

## Approval of P402 Configurable Item changes for the February 2022 BSC Release

Date	<b>28 September 2021</b>	Paper number	<b>SVG 248</b>
Owner/author	<b>Ivar Macsween</b>	Purpose of paper	<b>Decision</b>
Classification	<b>Public</b>	Document version	<b>1.0</b>
Summary	<b>This paper invites the SVG to approve the changes to BSC Configurable Items amended for P402 as part of the June 2022 BSC Release</b>		

### 1. Changes required for the June 2022 BSC Release

- 1.1 This paper invites the Supplier Volume Allocation Group (SVG) to approve changes to BSC Configurable Items (CIs) that have been amended for:
  - [P402 Enabling reform of residual network charging as directed by the Targeted Charging Review](#)
- 1.2 P402 will ensure data is provided to the National Electricity Transmission System Operator (NETSO) for setting and recovering Transmission Network Use of System (TNUoS) demand residual charges. This proposal supports the implementation of [Ofgem's Targeted Charging Review Significant Code Review Decision](#).
- 1.3 The Ofgem approved P402 solution (to be implemented on 24 February 2022 as part of the standard February 2022 BSC Release) sees Licensed Distribution System Operators (LDSOs) compiling this data, sending it directly to the NETSO and so not to relying on the Balancing and Settlement Code Company (BSCCo) or BSC Systems and Agents for these purposes. This would require LDSOs to provide Billing and Tariff Setting data, including Unmetered Supplies (UMS) data, to NETSO. Elexon will support LDSOs in the identification of Central Volume Allocation (CVA) Registrants.
- 1.4 The changes to [BSCP515 'Licensed Distribution'](#) set out the new processes by which LDSOs submit the Monthly TUoS Residual Charges Billing Report and Annual TUoS Residual Charges Tariff Setting Report under P402.
- 1.5 The [SVA Data Catalogue Volume 1 'Data Interfaces'](#) sets out all new and amended data flows for P402 and [SVA Data Catalogue Volume 2 'Data Items'](#) sets out all new data items used by the new and amended data flows.

### 2. Industry Review

- 2.1 We published the amended Configurable items on 10 September 2021 and invited industry to comment on the proposed drafting by 24 September 2021.
- 2.2 No comments were received from the industry review.

### 3. Configurable Items for approval

- 3.1 Details of the changes can be found in Attachment A of this paper.
- 3.2 Table 1 below lists the documents amended by P402 and that require approval:

BSC CI(s)
BSCP515 – ‘SVA Meter Operations for Metering Systems Registered in SMRS and Asset Metering Systems Registered with the SVAA’
SVA Data Catalogue Volume 1 – Data Interfaces Appendix A
SVA Data Catalogue Volume 1 – Data Interfaces Appendix B
SVA Data Catalogue Volume 2 – Data Items Appendix A
SVA Data Catalogue Volume 2 – Data Items Appendix B
SVA Data Catalogue Volume 2 – Data Items Appendix C

#### 4. Recommendations

4.1 We invite the SVG to:

- a) **APPROVE** the amendments to the documents listed in Table 1, as detailed in Attachments A-F, to be implemented on 24 February as part of the standard February 2022 BSC Release.

---

#### Attachments

Attachment A – Redlined changes to BSCP515

Attachment B – Redlined changes to SVA Data Catalogue Volume 1 – Data Interfaces Appendix A

Attachment C – Redlined changes to SVA Data Catalogue Volume 1 – Data Interfaces Appendix B

Attachment D – Redlined changes to SVA Data Catalogue Volume 2 – Data Items Appendix A

Attachment E – Redlined changes to SVA Data Catalogue Volume 2 – Data Items Appendix B

Attachment F – Redlined changes to SVA Data Catalogue Volume 2 – Data Items Appendix C
