	timescales through		
	impact assessment)		
Latest Update:	The last P379 meeting	(WG9) was held on 24 Se	ptember 2019. At the
	meeting Ofgem presen	ted on Key design consid	erations. The
	Workgroup reviewed th	ne P379 high level Busine	ess Requirements, P379
	Policy - Regulatory Log	and complex use cases. I	ELEXON is in the
	process of drafting the	detailed Business Requir	ements to be reviewed
	by the WG at the next i	meeting to be held in De	cember 2019.
Next Event:	The next P379 meeting	(WG10) will be held on 3	B December 2019. The
	purpose of the meeting	g is to review the detailed	d P379 Business
		e next steps for Impact A	
Issue:	In the view of the Proposer, this Modification will address a significant		
	barrier to competition in the market rules whereby multiple Trading		
	Parties are unable to compete for behind the Meter energy volumes,		
		Settlement Meter at the	
	· ·	tlines that the existing ar	~
	1 1	e development of local e	• .
		effectively mean there is	
		lier, over a consumer's e	= :
		any given time, restrictin	g competition and
	innovation.		
Current Solution:	This Modification will enable individual consumers to be supplied by multiple Trading Parties, including Suppliers through a Balancing and		
		Settlement Meter at the	•
		s to support developmer	
		novation, expanding upo	
	implemented by BSC Modification P344 'Project TERRE		
	implementation into GB market arrangements'. It will achieve this		
		f a new Party Agent role,	
		A), who would reconcile	_
		enabling accurate allocat	
	· ·	l allow Trading Parties to	reflect these volumes
	in their bills and payme	ents to consumers.	

History:

P379 was raised by New Anglia Energy on 3 January 2019 with the Initial Written Assessment presented to the BSC Panel at its meeting on 10 January 2019. The Panel determined that P379 should be submitted to the Assessment Procedure, with the Assessment Report to be presented to the Panel at its meeting on 12 September 2019. The Panel requested an interim report on P379 at its June 2019 meeting.

The first P379 Workgroup meeting was held on 27 February 2019. The group considered the Terms of Reference and discussed views on the proposal. ELEXON took a number of actions arising from the meeting, including further areas for consideration.

Following the first Workgroup discussions ELEXON updated and issued two use cases for the Workgroups review prior to the next meeting.

The second P379 meeting was held on 3 April 2019. The purpose of the meeting was to:

- To clarify the P379 issue and scope;
- To discuss Workgroup views and feedback on use cases 1 (Electric Vehicle) and 2 (Exempt supply);and

For Ofgem to provide an overview on Network Access and Forward-Looking Charge Arrangements Significant Code Review.

The third P379 Workgroup was held on 18 April 2019. The purpose of the meeting was to finish discussions on the Exempt Supply Use Case. To provide more background information on Exempt Supply requirements Ofgem presented on the Exempt Supply framework and how this works within the current market. In addition ELEXON provided an overview of the existing options for non-licenced entities selling power over the Distribution Network Operator's (DNO) network and how the P379 solution could potentially work.

An interim report was presented to the Panel on 13 June 2019, as agreed as part of the approved P379 progression plan. The Panel approved a six-month extension and advised the Workgroup to consider how the Modification could be scoped to deliver earlier. A meeting was held on 27 June 2019 to finish discussing balance responsibility and the Party Agent Role.

The P379 WG6 and WG7 meetings were held on 23 and 24 July 2019 respectively. The Workgroup considered two 'operating models' for the P379 solution, highlighting the key priorities and areas of concern. A key part of P379 is the provision of metered data for assets (e.g. electric vehicle) behind the Boundary Point Meter. ELEXON provided an update on P375, which is looking at metering systems not installed at the Boundary Point. Further P375 updates will be provided to the P379 Workgroup.

The P379 Workgroup 8 meeting was held on 13 August 2019. ELEXON presented the detailed proposed, and alternative models covering the different entities and functions involved in multiple supply. The Workgroup agreed with processes in both models. The Workgroup also considered the following items: P379 FAQ, Performance assurance, data flows and whether multiple supply will be optional or mandatory.

The P379 Workgroup 9 meeting was held on 24 September 2019. At the meeting Ofgem presented on Key design considerations. The Workgroup discussed the P379 high level Business Requirements, the Policy and Regulatory Log and complex use cases. ELEXON has drafted the detailed Business Requirements to be reviewed by the WG at the next meeting to be held in November 2019.

P382: Amendments to the BSC to reflect the United			Update	
Kingdom's withdrawal from the European Union without a				
deal				
Date Raised:	4 March 2019	Proposer:	National Grid ESO	
Target	To be confirmed	Current Status:	Report Phase	
Implementation	pending outcome of			
Date:	Brexit			
Latest Update:	The Panel reviewed the	draft Modification Repo	rt at their meeting on	
		red making a decision ur		
	certainty around the UI	C's exit from the EU. Cou	pled with uncertainty	
		be required (N.B. P382 is		
		from the EU), the Panel o		
	most economic and efficient thing to do would be to defer their			
	decision. The Panel reviewed the position on 10 October 2019 and			
	-	given the continued uncertainty over Brexit decided to defer again		
	until the latter of the Panel meeting following exit day or April 2020.			
Next Event:		Modification Report will	be presented to the	
	Panel as indicated abov			
Issue:		ithdrawal Act (2018) will		
	'	diately following exit day	•	
		es, which may lead to cor	-	
		nt Brexit legislations, and	d will need updating as	
	soon as possible.			
	It should be noted that some revoked EU Legislation may not lead to			
	the BSC being amended as it is more efficient for these parts of the			
		BSC to remain 'dormant' until further details emerge of the UK's future		
	relationship with the EU post-Brexit. An example would be parts of the			
	Code dealing with P344 'Project TERRE' which won't become 'active' until December 2019.			
Current Solution:	The BSC will be amended to reflect where EU regulations will not be			
Carrent Jointion.			_	
		retained in EU law and will make the BSC inoperable/confusing. If parts of the BSC are no longer applicable (as the associated EU regulation		
	will not be retained), they may however, not necessarily need to be			
	will not be retained, they may nowever, not necessarily need to be			

