

## MDD CHANGE REQUESTS FOR VERSION 310

### Supplier Volume Allocation Group (SVG)

Date of meeting	<b>6 April 2021</b>	Paper number	<b>242/01</b>
Owner/author	<b>Freya Gardner</b>	Purpose of paper	<b>Decision</b>
Classification	<b>Public</b>	Document version	<b>1.0</b>

**Summary**      **This paper invites the SVG to approve six General Change Requests, and note 18 Fast Track Change Requests, for implementation in Version 310 of Market Domain Data (MDD) with a go-live date of 21 April 2021.**

### 1. Introduction

1.1 Updates to Market Domain Data (MDD) are made through monthly releases. Elexon progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

#### General Change Request process

1.2 BSCP509 requires that General MDD Change Requests undergo validation by Elexon, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

#### Fast Track Change Request process

1.3 BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, which require Elexon validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.

1.4 New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD Version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, Elexon will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

### 3. Line Loss Factor validations

#### MDD Version 310

3.1 There is one Change Request for MDD 310 which requests the opening of new LLFCs to be effective from 21 April 2021. The following table provides further details.

CR no.	LDSO	No. of new LLFCs	MS Specific LLF Class Indicator(s)
M3772	NORW	5	A

A - General LLFC for Import Active Energy

3.2 Elxon has validated the D0265 file to ensure that the structure of the file and the submitted LLF values comply with the audit scope of Section 3.5 of [BSCP128 'Production, Submission, Audit and Approval of Line Loss Factors'](#). The submitted file has passed validation.

### 4. Additional MDD Version 309

4.1 At SVG meeting 240 on 2 March 2021, the SVG approved Change Request M3752 to implement the new Technical Product Deliverables (TPDs) in MDD Version 308. Due to an error in the loading process, MDD Version 308 published on 10 March 2021 did not include the expected TPDs as per Change Request M3752. Of the two TPD files in this Change Request, the Regression Equations Data was loaded successfully but the Default Period Profile Class Coefficient Data was omitted. Full details were communicated to Participants in MDD Circular [MDD00732](#).

4.2 To rectify this, an additional MDD Version (309) was published on 18 March 2021 with a Go-Live date of Wednesday 24 March 2021. This Version included the Default Period Profile Class Coefficient Data for Change Request M3594 that was originally omitted. Therefore, this month's regular MDD release has been incremented to Version 310. An updated MDD Release schedule was also published.

### 5. Recommendations
