## 1. Introduction

- 1.1. Updates to Market Domain Data (MDD) are made through monthly releases. ELEXON progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

### General Change Request process

- 1.2. BSCP509 requires that General MDD Change Requests undergo validation by ELEXON, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before we present them to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before coming to the SVG. We collate all comments received through the impact assessment and include them in this paper to assist the SVG in making a decision on each change.

### Fast Track Change Request process

- 1.3. BSCP509 contains a Fast Track process for housekeeping changes and new participant registrations. These still undergo ELEXON validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means that they can be submitted later in the monthly process than General Change Requests, and that we present them to the SVG for information rather than approval.
- 1.4. New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit their Fast Track Change Request before the PAB meeting for the next MDD version to go live after the PAB's decision. Should the PAB not approve the Qualification application, ELEXON will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

## 2. This month's changes

- 2.1 This paper includes seven General MDD changes and 13 Fast Track MDD changes to be incorporated into MDD 280 with a go-live date of 20 March 2019.

## 3. Line Loss Factor validations

- 3.1 There are three Change Requests for MDD 280, which request the opening of new LLF Classes (LLFCs) to be effective from 20 March 2019. The relevant LDSOs have submitted their D0265 files ('Line Loss Factor Data Files') for their Mid-Year Submissions. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3279	SPOW	16	B, D
M3280	SOUT	1	A
M3281	VATT	64	A, C

A General LLFC for Import Active Energy   B MS Specific LLFC for Import Active Energy   C General LLFC for Export Active Energy  
D MS Specific LLFC for Export Active Energy

- 3.2 ELEXON has validated the D0265 files to ensure that the structure of the files and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted D0265 files have passed validation.

## 4. Recommendations

- 4.1 ELEXON invites the SVG to:
- APPROVE** the seven General Change Requests for implementation in MDD 280 with a go-live date of 20 March 2019;
  - NOTE** the 13 Fast Track Change Requests for implementation in MDD 280 with a go-live date of 20 March 2019; and
  - APPROVE** the proposed LLFCs for three LDSOs for use in Settlement from 20 March 2019.
