Classification	Public
-----------------------	--------

Summary	This paper invites the Supplier Volume Allocation Group (SVG) to approve two General Change Requests, and note nine Fast Track Change Requests, for implementation in Version 289 of Market Domain Data (MDD) with a go-live date of 23 October 2019.
----------------	---

1. Introduction

- 1.1. Updates to Market Domain Data (MDD) are made through monthly releases. ELEXON progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

- 1.2. BSCP509 requires that General MDD Change Requests undergo validation by ELEXON and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

- 1.3. BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations undergoing ELEXON validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.
- 1.4. New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, ELEXON will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. This month's changes

- 2.1 This paper includes two General MDD changes and nine Fast Track MDD changes to be incorporated into MDD version 289 with a go-live date of 23 October 2019.

3. Line Loss Factor validations

- 3.1 There is one Change Request for MDD 289, which requests the opening of new LLF Classes (LLFCs) to be effective from 27 February 2020. The relevant LDSOs have submitted their D0265 files ('Line Loss Factor Data Files') for their Mid-Year Submissions. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3414	SWEB	8	A

4. Extra MDD Version 288

- 4.1 The SVG approved MDD Version 287 at its meeting on 3 September 2019, which was published on 11 September 2019 with a go-live date of 18 September 2019. This version contained an error due to the omission of an Average Fraction of Yearly Consumption (AFYC) Set, three AFYC values and a GSP Group Daily Profile Class Average EAC. Full details were communicated to Participants in MDD Circular [MDD00677](#).
- 4.2 To resolve this, an additional MDD Version (V288) was published on 19 September 2019 with a go-live date of 25 September 2019. This Version included the additional data for Change Request M3399 that was originally omitted. Therefore, this month's regular MDD release has been incremented to Version 289. An updated [MDD Release schedule](#) was also published.
