

# SVG235/01 – MDD CHANGE REQUESTS FOR VERSION 302/303

**MEETING NAME** Supplier Volume Allocation Group

**Date of meeting** 1 September 2020

**Paper number** 235/01

**Owner/author** Freya Gardner

**Purpose of paper** Decision

**Classification** Public

**Summary** This paper invites the Supplier Volume Allocation Group (SVG) to approve 11 General Change Requests, and note eight Fast Track Change Requests, for implementation in Version 302 of Market Domain Data (MDD) with a go-live date of 16 September 2020. It also invites the SVG to approve four General Change Requests that have been submitted to support the implementation of [Ofgem's Targeted Charging Review \(TCR\) Significant Code Review \(SCR\)](#), for implementation in Version 303 of MDD with a go-live date of 21 October 2020.

## 1. Introduction

1.1. Updates to Market Domain Data (MDD) are made through monthly releases. ELEXON progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

### General Change Request process

1.2. BSCP509 requires that General MDD Change Requests undergo validation by ELEXON, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

### Fast Track Change Request process

1.3. BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, undergoing ELEXON validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.

1.4. New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, ELEXON will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

4.3 ELEXON has validated the D0265 file and Request Templates to ensure that the structure of the files and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted files have passed validation.

## 5. Additional MDD Version 301

5.1 The SVG approved MDD Version 300 at its meeting on 4 August 2020, which was published on 12 August 2020 with a go-live date of 19 August 2020. This version contained an error due to the omission of the expected Technical Product Deliverables (TPDs). Full details were communicated to Participants in MDD Circular [MDD00709](#).

5.2 To resolve this, an additional MDD Version (V301) was published on 19 August 2020 with a go-live date of 26 August 2020. This Version included the Technical Product Deliverables (TPDs) for Change Request M3594 that was originally omitted. Therefore this month's regular MDD release has been incremented to Version 302. An updated [MDD Release schedule](#) was also published.