	changed as allowing them to be dormant (i.e. not used but still there)
	may be more appropriate depending on the circumstances.
History:	P382 was raised on 4 March 2019 by National Grid ESO and the Initial
	Written Assessment was presented to the Panel on 14 March 2019.
	The Panel agreed, at its meeting on 14 March 2019, to progress P382 directly to the Report Phase and initially agreed that P382 should be approved. The Report Phase Consultation was issued on 18 March 2019 and closed on 29 March 2019. One response was received and agreed with the Panel's initial recommendations.

CMP281 and ELEXON's V	CMP281 and ELEXON's Workgroup Alternative CUSC Modification to			
CMP280 both require aggregated metered data from specific storage				
facilities' half-hourly (HH) Metering Systems, should they be approved.				
However, the BSC does not currently specify processes or rules for				
collecting and aggregati	collecting and aggregating metered data from HH Metering Systems			
that measure the Impor	that measure the Imports (and Exports) for specific storage facilities			
that would be required for CMP280 and CMP281. Therefore, for the				
BSC to continue to support the Transmission Company with its				
network charging, new BSC processes will be required to enable the				
identification, aggregation and reporting of metered data, and to				
enable the BSC Panel to establish appropriate assurance.				
The Proposer suggests a Modification of the BSC and a certain number				
of its Code Subsidiary Documents so that they describe processes that				
enable Imports and Exports from Half Hourly (HH) Metering Systems				
for specific SVA registered storage facilities to be aggregated and				
reported to the Transmi	ission Company.			
P383 was raised on 6 M	P383 was raised on 6 March 2019 by Innogy. The P383 IWA was			
	,			
	12 September 2019. The approved. The P383 Fin Authority for a decision P383 is awaiting Author the Modification will be Connection and Use of CMP281 and ELEXON's CMP280 both require a facilities' half-hourly (HI However, the BSC does collecting and aggregation that measure the Important would be required BSC to continue to suppose network charging, new identification, aggregation enable the BSC Panel to The Proposer suggests a of its Code Subsidiary Denable Imports and Expfor specific SVA register reported to the Transmer P383 was raised on 6 Minus P383 w	CMP280 both require aggregated metered data facilities' half-hourly (HH) Metering Systems, she However, the BSC does not currently specify proceeding and aggregating metered data from H that measure the Imports (and Exports) for specific that would be required for CMP280 and CMP28 BSC to continue to support the Transmission Conetwork charging, new BSC processes will be recidentification, aggregation and reporting of meterable the BSC Panel to establish appropriate as The Proposer suggests a Modification of the BSC of its Code Subsidiary Documents so that they denable Imports and Exports from Half Hourly (H for specific SVA registered storage facilities to be reported to the Transmission Company.		

the Assessment Procedure.
The first Workgroup was held on 29 April 2019. The Workgroup have
identified a solution, agreed on the Applicable BSC objectives, and
agreed that it should not be progressed as Self-Governance.
ELEXON held the second Workgroup meeting on 11 June 2019 where
they discussed the legal text, business requirements and the Service
Provider Impact Assessment.
P383 was sent out for Assessment Procedure Consultation on 2 July
2019, with responses due by 22 July 2019.
The final P383 Workgroup was held on Monday 29 July 2019. The
Workgroup agreed on the Applicable BSC Objectives, the draft legal text, that P383 should not be progressed as Self-Governance, the
proposed Implementation Date, and that there were no alternative
solutions.
P383 was issued for Report Phase Consultation on 13 August 2019,
with responses due by 27 August 2019. The Panel initially believe P383
should be approved.

P385: Improving th	e efficacy and efficier	ncy of the Section H	Update
Default provisions			
Date Raised:	3 April 2019	Proposer:	Centrica
Target	Feb 2020 BSC Release	Current Status:	Report Phase
Implementation			
Date:			
Latest Update:	At the BSC Panel meeti	ng on 10 October 2019, t	he Panel considered
	•	and agreed to progress I	·
		commendation to approv	· I
		hree responses, all of wh	' '
		s progression as a Self-Go	overnance
	Modification.		
Next Event:		Report will be presented	to the BSC Panel on 14
	November 2019.		
Issue:	' '	cing and Settlement Cod	· ·
	1	defaulting on the BSC has	
		rs without a Supplier of	•
	there was a single occurrence in 2016 followed by an unprecedented 7		
	events in 2018. This has resulted in greater exposure to unpaid		
	Trading Charges which are then mutualised across other BSC Parties.		
	The BSC Panel has the ability to take mitigating action and provide		
	financial protection when an Event of Default is triggered, but the		
	current arrangements in BSC Section H 'General' are overly complex		
	and prolong the period before an Event of Default is declared.		
Current Solution:	P385 proposes amendments to the Default arrangements in BSC		
	Section H 3 'Default' in order to increase visibility to industry of Parties		
	at risk and to potentiall	y allow for earlier remed	ial action by the BSC

