Does this response contain confidential information? If yes, please specify.	No

No	Question	Response
1	Do you agree with the approach taken in the proposal? Please provide rationale.	Yes. We agree with the proposal that the terms and conditions for BSPs and BRPs should remain in industry codes (as currently), rather than being moved into separate documents. This approach minimises unnecessary change, and will ensure that parties can continue to benefit from the current robust and transparent processes for assessing and agreeing Modifications to industry codes.
2	Do you have any comments on the proposal letter?	No.
3	Annex 1: Do you have any comments on the mapping?	No. The mapping of EBGL articles to BSC Sections is now consistent with the comments we made in our previous consultation response , and we have no further comments to raise.
4	Do you have any other comments in relation to the proposal?	No.
