
MDD CHANGE REQUESTS FOR VERSION 304

Supplier Volume Allocation Group (SVG)

Date of meeting	03 November 2020	Paper number	237/01
Owner/author	Freya Gardner	Purpose of paper	Decision
Classification	Public	Document version	V1.0

Summary **This paper invites the SVG to approve eight General Change Requests, and note 15 Fast Track Change Requests, for implementation in Version 304 of Market Domain Data (MDD) with a go-live date of 18 November 2020.**

1. Introduction

1.1 Updates to MDD are made through monthly releases. Elexon progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

1.2 BSCP509 requires that General MDD Change Requests undergo validation by Elexon, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

1.3 BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, which require Elexon validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.

1.4 New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, Elexon will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. Changes for MDD Version 304

2.1 This paper includes eight General MDD changes and 15 Fast Track MDD changes to be incorporated into MDD version 304 with a go-live date of 18 November 2020.

3. Line Loss Factor validations

3.1 There are six Change Requests for MDD 304, which request the opening of new LLF Classes (LLFCs) to be effective from 18 November 2020 or 1 April 2021. The relevant DSOs have submitted their D0265 file ('Line Loss Factor Data Files') or Request Template for their Mid-Year or Annual Submissions. The DSOs have confirmed that these LLFCs are separate to those required for the Targeted Charging Review (TCR). The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3651	HYDE	3	A
M3654	PENL	7	C
M3655	SOUT (1)	5	A, C
M3656	SOUT (2)	14	B, D
M3657	UDNL	42	A
M3658	UKPD	79	A

A - General LLFC for Import Active Energy B - MS Specific LLFC for Import Active Energy C - General LLFC for Import Active Energy D - MS Specific LLFC for Export Active Energy

3.2 Elexon has validated the D0265 file and Request Templates to ensure that the structure of the files and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted files have passed validation.