	Panel.		
History:	On 3 April 2019, Centrica raised P385. ELEXON presented the Initial		
	Written Assessment at the 11 April BSC Panel meeting, where the		
	Panel agreed to progress P385 to the Assessment Procedure.		
	Following experiencing difficulty confirming a date for the first		
	Workgroup meeting, due to quoracy issues, ELEXON externally		
	engaged prospective Members and secured the necessary number of voting Workgroup Members.		
	The first Workgroup for P385 was on 17 June 2019. The Workgroup		
	developed a large amount of the solution, identifying an approach		
	where parameters for certain Events of Default are placed under Panel		
	control.		
	The second Workgroup for P385 took place on 15 July 2019, where all remaining areas of the solution were agreed. The Workgroup is currently reviewing the draft Assessment Procedure Consultation. The Assessment Procedure Consultation closed on 21 August 2019. There were 3 responses from Suppliers, all of whom are supportive of the proposal and its recommendation as a Self-Governance Modification. The third and final P385 Workgroup meeting took place on 30		
	September, where Members will consider responses to the		
	Consultation and provided final views on the P385 solution. The		
	Workgroup have unanimously recommended the Solution with no		
	alternatives identified. They recommend that P385 be governed under the Self Governance Criteria.		

P390: Allowing extensions to ELEXON's business and			Update	
activities, subject to additional conditions				
Date Raised:	12 August 2019 Proposer: E.ON			
Target	5 Working Days after	Current Status:	Assessment	
Implementation	Authority decision		Procedure	
Date:				
Latest Update:	After a small delay read	thing the minimum numb	oer of Workgroup	
	Members in order to be quorate, the first P390 Workgroup meeting			
	has been scheduled.			
Next Event:	The first P390 Workgroup meeting will be held on 18 November 2019.			
Issue:	The BSC restricts the activities of ELEXON and in the absence of a			
	specific Modification ar	ny additional activities ca	nnot be pursued by	
	ELEXON (even when those activities would be of benefit to BSC Parties,			
	industry generally and/or the consumer).			
	In the past specific Modifications have been necessary which have			
	enabled ELEXON to provide the Warm Homes Discount Reconciliation			
	service, EMR settlement, and to participate in gas performance			
	assurance framework and REC manager appointment processes.			
	Such individual Modifications to extend ELEXON's vires are time			
	consuming and can be an unnecessary distraction for industry. They			

	can also result in ELEXON being unable to pursue an opportunity			
	within a required timeframe.			
Current Solution:	A framework into the BSC that allows the ELEXON Board to determine			
	whether ELEXON can undertake additional activities provided certain conditions are met.			
	All of the conditions introduced in previous Modifications to ELEXON's			
	vires, P330 'Allowing ELEXON to tender for the Uniform Network Code			
	Gas Performance Assurance Framework Administrator (PAFA) role' and			
	P365 'Enabling ELEXON to tender for the Retail Energy Code (REC)' are			
	included, plus some additional conditions to safeguard the interests of			
	BSC Parties.			
History:	P390 was raised by E.ON on 12 August 2019. The IWA was presented			
	to the Panel on 12 September 2019. ELEXON are ascertaining the most			
	appropriate date for the first Workgroup, proposed for early October			
	2019 subject to the availability of the minimum number of members to			
	be quorate. This has involved direct engagement with industry			
	members with experience as a Workgroup member for similar			
	modifications, as well as reminding industry about the Modification via			
	communications channels.			

P391: Introducing Desktop Audits			Update	
Date Raised:	12 September 2019	Proposer:	BSC Panel	
Target	Feb 2020 BSC Release	Current Status:	Awaiting	
Implementation			implementation	
Date:				
Latest Update:	The Panel approved P3	91 as a Self-Governance	Modification at its	
	meeting on 10 October	2019. The Self-Governar	nce appeal window	
	closed on 30 October 2	019 with no appeals rece	eived.	
Next Event:	P391 will be implement	ted on 27 February 2020	in accordance with the	
	Panel's recommendation	on.		
Issue:	When a Metering Syste	m is selected for audit, t	he requirement for	
	Inspection Visits to be o	carried out on-site (and f	or the Registrant and	
	the Meter Operator Agent (MOA) to attend the Inspection Visit), is			
	resource intensive for both the Technical Assurance Agent (TAA) to			
	undertake and audited	undertake and audited Parties to support. The PAF Review reviewed		
	the TAM technique from	m November 2018 to Feb	oruary 2019, with the	
		resented to the PAB on 2	-	
	1 ''	ew's recommendations (1		
	Report (217/13)). One of the recommendations was to introduce			
	Desktop Audits, as a lower intensity audit check. These would			
	supplement onsite Inspection Visits as directed within the annual audit			
	scope.			
Current Solution:	This Modification proposes to amend the BSC to expand the scope of			
	the TAM technique to allow for Desktop Audits to act as a supplement			
	to existing on-site Inspection Visits.			
History:	P391 was raised by the BSC Panel on 12 September 2019 who agreed			
	that P391 meets the Self-Governance criteria and should be			
	progressed straight to t	he Report Phase. P391 v	vas issued for Report	

