

## Approval of Configurable Item changes for the November 2023 BSC Release

Date	13 July 2023	Paper number	340/05
Owner/author	Ivar Macsween	Purpose of paper	Decision
Classification	Public	Document version	1.0
Summary	This paper invites the BSC Panel to approve the changes to BSC Configurable Items as part of the November 2023 Release.		

### 1. What is the purpose of this paper?

- 1.1 This paper invites the BSC Panel to approve the changes to the BSC Configurable Items (CIs) for one Approved Modification as part of the November 2023 BSC Release:
  - [P395<sup>1</sup>](#) 'Aligning BSC Reporting with EMR Regulations – an enduring solution'.
- 1.2 Ofgem approved P395 on 6 October 2022 for implementation on 2 November 2023. P395 proposes to amend BSC systems and processes so that the SAA-I042 'BM Unit Gross Demand Report' only includes electricity 'supplied' to premises by licensed Suppliers, and therefore excludes electricity imported by Generators operated by a licensee for generation activities (i.e. those activities authorised by their generation licence to carry on).
- 1.3 The draft redlining for the changes to the CIs are included in Attachment A of this paper.

### 2. Industry Review

- 2.1 We published the changes to the CIs for P395 for industry review between 13 June 2023 and 27 June 2023 (10 Working Days). We received no responses relating to the documents from the industry review.
- 2.2 However, we have amended the IDD Part 1 and IDD Part 2 spreadsheets and the IDD Part 1 document to reflect changes to Data Item names and Group Names in the new SAA-I058 Report and to reflect the revised name of the SAA-I042 report.
- 2.3 The versions of the CIs amended for P395 are now presented to the BSC Panel for approval.

### 3. Configurable Items for approval

- 3.1 Details of the changes for P395 and P395 can be found in attachments A to this paper.
- 3.2 We are presenting these to the Panel for approval for efficiency, rather than having to get approval from three different Committees. We have spoken to the Committees about these changes and they had no comments (as at the time of writing this paper and will provide any relevant verbal updates at the Panel meeting).
- 3.3 Table 1 lists the documents amended by P395 that Elexon seeks approval from.

Impact	Category
<ul style="list-style-type: none"><li>• BSCP01 - Overview of Trading Arrangements</li><li>• BSCP507 - Supplier Volume Allocation Standing Data Changes</li><li>• BSCP508 - Supplier Volume Allocation Agent</li></ul>	1

<sup>1</sup> <https://www.elexon.co.uk/mod-proposal/p395/>

Impact	Category
<ul style="list-style-type: none"> <li>• BSCP537- Qualification Process for SVA Parties, SVA Party Agents and CVA MOAs</li> <li>• BSCP602 - SVA Metering System and Asset Metering System Register</li> <li>• BSCP603 - Meter Operations and Data Collection for Asset Metering Systems</li> <li>• Self Assessment Document</li> <li>• NETA IDD Document Part 1</li> <li>• NETA IDD Document Part 2</li> <li>• NETA IDD Spreadsheet Part 1</li> <li>• NETA IDD Spreadsheet Part 2</li> <li>• SVA Data Catalogue Part 1</li> <li>• SVA Data Catalogue Part 2</li> </ul>	

#### 4. Next Steps

- 4.1 If so approved by the BSC Panel, we will consolidate the changes to the CIs for P395 into a single 'November 2023' version (as some of the CIs are also impacted by other BSC Changes being implemented in the November 2023 Release) and will publish it on the November 2023 page of the Elexon website.
- 4.2 We are currently drafting the changes to the remaining<sup>2</sup> P395 CIs and will issue these for industry comment prior to seeking approval for these changes from the relevant Panel Committees before the November 2023 Release.

#### 5. Recommendations

- 5.1 We invite the Panel to:
  - a) **APPROVE** the changes to the BSC CIs for P395 for implementation in the November 2023 BSC Release.
