National Grid ESO Outage impacting data sent to BMRS

What is happening?

National Grid ESO (NGESO) is experiencing an outage affecting several systems which send data to the Balancing Mechanism Reporting Service (BMRS), including, Demand Forecasts, non-BM STOR, Balancing Services Adjustment Data (BSAD), European Transparency Regulation (ETR) and REMIT data.

NGESO is investigating the issue, which also impacts TOGA and PAS systems.

How will I be impacted?

The BMRS continues to publish the data as received and it is used in the calculation of indicative System Prices. While this issue is ongoing the indicative System Prices published on BMRS may not be accurate.

The outage is also impacting the ETR and REMIT data which NGESO sends to the BMRS and the impacted data are not published on the BMRS website, APIs, Data Push Service and TIBCO.

Market Participants that submit REMIT data via the ELEXON Portal are not affected by this outage.

Do I need to take any further action?

No, for more information on this Circular, please contact [BSC Service Desk](#).