P392: Amending BSC Change Process for EBGL Article 18 Update				
Date Raised:	2 October 2019	Proposer:	National Grid ESO	
Target	4 April 2020	Current Status:	Assessment	
Implementation			Procedure	
Date:				
Latest Update:	The P392 Initial Writter	n Assessment was preser	ited to the BSC Panel	
	on 10 October 2019, wl	here they agreed that P3	92 should be	
	progressed to the Asses	ssment Procedure.		
Next Event:	The first P392 Workgro	up will be held on 8 Nove	ember 2019, the	
	objective of this meeting	ng is to discuss and agree	the BSC Modification	
	process.			
Issue:	National Grid Electricity System Operator (NGESO) is delegating some			
	,	of its powers and obligations under European Electricity Balancing		
	` ′	Guideline (EBGL) Articles 4, 6 and 10 to either of the Balancing and		
	Settlement Code Company (BSCCo), or the BSC Panel. The BSC			
	therefore needs to be a	mended to reflect the B	SCCo's and BSC Panel's	
	increased powers and obligations under the delegation to facilitate the			
	EBGL change process within existing BSC change processes.			
Current Solution:	Update the relevant BSC processes to capture the specific powers and			
	obligations delegated to the BSCCo or the BSC Panel (as relevant) from			
	NGESO, and clearly set out the change process that shall apply to any			
	BSC Modification proposal seeking to amend any of the EBGL Article 18			
	terms and conditions.			
History:	P392 was raised by National Grid ESO on 2 October 2019.			

P393: Disapplication of Supplier Charge SP01			Update	
Date Raised:	10 October 2019	10 October 2019 Proposer:		
Target	27 February 2020	Current Status:	Report Phase	
Implementation				
Date:				
Latest Update:	The BSC Panel raised BS	SC Modification P393 at i	ts meeting on 10	
	October 2019, and the	Report Phase Consultation	on ran over the period	
	14-30 October 2019 inclusive.			
Next Event:	The P393 Draft Modification Report will be presented to the BSC Panel			
	for recommendation to the Authority at its meeting on 14 November			
	2019.			
Issue:	Suppliers incur Supplier Charges if they fail to meet certain			
	performance levels against six PARMS Serials. Supplier Charges are			
	intended to charge Parties where they fail to meet certain			
	performance levels, and redistribute such funds to disadvantaged			
	Parties. However, the non-submission of PARMS reports (for which			
	Supplier charge SP01 is applied) does not directly disadvantage other			
	Parties. Therefore, the application of Supplier Charge SP01 doesn't			
	clearly align to the purpose of Supplier Charges.			

Current Solution:	P393 seeks to set Supplier Charge SP01 to a value of £0 in BSC Section S Annex S-1 'Performance Levels and Supplier Charges'. Historic missing data for which an SP01 Charge is applicable will also revert to zero after the Implementation Date of this Modification.
History:	P393 was raised by the BSC Panel on 10 October 2019.

P394: Amending BS	P394: Amending BSC Change Process for EBGL Article 18			
Date Raised:	10 October 2019	Proposer:	BSC Panel	
Target	27 February 2020	Current Status:	Report Phase	
Implementation				
Date:				
Latest Update:	The P394 Report Phase	Consultation was issued	to industry on 14	
	October with responses	s due 22 November 2019		
Next Event:	The P394 Draft Modification Report will be presented to the BSC Panel			
	on 12 December 2019.			
Issue:	The redundant BSC sections reduce the efficiency of the Code. They			
	also make the BSC harder to interpret and understand, resulting in			
	increased regulatory burden for Parties (and potential Parties). Lastly,			
	as ELEXON replaces its Central Systems, the unused provisions			
	generate unnecessary requirements that could result in superfluous			
	costs.			
Current Solution:	This Modification proposes to remove the unused BSC provisions,			
	making the Code more efficient, accessible and relevant to parties, and			
	removing potential ambiguity			
History:	P394 was raised by the BSC Panel on 10 October 2019.			

Change Proposal Updates

CP1516: New Interd	connector Fuel Type (Categories: ElecLink	Update
& IFA2			
Date Raised:	7 March 2019	Proposer:	National Grid
Target Implementation Date:	18 December 2019	Current Status:	Awaiting Implementation
Latest Update:	The Panel approved a request to amend the Implementation Date from 30 November 2019 to 18 December 2019 at its meeting on 10 October 2019. This was on the basis that the ElecLink Interconnector will not be energised in December 2019 as originally planned. Therefore, the previous dependency to implement by 30 November 2019 is no longer relevant. As P384 (due for implementation on 18 December 2019) also impacts the BRMS system, there are efficiencies from aligning the two Implementation Dates.		
Next Event:	hoc December 2019 BS		
Issue:	The Balancing Mechanism Reporting Service (BMRS) is used for reporting operational data, relating to the Great British (GB) electricity Balancing and Settlement Code (BSC) arrangements. In part, it receives, stores and publishes data relating to the Interconnectors to Great Britain (GB). This information is available to BMRS users via several graphs, tables and xml/csv downloads, along with API, Data Push services and TIBCO services. Two new High-voltage Direct Current (HVDC) Interconnectors connecting the GB bidding zone to other bidding zones are currently under construction. The ElecLink and IFA2 interconnectors between GB and France are due for commissioning in November 2019 and June 2020 respectively.		
Current Solution:	The BSC arrangements require a separate 'Fuel Type Category' to be defined for each interconnector for reporting purposes on the BMRS. Therefore, it is necessary to make changes to the BMRS, to include the two new 'Fuel Type Categories', before ElecLink and IFA2 go live, in order to provide market participants data in a transparent manner. The solution proposed for implementing CP1516 is an interim solution whereby aggregated data for Eleclink and IFA2 will be included within the existing IFA field (INTFR) on BMRS. Disaggregated data will be published on a new webpage on the BMRS, from which market participants will be able to pull data via an API, on the same timescales as currently available on the BMRS. The reason for this interim solution, which we expect to be in place until at least November 2020 is because P344 'Project TERRE implementation into GB market arrangements', P384 'The publication of European Electricity Balancing Guideline (EB GL) balancing data by BMRS' and CP1516 all require changes to BMRS for implementation in the November-December		

