

MDD CHANGE REQUESTS AND TECHNICAL PRODUCT DELIVERABLES FOR VERSION 326

Supplier Volume Allocation Group (SVG)

Date of meeting **3 August 2022**

Paper number **258/01**

Owner/author **Matt Cogram**

Purpose of paper **Decision**

Classification **Public**

Document version **V1.0**

Summary **This paper invites the SVG to approve five General Change Requests and note 14 Fast Track Change Requests, for implementation in Version 326 of Market Domain Data (MDD) with a go-live date of 17 August 2022. The SVG is also invited to approve the Technical Product Deliverables (TPDs) Autumn/Winter 2022/23 BSC Seasons.**

1. Introduction

- 1.1 Updates to Market Domain Data (MDD) are made through monthly releases. Elexon progresses MDD changes in accordance with [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#).

General Change Request process

- 1.2 BSCP509 requires that General MDD Change Requests undergo validation by Elexon, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision. Unmetered Supplies (UMS) Charge Codes are initially reviewed by the UMS User Group (UMSUG) in accordance with [BSCP520 'Unmetered Supplies'](#), and also go out for Market Participant impact assessment before being presented to the SVG. We include all comments received from the impact assessment in this paper to assist the decision making of the SVG.

Fast Track Change Request process

- 1.3 BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, which require Elexon validation and SVAA impact assessment. However, BSCP509 does not require Fast Track changes to be issued for Market Participant impact assessment or to be approved by the SVG. This means there is a separate deadline which is later than that for General Change Requests. Therefore, Fast Track Change Requests are presented to the SVG for information only.
- 1.4 New Party Agents and existing Licensed Distribution System Operators (LDSOs) registering in a GSP Group must have their Qualification approved by the Performance Assurance Board (PAB) before registering in MDD. However, they can submit Fast Track Change Requests before the PAB meeting for the next MDD Version to go live after the PAB has made its decision. Should the PAB not approve the Qualification application, Elexon will refuse the MDD Change Request. New Suppliers and new LDSOs do not require PAB approval of their Qualification before registering in MDD, and new Suppliers need not have obtained their Supply Licence.

2. BAU Changes for MDD Version 326

- 2.1 This paper includes five General MDD changes and 14 Fast Track MDD changes to be incorporated into MDD Version 326 with a go-live date of 17 August 2022.

3. Technical Product Deliverables (TPDs)

- 3.1 The Profile Expert Group (PEG) reports to the Supplier Volume Allocation Group (SVG) on matters related to profiling, Supplier Volume Allocation (SVA) and certain Settlement parameters as specified within BSCP09: Changes to Market Domain Data. The PEG periodically reviews the Settlement profiles TPDs which Elexon receives from the Profile Administrator (PrA) on a bi-annual basis, before recommending to the SVG whether new TPDs should be approved and used in Settlement.
- 3.2 The review process for the TPDs has been the same as previous years, whereby Elexon checks for formats and completeness and conducts an initial qualitative review. The PEG undertakes a further qualitative review before making a recommendation to the SVG.
- 3.3 ELEXON and the Profiling Expert Group (PEG) have reviewed the profiles to be used in Settlement for the Autumn/Winter 2022/23 BSC Seasons. The new TPDs have passed all tests on content and format, and Appendix 2 provides the complete checklist used.
- 3.4 The new TPDs are made up of:
 - Regression data for the Autumn and Winter BSC Seasons, based on a pooled set of the latest three years' data (2019/20, 2020/21 and 2021/22); and
 - Recalculated Group Average Annual Consumption (GAAC) data for use in the Autumn and Winter Seasons of the current BSC Year.
- 3.5 Note Spring, Summer and High Summer profiling data has not been updated in this set of TPDs, as normal.
- 3.6 At its meeting on 12 July 2022, the PEG agreed that these TPDs should be used for the next set of profiles. As such, PEG members unanimously recommend that the SVG approves these TPDs for use in Settlement for Autumn/Winter 2022/23.

4. Recommendations

- 4.1 We invite you to:
