

Illuminated Refuge Beacon Conversion Unit

We are proud to introduce our latest product to compliment our existing LED lighting range.

The Illuminated Refuge Beacon Conversion Unit has been designed to retro-fit to existing 76mm diameter Refuge Columns. The advantage over existing Refuge Beacons is greater illumination making the refuge more apparent to road users.

Simple to install - simply cut 1.25m off of the existing column, drop the cables down and slide over the new Illuminated Refuge Beacon Conversion Unit and secure with the locking screws.

The unit is constructed from a strong aluminium extrusion with polycarbonate lenses.

The column is internally illuminated with 4 sets of LED's with total power consumption of approx. 14 watts. (2 White Bands) and comes with an IP67 LED Driver.

The Pearl polyethylene globe is fixed to the Aluminium Anti-Vandal Gallery with 3no. M8 stainless steel security screws

The globe houses our latest 12 watt LED Refuge Beacon (LED3-RF)

Unit part number is : RBCU-26

Specifications

- 26 watts power consumption
- Carbon emissions per unit = 0.123 metric tonnes per annum
- 300mm Pearl Polyethylene Globe
- 1.25m high as standard with 76mm socket
- Tough polyester powder coat finish in Traffic Grey gloss
- 2 x Reflective/translucent white vinyl bands
- UMSUG Code pending