	2019 time period. The delivery of these changes over the same timeframe created constraints, that if not addressed would have
	impacted the delivery of P344.
History:	CP1516 was raised on 7 March 2019 after being presented to the
	Imbalance Settlement Group (ISG) for information as a verbal update
	on 19 February 2019 (ISG214).
	CP1516 was published for consultation on 17 May 2019, with responses due by 5pm Thursday 13 June.
	CP1516 was presented to the BSC Panel for decision on 11 July 2019. The Panel approved CP1516 for implementation on 30 November 2019.
	As the Panel are required to approve new Fuel Types, it was efficient for the Panel to also approve the changes to the BSC subsidiary documents at the same time, which are being amended via CP1516.

CP1520: Clarificati	ion to 'Change of Own	ership' process in	Update	
BSCP537				
Date Raised:	8 August 2019	Proposer:	ELEXON	
Target	18 December 2019	Current Status:	Assessment	
Implementation			Procedure	
Date:				
Latest Update:	The CP1520 Assessmen	nt Report was presented	to the ISG on 22	
	October and the PAB o	n 31 October 2019 who	approved the BSCP537	
	redlining and had no co	omments.		
Next Event:	The Assessment Repor	t will be presented to the	e SVG on 5 November	
	2019 for a decision.			
Issue:	The change of ownersh	The change of ownership process in BCSP537 is not fit for purpose;		
	_	leading to confusion around the requirements following a change of		
	•	ownership.		
Current Solution:	CP1520 proposes to introduce a new Change of Ownership letter			
	template into BSCP537	, which will be used for t	he Qualified Person to	
	confirm that it will continue to fulfil its obligations, despite the Change			
	of Ownership of the company.			
	In addition to the Change of Ownership letter, Qualified Persons (other			
	than Suppliers and VLP	s) will be required to pro	vide a separate	
	statement confirming	whether a Material Chan	ge has been made as	
	per BSCP537 section 2.6.1.			
	The solution to this CP will amend section 2.6 of BSCP537 to reflect the			
	revised process. This includes changing 'Applicant' to 'Qualified			
	person' and citing the Change of Ownership letter.			
	person and citing the	change of Ownership let	ю.	

	CP1520 also proposes to allow PAB to make a decision on whether the Qualified Person needs to: a) Re-Qualify; or b) Not Re-Qualify;
History:	CP1520 was raised on 8 August 2019 by ELEXON. CP1520 was presented to the ISG on 20 August 2019, PAB on the 29 August 2019 and SVG on 3 September 2019. All three committees noted that CP1520 had been raised and the proposed progression timetable. CP1520 was issued for industry consultation on 9 September 2019, with responses due by 4 October 2019.

CP1521 : BSCP70 Ar	: BSCP70 Amendments for IA and IEA		Update	
Date Raised:	27 August 2019	Proposer:	ELEXON	
Target	February 2020	Current Status:	Assessment	
Implementation			Procedure	
Date:				
Latest Update:	CP1521 was issued for November in CPC batch	industry consultation fro	m 14 October to 8	
Next Event:		t Report will be presente	od to the ISC for	
Next Event.	decision on 19 Novemb	•	ed to the iso for	
Issue:	BSCP70 currently omits	Interconnector Adminis	trator (IA) and	
	Interconnector Error Ad	dministrator (IEA) from b	eing required to	
	undergo CVA Qualification Testing. As there are four new			
	Interconnectors scheduled to go live over the next four years (with a			
	further seven planned) there is a potential risk to Settlement if the IAs			
	and IEAs for the new Interconnectors have not demonstrated that they			
	are able to send and receive the relevant Settlement data flows			
	to/from BSC Central Systems.			
Current Solution:	BSCP70 is amended to include IA and IEA in the data flows relevant to			
	IEAs and IAs for CVA Qualification Testing.			
History:	CP1521 was raised by ELEXON on 27 August 2019.			
	The CP Progression Paper was presented to the SVG on 3 September			
	2019 for information.			
	The CP Progression Paper was presented to the ISG on 17 September			
	2019 who had no further comments.			

CP1522: Updates to	BSCP520 to align wit	th working	Update
practices and UMSUG recommendations			
Date Raised:	31 October 2019	Proposer:	ELEXON
Target	25 June 2020	Current Status:	Assessment

issue.	The Unmetered Supplies User Group (UMSUG) has identified a number of issues with BSC Procedure (BSCP) 520 'Unmetered Supplies		
	Registered in SMRS', that if addressed would remove redundant		
	obligations; along with clarifying and updating the BSC's Unmetered		
	Supplies arrangements.		
Current Solution:	The following are a summary of the changes proposed to BSCP520.		
	1) Reactive power calcu		
	Remove the requirements upon the Meter Administrator to calculate reactive power.		
	2) Changes for LDSO/UMSO role split:		
	Amend to clarify where the UMSO is acting on behalf of the LDSO		
	Amend to add LDSOs as a user of BSCP520 and a split of		
	responsibilities between the LDSO and the UMSO.		
	3) Reflect the June 2019 updates to the MRA:		
	Update BSCP520 to reflect the changes to the MRA Agreed		
	Procedure for Managing NHH Related Metering Points.		
History:	CP1522 was raised by E	LEXON on 31 October 20	19.

Issue Updates

<u>Issue 69:</u> Performar	nce Assurance Frame	Update	
Date Raised:	30 March 2017	ELEXON	
Latest Update:	We propose holding a further Issue 69 Working Group in January 2020 with a view to further refining the ideas towards a set of recommendations for the PAB.		
Next Event:		Vorkshop to review the Fovember 2019.	Peer Comparison
Issue:	technique on the 14 November 2019. ELEXON and the Performance Assurance Board (PAB) are aware of opportunities to further enhance the application of the risk-based Performance Assurance Framework (PAF) envisaged in P207 'Introduction of a new governance regime to allow a risk based Performance Assurance Framework (PAF)' to utilise and reinforce its effectiveness to address the challenges of a changing industry. This Issue Group will explore the issues and identify possible solutions for each work stream: Smart Metering, PAF procedures, data provision and Performance Assurance Techniques.		
History:	The first work stream was Smart Metering, with two meetings held on 25 April 2017 and 24 May 2017 respectively. The interim Issue Report for Smart Metering was presented to the PAB in June 2017, and tabled at the BSC Panel in July 2017. ELEXON took a paper to the November 2017 PAB meeting that provided recommendations on mitigating the key smart risk areas identified. A high-risk area was identified in relation to the Supplier-Agent interface and as a result CP1500 'Amend the BSCP537 Appendices to add a requirement for Suppliers and MOAs to demonstrate the ability to send and receive Smart Meter Configuration details' was raised, seeking to include the D0367 data flow in the Qualification process.		
	The second work stream is on PAF procedures. This work stream will focus on a new design for the PAF, covering what is currently the Risk Evaluation Methodology (REM), Risk Evaluation Register (RER), Risk Operating Plan (ROP) and the reporting. The first Workgroup on PAF procedures was held on 17 January 2018. In the meeting, ELEXON presented a proposed design to the group for review and comment. The second meeting was held on 10 April 2018 to align with work we are doing for the Performance Assurance Framework review. Additionally, ELEXON presented a related draft Modification Proposal ('Amendments to Section Z to better facilitate the production of the Risk Evaluation Methodology, Risk Evaluation		

Register and Risk Operating Plan') and associated draft redlined Legal text to the Workgroup in order to gain their endorsement toward its principles.

The third meeting for this work stream was held on 12 June 2018 where the Workgroup discussed a newly drafted version of the RER. At this meeting, as the Workgroup consisted of SVA experts only, they could not provide feedback on the CVA risks listed within the RER. Therefore, a dedicated session for CVA experts to provide feedback on the RER was held on 25 July 2018. The fourth and final meeting for the PAF Procedures Work Stream will be held on 15 August 2018. At this meeting the ELEXON will present the final design of the PAF along with its component parts.

Modification P368 'Amendments to Section Z to better facilitate the production of the Risk Evaluation Methodology, Risk Evaluation Register and Risk Operating Plan' was approved by the BSC Panel at its meeting on 12 July 2018 and will be implemented in the November 2018 BSC Release. This Modification arose from work completed by the Issue 69 group relating to PAF procedures.

The last Issue Group for the PAF Procedures work stream was held on 15 August 2018, with subsequent teleconference meetings held on 30 and 31 August 2018. During these sessions, ELEXON presented the final design of the PAF along with its component parts, on which the Issue Group members provided guidance and comment.

The third work stream, the Review of the PATs, aimed to catalogue the current performance assurance techniques (PATs), identify limitations or areas for improvement (based on stakeholder feedback and further discussion with technique owners), and integrate those improvements into a set of new PATs.

The first working group for this work stream took place on 30 November 2018. The working group discussed the key ideas for change to the audit techniques, and identified some additional potential improvements

The final work stream aims to identify and test alternative methods of data provision that will place less burden on participants to provide data, and will help support more accurate risk appraisal.

The first working group for this work stream took place on 3 October 2018, with subsequent working groups scheduled for roughly every quarter.

ELEXON presented the latest version of the Risk Register to the Performance Assurance Board (PAB) at its meeting on 29 November 2018, requesting that the document be approved for public consultation. The PAB commented positively on the revisions made to the Register, including the introduction of a materiality (£) figure associated with each risk to measure its impact, and noted that the reduction in the number of distinct risks, whilst maintaining total coverage of all potential risk events, made the Register more accessible and easier to navigate. The first Issue 69 working group for the Performance Assurance Techniques work stream was held on 30 November 2018. Summary notes from the Workgroups were sent to members. Following the consultation period ending 21 December 2018, the PAB approved the new Risk Register on 31 January 2019.

