## Possible delay in updating Generation Forecasts data on BMRS

### What is happening?

National Grid ESO have informed us that there might be a delay in updating the [2-14 Day Output Useable data](#) on the Balancing Mechanism Reporting Service (BMRS) today.

### How will I be impacted?

Until the data updated, BMRS will not be publishing the latest Generation forecasts data. NGESO are working to update the data today as expected.

### Is there anything else I need to know?
