

## UMSUG paper – MRA Change to DTC

### 1. Purpose

This document is highlighting a change being proposed to the MRA to amend the DTC.

The purpose of the MRA changes is stated as:

To formalise the inclusion of the unmetered data exchanges as a sender and/or recipient of relevant existing DTC flows. This would reflect the accepted understanding of the use of the D0139, D0155, D0148, et al of the UMSO & Meter Administrator as a sender/recipient as already described in BSCP520

This paper is seeking to make the UMSUG aware of the proposal.

At the time of drafting the proposal requires a Sponsor, so if an MRA Party or ELEXON wishes to sponsor the proposal it would be appreciated.

### 2. Recommendation

The UMSUG is invited to:

- **Note** to the consideration of an MRA change to the DTC and highlight any improvements.

**Tom Chevalier**
