Notes: Required First Scheduled Read Date is an optional field to be used where there is a service level agreement between a Supplier and an Agent which allows the Supplier to specify the Scheduled Read Date.

This flow includes Unmetered Supply Requirements.

Though all of the address data items included in this flow are defined within the structure as being optional, the address itself is mandatory and must be included in the flow. The use of any individual address item cannot be made mandatory as, in the absence of an agreed address structure for all flows, an address may be constructed from any combination of the Address Line and Postcode items. Postcode should only be omitted if the Post Office has not generated one for the premises.

The Supplier may use the Smart CoS Process Indicator to request that the NHHDC or NHH MOP should use the Change of Supplier process for smart meters (as introduced by BSC Modification P302). The Smart CoS Process group is optional to allow Suppliers to make alternative bi-lateral arrangements for requesting their agents to use the smart process. For the avoidance of doubt, unless other arrangements have been agreed between a Supplier and their agents, legacy processes will be followed if the Smart CoS Process group is not populated.
