

# LED 6x150

We are proud to introduce our latest LED Belisha Beacon for 2015, the LED 6x150.

This latest innovation allows for a 76mm diameter column to pass through the centre of the Aluminium Anti-Vandal Gallery and can be clamped at any position on the column. Mounted to the gallery core are the most upto date LED's with 6 x 2 watt very bright white LED strips. The LED Strips are connected via low voltage DC cable to PCB flasher control unit and Driver in the base of the column. The beacon is then covered by an Amber Polyethylene Globe seated on an 'O' Ring seal and secured in place by 3 stainless steel Security Hex-Pin Screws

- Consuming only 8 watts per hour of power.
- A massive 1400 lumens
- 220v/240v AC supply
- Typical running cost based on Electricity charge of £0.085 per kwh is £6.00 pa
- Carbon per unit = 0.038 metric tonnes pa
- Available pre-wired with 4.0m of 2 core flex
- UMSUG code Pending
- A Through Courtesy Shield is available if required please quote part number : TCSGS1