The Performance Assurance Board (PAB) suggested engagement with the Issue 69 workgroup (in particular Suppliers) on Supplier Charges review.

The dates for workstreams on Supplier Charges review and BSC Audits as part of Issue 69 have been confirmed. Engagement with Issue 69 stakeholders for both the Performance Assurance Techniques Review and Data Provision workstreams is expected in spring 2019.

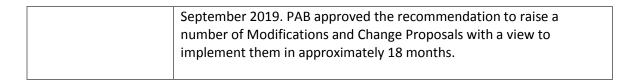

The workstreams for the Supplier Charges review and the BSC Audit was held on Tuesday 14 May and Wednesday 15 May 2019 respectively.

Issue 69 will now be focussing on Qualification and Re-Qualification well as Supplier Charges.

The Issue 69 Qualification and Re-Qualification Workshop was held on Tuesday 2 July 2019. Following this Workshop a paper was presented to PAB providing an update on the review of the Qualification and re-Qualification Performance Assurance Technique. The PAB noted the updates and agreed to a sub-group to discuss options to include in the final Qualification and Re-Qualification PAF Review recommendations report. Following the meeting of the sub group the PAF team presented their recommendation at September PAB meeting on 26 September 2019.

The main review of the Supplier Charges technique has commenced. At the Issue 69 Working Group meeting on 19 September 2019 we reviewed our initial ideas for change.

The Issue 69 Working Group met on 19 September 2019 to review our initial ideas for change. The recommendation of the Qualification workshop was presented to PAB (224/06) at its meeting on the 26

Issue 73: Review of fault management and resolution No Update					
timescales					
Date Raised:	12 October 2018. Proposer: SSE Ltd				
Latest Update:	Group to reach consens recommended in the Is CPs be raised to progre Service Level Agreemer rectification process.	ELEXON held a teleconference on 27 September 2019 for the Issue Group to reach consensus and vote on the solutions that will be recommended in the Issue Report. The Issue Group recommends three CPs be raised to progress changes to the communication process, Service Level Agreements, and LDSO involvement on the fault			
Next Event:	The Issue Report will be	e tabled for the Panel on	14 November 2019.		
Issue:	where a MOA is not best Transformers owned by (LDSO). This results in the to resolve the fault in a BSC. The notification pr	Several issues have been identified in the fault resolution process where a MOA is not best placed to rectify faults on Measurement Transformers owned by the Licensed Distribution System Operator (LDSO). This results in the Meter Operator Agent (MOA) being unable to resolve the fault in a timely manner to remain complaint with the BSC. The notification process used in the faults process should also be amended to reflect the recommendations of the Fault Investigation			
History:	Issue 73 was raised by SSE on 12 October 2018. The first Workgroup was held on 22 November 2018 where amendments were proposed to the FIRG process. The second Workgroup was held on 7 February 2019 to agree the CP that would carry forward FIRG recommendations, discuss potential SLAs and begin defining LDSO process.				
	ELEXON has used data from Workgroup members to help define service level agreements for resolving faults and draft redlining to carry forward proposed changes .				
	The third Workgroup for Issue 73 was held on 13 June 2019, for the Workgroup to consider the proposed SLAs and process for involving Distributors in the fault resolution process.				
	ELEXON adapted the draft redlining for the proposed Change Proposals to take account of comments made by the Issue 73 Workgroup.				
		pdate to the Issue Resol which it will determine v red.			

issue oo. Increase	e in minimum data st	torage requirements	Update	
within the relevant Metering CoPs				
Date Raised:	16 April 2019 Proposer: Association of Operators (AM			
Latest Update:	The Issue 80 report v	was submitted to the Octo	ber BSC Panel meeting.	
Next Event:	80. In the event that	The Workgroup are seeking a Party to raise two CPs as a result of Issue 80. In the event that a BSC Party does not volunteer ELEXON will raise the CPs on behalf of the Issue 80 Workgroup.		
Issue:		•	·	
History:	The minimum data storage requirements within the Half Hourly Metering Codes of Practice (CoPs) are regarded as very low and should be increased. Issue 80 was raised by AMO on 16 April 2019. The first Issue 80 meeting date was scheduled for 24 June 2019. A Request for Information inviting Meter Manufacturer, Party Agents, Parties and other interested parties views of the proposed change was issued prior to the meeting for group's consideration. The first Issue 80 Workgroup was held on 24 June 2019. The Workgroup discussed the issue and reviewed the RFI responses. The Workgroup agree there is a need to increase meter memory and a Change Proposal should be raised. Before raising the change ELEXON will further engage with meter manufactures to determine the impact of increasing meter memory. Given the Issue 80 Workgroup recommendation, ELEXON with Meter Manufacturers to determine the impact of increasing meter memory. Meter Manufacturer feedback and discussed with the Workgroup before finalising the Issue 80 Report. An Issue 80 meeting was held on 19 September 2019. The Workgroup discussed Meter manufacturer feedback and clarified the proposed Change Proposals to be raised as an outcome of Issue 80. The Workgroup are seeking a Party to raise two CPs. In the event that		acturer, Party Agents, are proposed change was ration. Ine 2019. The he RFI responses. The acter memory and a right he change ELEXON of determine the impact of the Workgroup arified the proposed of Issue 80.	

