3. CP1555 'Consumption data for Measurement Classes G and F'- (SVG252/04)

3.1 This document was the CP Assessment Report for CP1555. The SVG considered the proposed solution and the responses received to the CP Consultation before making a decision on whether to reject CP1555.

3.2 A SVG Member commeted that they reviewed the CP's consultation responses and could see that there was a lot of push back from LDSOs due to them requiring changes to their billing systems, but after reading through the CP there was nothing proposed that appeared to require billing system changes.

3.3 Elexon responded that when the CP was raised they also did not anticipate this impact, but that two of the data flows amended in the proposed solution are used in LDSO's billing systems. The data is imported directly to the billing system, which would have to be amended to filter out the data not required for billing at that point.

3.4 Elexon stated that they would be continuing to work internally to further consider the issue and determine how best to provide support.

The SVG:

a) **REJECTED** the proposed changes to BSCP502, the SVA Data Catalogue, and EMAR for CP1555;

b) **REJECTED** CP1555.
