## OPEN SESSION – INFORMATION PAPERS

### 10. Options for evolving the assessment of requests to consider supply as exempt for EMR purposes and potential enduring solutions (242/03)

10.1 Elexon has seen an increase in enquires from organisations wishing to submit an application to the SVG in order to have supply considered as exempt for EMR purposes. These requests are currently facilitated by Elexon and brought to the SVG for decision in an unspecified format. This paper considered whether to evolve the current Interim Process and also examines potential enduring solutions.

The SVG:

- a) **AGREED** that Elexon should develop a more formal structured process for applications to the interim process (section 5.3);
- b) **REJECTED** that the guidance on the process should explain the possible use of Shared SVA Meter Arrangements (Option 1);
- c) **REJECTED** that Elexon should recommend to the BSC Panel that they raise a Modification Proposal to implement Options 2A and 2B;
- d) **NOTED** that Option 3 would provide Suppliers with more choice on who performs ex post matching of Import and Export, and could be raised by any BSC Party as a Modification Proposal;
- e) **AGREED** that if an application is made by an organisation and the customer changes Supplier, the application should continue to be 'active' (section 7.3);
- f) **AGREED** that the development of the Interim Process should include the establishment of rules to underpin the maintenance and duration of any application that is approved (section 7.5); and
- g) **AGREED** that an Issue should be raised to explore the process and proposed Options further.
