Purpose	For information

Planned BSC Agent downtime on BMRS: 15–16 June 2016

What is happening?

There will be planned downtime on the REMIT and Transparency pages of the Balancing Mechanism Reporting Service (BMRS) between **17:00 (BST) Wednesday 15 June** and **01:00 (BST) Thursday 16 June 2016**.

How will I be impacted?

If you send REMIT or Transparency data to BMRS during this downtime you may experience a delay before your message is published. For REMIT data, the timestamp may not accurately reflect when you submitted the data. Further, the Transparency data will not be published on the EMFIP platform until the downtime is completed; timestamp on EMFIP acknowledgements will reflect this.

However, you can continue to submit REMIT data via the ELEXON Portal during this planned downtime; it will be accepted and queued until the downtime is completed and later published in sequence.

You may also experience a delay in receiving data through the Data Push Service and the Restful API; any missing data will be available to the users as soon as the downtime is completed.

Do I need to take any further action?

No, however if you have any questions please contact bscservicedesk@cgi.com.