Issue 81: Determining the benefits of Run-up/Run-down rates and Last Time to Cancel Synchronisation (LTCS)			Update			
publication on BN	1RS					
Date Raised:	12 June 2019	Proposer:	National Grid ESO			
Latest Update:	Issue 81 is now quorate	Issue 81 is now quorate at five Members.				
Next Event:	The First Issue 81 meet	The First Issue 81 meeting will be on Monday 4 November 2019.				
Issue:	Analysis on P297. NGES opportunity to identify items originally in P297 of Run-up/Run-down ra	In the National Grid Electricity System Operator (NGESO) Cost Benefit Analysis on P297. NGESO received feedback that there may be an opportunity to identify consumer benefits, by exploring how the data items originally in P297 might be assessed to support the development of Run-up/Run-down rates and Last Time to Cancel Synchronisation (LTCS) publication on BMRS, and how these can fit in with the BSC and Grid Code.				
History:	Issue 81 was raised by	National Grid ESO on	12 June 2019.			

Issue 82: Expand	the BSC Panel's ability	to raise	Update		
Modification Pro	posals				
Date Raised:	19 June 2019	Proposer:	ELEXON		
Latest Update:	The Issue 82 Final Rep	ort was submitted to the	October 2019 BSC		
	Panel meeting.				
Next Event:	The BSC Panel noted t	hat the conclusions of th	e Workgroup were		
	broadly in line with the	e feeling the Panel has h	eld for some		
	considerable time. Wh	ere the Panel does not r	aise a Modification it		
	can be raised by a BSC	Party or a non-BSC Party	y through the		
	designation process.				
Issue:	Currently BSC Section	F2.1.1 restricts the BSC F	Panel's ability to raise		
	Modification Proposals	s. Issue 82 seeks to expa	nd the Panel's ability to		
	raise Modification Pro	posals. ELEXON believes	that expanding the		
	Panel's ability to raise	Modification Proposals v	would:		
	Increase the e	ffectiveness of the Panel	, and thereby the BSC;		
	Reduce the burden on BSC Parties to be Proposers;				
	Promote impr	ovements in the BSC's se	elf-governance		
	arrangements	; and			

	Help maintain consistency with the Panel's objectives as set out in the BSC.
History:	Issue 82 was raised by ELEXON on 19 June 2019. The Issue 82 meeting was held on 20 August 2019. The Workgroup considered whether the BSC Panel's ability to raise Modifications should be expanded. The Workgroup recommended that no Modification be raised to expand the BSC Panel's ability to raise Modifications.

Issue 83: Ensuring	that the Buy Pri	ce Adjustment reflects all	No Update
additional balancii	ng costs incurred	by NGESO	
Date Raised:	1 July 2019	Proposer:	Sebmcorp UK
Latest Update:		ting for Issue 83 was held on 1	
		further considered what comp	•
		could continue to be reflected	, -
Next Event:	NGESO agreed to	o look into some analysis into l	now the inclusion and
	distribution of co	osts incurred by NGESO would	affect the value of the
	BPA, and consec	quently the Imbalance Price.	
Issue:	The Issue will co	nsider the principles set out in	Article 52(2) of the
	Commission Reg	gulation (EU) 2017/2195 of 23 I	November 2017,
	establishing a gu	ıideline on electricity balancin្	to assess how the
	components of t	the Buy Price Price Adjustment	can continue to be used
	in the Imbalance	Price calculation. This will aim	to ensure that it
	continues to be	reflective of the actions taken	by National Grid
	Electricity Syster	n Operator.	
	In addition to th	is, Issue 83 will consider what	components are
	included in the E	Buy Price Price Adjustment, inc	luding reserve actions,
	to ensure that it	continues to be properly refle	ctive.
History:	Issue 83 was rais	sed by Sebmcorp UK on 1 July 2	2019.
	The first Workgr	oup was held on 7 August 201	9, where it discussed the
	components tha	t are incorporated in the Buy F	rice Price Adjustment
	and how these o	could continue to be reflected i	n the Imbalance Price.

Issue 85: Removal o	of obligation to visit d	e-energised sites	Update					
once every 12 months from BSCP504								
Date Raised:	27 August 2019	27 August 2019 Proposer: TMA						
Latest Update:	2019. The Issue group h	group was held on Wedn nave decided to look furt	her into Option A-					
	-	n on NHHDCs to visit de- oligation to visit de-ener	- · · · · · · · · · · · · · · · · · · ·					
Next Event:	ELEXON are carrying out further analysis to present a solution and proposed redlining to the next Issue 85 meeting, this will likely be early December 2019.							
Issue:	There is an obligation on the NHHDC to visit de-energised sites annually (footnote 99 from BSCP404). Originally, the obligation only applied to sites where no remote communication was available. That was removed by CP1019 in 2005. The Obligation for regular site visits was removed from the Supplier Licence obligations in 2016 by the Authority as other obligations, such as LC 21b.4 would prompt the Supplier to use a risk based approach to ensure that sites are visited regularly enough to avoid health and safety issues. This leaves the NHHDC agents exposed; unless they are instructed by the Supplier to							
History:		ally, they are in breach o 「MA on 27 August 2019.
