Classification	Public
-----------------------	--------

Summary	This paper invites the Supplier Volume Allocation Group (SVG) to approve four General Change Requests, and note eight Fast Track Change Requests, for implementation in Version 296 of Market Domain Data (MDD) with a go-live date of 22 April 2020.
----------------	---

1. Introduction

- 1.1. Updates to Market Domain Data (MDD) are made through monthly releases. ELEXON progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

- 1.2. BSCP509 requires that General MDD Change Requests undergo validation by ELEXON, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

- 1.3. BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, undergoing ELEXON validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.
- 1.4. New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, ELEXON will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. This month's changes

- 2.1 This paper includes four General MDD changes and eight Fast Track MDD changes to be incorporated into MDD version 296 with a go-live date of 22 April 2020.

3. Line Loss Factor validations

- 3.1 There is one Change Request for MDD 296 which requests the opening of new LLF Classes (LLFCs) to be effective from 22 April 2020. The relevant DSO has submitted their Request Template for their Mid-Year Submission. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3537	UDNL	220	C

C General LLFC for Import Active Energy

- 3.2 ELEXON has validated the Request Template to ensure that the structure of the file and the submitted LLF values comply with the audit scope of Section 3.5 of BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'. The submitted files have passed validation.

4. Extra MDD Version 295

- 4.1 The SVG approved MDD Version 294 at its meeting on 03 March 2020, which was published on 12 March 2020 with a go-live date of 18 March 2020. This version contained an error due to the omission of the expected Technical Product Deliverables (TPDs) and the SVAA Calendar. Full details were communicated to Participants in MDD Circular [MDD00695](#).
- 4.2 To resolve this, an additional MDD Version (V295) was published on 18 March 2020 with a go-live date of 25 March 2020. This Version included the Technical Product Deliverables (TPDs) and the SVAA Calendar for Change Requests M3511 and M3512 that were originally omitted. Therefore this month's regular MDD release has been incremented to Version 296. An updated [MDD Release schedule](#) was also published.
