Summary	This paper invites the Supplier Volume Allocation Group (SVG) to approve two General Change Requests, and note 13 Fast Track Change Requests, for implementation in Version 291 of Market Domain Data (MDD) with a go-live date of 18 December 2019.
----------------	--

1. Introduction

- 1.1. Updates to Market Domain Data (MDD) are made through monthly releases. ELEXON progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

- 1.2. BSCP509 requires that General MDD Change Requests undergo validation by ELEXON, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

- 1.3. BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, undergoing ELEXON validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.
- 1.4. New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, ELEXON will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. This month's changes

- 2.1 This paper includes two General MDD changes and 13 Fast Track MDD changes to be incorporated into MDD version 291 with a go-live date of 18 December 2019. Change Request M3444, which was noted in the Market Participant impact assessment Circular, was withdrawn by the Raising Party from MDD version 291.

General Change Requests

2.2 The table below provides an overview of this month's General Change Requests.

CR no.	MPID	Role Code	Details of Change Request	MP IA response
M3443	SOUT	R	Creation of new LLFCs and HH Combinations <i>Effective From Date: 18/12/2019</i>	N
M3445	ELEXON	-	Inclusion of Charge Codes and Switch Regimes <i>Effective From Date: 18/12/2019</i>	N

Role Code: R – Distributor

MP IA Response:

N = No Market Participant comments have been made regarding the change

Market Participant Impact Assessment comments on General Change Requests

2.3 During the impact assessment, a Market Participant raised a comment on Change Request M3443. The Market Participant noted the combination of generic Line Loss Factor Classes (LLFCs) with a site specific defined Meter Timeswitch Class (MTC). The Market Participant asked ELEXON to consider the impact of this. ELEXON confirmed that there are currently other instances where site specific MTCs are combined with generic LLFCs in MDD and noted that Appendix 2 to BSCP509 states that the LLFC can have any MS Specific Type Indicator. The Market Participant gave no further response.

3. Line Loss Factor validations

- 3.1 There is one Change Request for MDD 291, which requests the opening of new LLF Classes (LLFCs) to be effective from 18 December 2019. The relevant LDSOs have submitted their D0265 files ('Line Loss Factor Data Files') for their Mid-Year Submissions. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3443	SOUT	2	A, C

A General LLFC for Import Active Energy C General LLFC for Import Active Energy

- 3.2 ELEXON has validated the D0265 files to ensure that the structure of the files and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted D0265 files have passed validation.

4. Recommendations

- 4.1 ELEXON invites the SVG to:
- APPROVE** the two General Change Requests for implementation in MDD 291 with a go-live date of 18 December 2019; and
 - NOTE** the 13 Fast Track Change Requests for implementation in MDD 291 with a go-live date of 18 December 2019.
