

MDD CHANGE REQUESTS FOR VERSION 308

Supplier Volume Allocation Group (SVG)

Date of meeting	2 March 2021	Paper number	241/01
Owner/author	Freya Gardner	Purpose of paper	Decision
Classification	Public	Document version	V1.0

Summary **This paper invites the SVG to approve 13 General Change Requests, and note 14 Fast Track Change Requests, for implementation in Version 308 of Market Domain Data (MDD) with a go-live date of 17 March 2021.**

1. Introduction

1.1 Updates to Market Domain Data (MDD) are made through monthly releases. Elexon progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

1.2 BSCP509 requires that General MDD Change Requests undergo validation by Elexon, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

1.3 BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, which require Elexon validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.

1.4 New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD Version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, Elexon will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. Changes for MDD Version 308

2.1 This paper includes 13 General MDD changes and 14 Fast Track MDD changes to be incorporated into MDD Version 308 with a go-live date of 17 March 2021.

MP IA responses

CR no.	MPID	MP IA response	Action taken by applicant
M3748	INDI	Whilst we are not rejecting this change we would query if this is incomplete or if the Distributor has indicated that further new export NHH combinations are to be raised. At present data only allows for Micro PV and Micro CHP installations to be used on premises where import MPAN is profile class 3, non-domestic. We would expect such installations to be more prevalent on residential premises, so data required for those SSCs that relate to a premise with an import MPAN of	The applicant confirmed they would look into submitting these combinations in a later MDD Version

		profile class 1 or 2. That would require NHH combinations in MDD using the following SSCs for this Distributor: 0482 Micro-PV Export Import PC 1 0483 Micro-PV Export Import PC 2 0490 Micro-CHP Export Import PC 1 0491 Micro-CHP Export Import PC 2'	
M3750	MPDL	'All combination data using SSC 0969, which has three TPRs, is with MTCs that are only valid for SSCs that have a single TPR. Therefore, this data will introduce inconsistencies into MDD and as such needs to be updated to use correct MTCs or removed and re-submitted for a later release when these inconsistencies are resolved.'	Invalid combinations removed from Entity Forms

3. Line Loss Factor validations

MDD Version 308

3.1 There are four Change Requests for MDD 308 which request the opening of new LLFCs to be effective from 1 April 2021. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3742	EELC	2	A
M3743	LOND	3	A
M3744	SEEB	3	A
M3747	HYDE	90	A

A - General LLFC for Import Active Energy

3.2 Elexon has validated the D0265 files to ensure that the structure of the files and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted files have passed validation.

4. Recommendations

4.1 We invite you to:

- APPROVE** 13 General Change Requests for implementation in MDD 308 with a go-live date of 17 March 2021;
- NOTE** 14 Fast Track Change Requests for implementation in MDD 308 with a go-live date of 17 March 2021; and
- NOTE** the Market Participant Impact Assessment comments for CR M3748 and M3750.
