

ROADflow Flexi

The **ROADflow Flexi** is a VCA certified re-deployable ANPR system ideal for enforcing restricted routes such as bus lanes and bus gates. The **Flexi** system is designed to allow rapid re-deployment in hotspot areas with minimal effort and disruption to operations. The system generates Evidence Packs upon detecting a contravention and sends them to the back office processing system using wireless technologies. Without the need for CCTV operators the system can enforce 24/7 at each site ensuring increased compliance with significantly less effort and cost.

ROADflow Flexi offers the following key features:

- No roadside cabinet required – lamp post, CCTV column or building mounted
- A single mains supply is the only site requirement
- Lightweight – Just over 9.6 kgs in total for unit, bracket and ANPR camera
- Easily re-deployable once a site achieves its compliance target
- A choice of 3G, 4G, WiFi or fixed data communications
- Integrates with all major Back Office notice processing systems and the **ROADflow Replay** review suite

Hardware Specification

Processor	Dual core Pentium M 1.8Ghz
Memory	1 GB (Expandable)
Ports	4 x USB 2.0, 4 x RS232, 2 x Ethernet, 4 x video input
Hard drive	1TB HDD
Camera	4 video channel inputs (Infrared and Colour)
3G	Internal with externally mounted aerial
WiFi	Optional WiFi module
GPS	Using external aerial
IP rating	IP66
Power	230V 50 Hz AC Mains Supply
Temperature	-10C to +55C, storage -20C to +70C
Size	260mm (w) x 330mm (L) x 50mm(H)
Weight	7.1kg (processing unit)
Approvals	E' & CE, AES, NAAS
