

4.3 CP Form

Change Proposal – BSCP40/02	CP No: 1509 <i>Version No: 1.0</i> <i>(mandatory by BSCCo)</i>
Title (mandatory by originator) Amend BSCP503 to add new recipients of the D0355 data flow.	
Description of Problem/Issue (mandatory by originator) On 1 November 2018, Data Transfer Catalogue (DTC) Change Proposal (CP) CP3526 will add two new recipients of the D0355 data flow. As BSCP503 specifies the process for HHDA's sending the D0355 data flow, it should be updated to reflect the revised use of the D0355.	
Background: The D0355 Data Flow is currently used by Half Hourly Data Aggregators (HHDA) to confirm to the Supplier that the HHDA had received the D0354 (used by Suppliers as notification to HHDA of Metering Systems to be reported in relation to EMR) and to confirm that they would send the D0357 on a daily basis to the Supplier. The Supplier then forwards the D0357 to Electricity Market Reform Settlement Limited (EMRS) via email. In December 2017, EMRS raised a Data Transfer Catalogue (DTC) Change Proposal (CP) CP3526 that sought to add the Contracts for Difference (CfD) Service Provider as a recipient of the D0355 'EMR Reporting Confirmation' data flow. When the MRA Development Board (MDB) considered DTC CP3526, they returned a decision of "Approved Modified" for implementation on 01 November 2018 ¹ . The "Modified" solution was that the Capacity Management Service Provider should also be added as a recipient of the D0355 data flow. As a result, approved DTC CP 3526 will add two new recipients of the D0355 data flow: <ul style="list-style-type: none"> • the CfD Service Provider; and • the CM Service Provider. Section 3.6.4 of Balancing and Settlement Code Procedure 503 (BSCP503) 'Half Hourly Data Aggregation for SVA Metering Systems Registered in SMRS' refers to the use of the D0355, so BSCP503 needs to be updated to add these new recipients in order to ensure that Balancing and Settlement Code (BSC) documentation and BSC-owned DTC data flows are fully aligned and that there is a requirement for the relevant HHDA's to send the D0355 data flow to the two new recipients of the D0355. The DTC change facilitates the issue of the D0355 to the new recipients, but does not mandate it.	

¹ DTC CP3526 and the related change report give 2 November 2018 as the implementation date, but the DTC release will be on 1 November 2018.

In addition, the terms ‘EMR Settlement Service Provider’ and ‘EMRSSP’ are currently used in BSCP503 to represent both the CfD Service Provider and the CM Service Provider. Although both services are currently provided by a single Service Provider (ELEXON), in future it is possible that the services could be provided by different Service Providers, so these services should be clearly defined throughout BSCP503.

Proposed Solution (mandatory by originator)

CP1509 will amend BSCP503 to add ‘CfD Service Provider’ and ‘CM Service Provider’ as recipients of the D0355 data flow in section 3.6.4 of BSCP503 in order to ensure that HHDAAs are required to send the D0355 data flow to these new recipients.

As the CfD Service Provider and the CM Service Provider will receive the D0355 directly from the HHDA, we propose that section 3.6.5 of BSCP503 be removed, as the Supplier will not need to forward the D0355 to them.

We also propose to replace the terms ‘EMR Settlement Service Provider’ or ‘EMRSSP’ with ‘CfD Service Provider’ and ‘CM Service Provider’ throughout BSCP503, to recognise that the EMR Settlement Service is comprised of two distinct services and provide contingency for possible future developments.

Justification for Change (mandatory by originator)

This change is required to ensure that BSCP503 includes the ‘CfD Service Provider’ and ‘CM Service Provider’ as recipients of the D0355 data flow and so ensure BSC documentation and BSC-owned DTC data flows are fully aligned for the November 2018 release on 1 November 2018.

To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? (mandatory by originator)

[BSC Section J ‘Party Agents and Qualification Under the Code’](#)

Estimated Implementation Costs (mandatory by BSCCo)

£240 (one ELEXON Working Day) to implement the necessary BSCP503 changes.

Configurable Items Affected by Proposed Solution(s) (mandatory by originator)

BSCP503 ‘Half Hourly Data Aggregation for SVA Metering Systems Registered in SMRS’

Impact on Core Industry Documents or System Operator-Transmission Owner Code (mandatory by originator)

This change is to ensure BSCP503 is aligned with the industry baseline, as amended by a DTC CP, other industry codes will not be impacted.

Related Changes and/or Projects (mandatory by BSCCo)

N/A.

Requested Implementation Date (mandatory by originator)

1 November 2018 as part of ELEXON's November 2018 Release.

Reason:

This is the next available BSC Release that can include this CP.
