Date of meeting **07/11/2023**

Paper number **273/01**

Owner/author **Matt Cogram**

Purpose of paper **Decision**

Classification **Public**

Document version **V1.0**

Summary This paper invites the SVG to approve 10 General Change Requests and note 14 Fast Track Change Requests, for implementation in Version 341 of Market Domain Data (MDD) with a go-live date of 22 November 2023. The paper also includes an update on a recent issue with Technical Product Deliverables.

1. Introduction

- 1.1 The Market Domain Data process as documented in [BSC Procedure \(BSCP\) 509 'Changes to Market Domain Data'](#) has been followed.

General Change Request process

- 1.2 BSCP509 requires that General MDD Change Requests undergo validation by Elexon, and impact assessment by the Supplier Volume Allocation Agent (SVAA) and Market Participants, before being presented to the SVG for decision.

Fast Track Change Request process

- 1.3 BSCP509 contains the Fast Track process for housekeeping changes and new participant registrations, which require Elexon validation and SVAA impact assessment.

2. BAU Changes for MDD Version 341

- 2.1 This paper includes 10 General MDD changes and 14 Fast Track MDD changes to be incorporated into MDD Version 341 with a go-live date of 22 November 2023.

3. Technical Product Deliverables (TPDs)

- 3.1 At the SVG meeting in August 2023 (SVG270), the SVG approved new TPDs to be used for Autumn/Winter 2023/24 Settlement from September 2023.
- 3.2 Once the new TPDs were implemented, Elexon became aware that incorrect Sunset Time variables were being used. These were corrected in live, but three incorrect Sunset Time variables had been used to create the TPDs for Autumn/Winter 2023/24.
- 3.3 To correct this, the TPDs have been recalculated using the correct Sunset Time variables. This has changed some of the profile co-efficients for the Winter 2023/24 season, but from our analysis the issue with incorrect sunset times only impacts dates between late January 2024 and late March 2024.
- 3.4 The revised TPDs have been checked and compared to the previous set, and the findings shared with SMEs at Elexon. Following discussions, the SMEs agree that the new profiles are more reflective of expected NHH usage patterns for January to March 2024.
- 3.5 Further checks have been added to the review process to ensure correct Sunset Time variable will be used in any future profiling runs.
- 3.6 As such, Elexon recommends that the SVG approves these revised TPDs for use in Settlement for Autumn/Winter 2023/24 from the go-live date of 22 November 2023.

4. Recommendations

- 4.1 We invite you to:
