UMS Queries Log

Unmetered Supplies User Group

Date of meeting	**16 March 2022**	Paper number	**135/02**
Owner/author	**Nazifa Begum**	Purpose of paper	**Information**
Classification	**Public**	Document version	**V1.0**

Summary **This paper provides details of contentious Unmetered Supplies (UMS) topics that have been addressed by the Unmetered Supplies User Group (UMSUG).**

1. Background

1.1 At the June 2021 UMSUG Meeting (UMSUG132), the UMSUG agreed that Elexon should maintain a log of queries raised by Elexon or UMSUG members around controversial Charge Code applications or related UMS issues. The aim of the UMS queries log is to understand the details of any contentious applications or topics, the UMSUG's responses and the outcome from Elexon. This can then be used as a knowledge base for both Elexon and the UMSUG for future queries of a similar nature.

2. UMS Queries Log

2.1 The latest version of the UMS queries log can be found in attachment A.

2.2 If during the UMSUG meeting it is identified that changes are required to the UMS queries log, those changes will be made as part of the next version update.

3. Recommendations

3.1 We invite the UMSUG to:

a) **APPROVE** the latest updates to the UMSUG Queries Log.
