### About This Document

The purpose of this Change Proposal (CP) 1467 CP Consultation is to invite BSC Parties, Party Agents and other interested parties to provide their views on the impacts and the merits of CP1467. The Trading Disputes Committee (TDC) will then consider the consultation responses before making a decision on whether or not to approve CP1467.

There are three parts to this document:

- This is the main document. It provides details of the solution, impacts, costs, and proposed implementation approach.
- Attachments A contains the CP1467 Proposal Form.
- Attachment B contains the proposed redlining changes to deliver the CP1467 solution.
- Attachment C contains the specific questions on which we seek your views. Please use this form to provide your response to these questions, and to record any further views or comments you wish to be considered.

# 1 Why Change?

## Background and Related Change CP1459

Consultation responses to [CP1459 'Amendments to the process for performing a Post-Final Settlement Run'](#) suggested benefits that may be realised from including site Identification (ID) data in the Balancing and Settlement Code Procedure (BSCP) 11 'Trading Disputes' 07 (TDC Trading Disputes Findings) form.

ELEXON raised CP1467 on 14 June 2016 as a result of the CP1459 Consultation responses

## What is a Trading Dispute?

A Trading Dispute is any query, difference or dispute of whatsoever nature and howsoever arising under The Code as to:

(i) the existence, nature or effect of errors in:

(1) the data and/or processes used for the purposes of Settlement; or

(2) the application of the rules for Settlement (whether generally or in relation to a particular Party or Class of Parties), to the extent such errors affect or may affect the allocation and/or determination of Trading Charges or the determination and Settlement of amounts payable pursuant to Section N (Clearing, Invoicing and Payment) by reference to Trading Charges;

(ii) the existence, nature or effect of errors in the data and/or processes used for the purposes of, or in the application (whether generally or in relation to a particular Party or Class of Parties) of the rules as to whether and when a Trading Party is in Credit Default under, Section M (Credit Cover and Credit Default); has the meaning given to that term in Section W (Trading Disputes) 1.3.1;

## What is the issue?

The current BSCP for Trading Disputes (BSCP11) does not include the Trading Dispute site ID data. Therefore, the Registrant communication to its Agents containing instructions for rectification of the Trading Dispute may not contain all relevant information required. As a consequence, the Trading Dispute rectification process may be delayed where the Party Agents are required to request the site ID data from the Supplier after receiving the BSCP11/07 form.

## 2 Solution

### Proposed solution

The Proposer suggests that the BSCP11/07 form be amended to include a section on the site ID data related to the Trading Dispute. This site ID data may relate to the Metering System Identifier (MSID), Balancing Mechanism Unit (BM Unit), Energy Contract Volume Notification (ECVN) or Metered Volume Reallocation Notification (MVRN) Authorisation Id or other ID.

### Proposer's rationale

The Proposer believes that this change would ensure the completeness and efficiency of performing a Post-Final Settlement Run. Further, the change was suggested by industry as a result of the CP1459 Consultation responses.

#### CP Consultation Question

Do you agree with the CP1467 proposed solution?

*Please provide your rationale.*

We invite you to give your views using the response form in Attachment C

### Proposed redlining

Attachment B contains the proposed changes to BSCP11 to deliver CP1467.

It is proposed that the Site ID data be added as a free text field in the BSCP11/7 form.

#### CP Consultation Question

Do you agree that the draft redlining delivers the CP1467 proposed solution?

*If 'No', please provide your rationale.*

We invite you to give your views using the response form in Attachment C

### 3 Impacts and Costs

#### Central impacts and costs

There are no central impacts or corresponding costs anticipated as a result of the proposed CP1467 solution.

#### BSC Party & Party Agent impacts and costs

##### Participant impacts

Half Hourly Data Aggregators (HHDA) and Non-Half Hourly Data Aggregators (NHHDA) will be impacted as they will be in receipt of more data to process in the BSCP11/07 form. However, it is unlikely that they will incur any increased costs as this information is regularly requested from the Supplier as a result of receiving the BSCP11/07 form under the current process.

BSC Party & Party Agent Impacts	
BSC Party/Party Agent	Impact
HHDA	Data processing
NHHDA	Data processing

#### CP Consultation Questions

Will CP1467 impact your organisation?

*If 'Yes', please provide a description of the impact(s) on your organisation and any activities which you will need to undertake between the approval of CP1467 and the CP1467 Implementation Date (including any necessary changes to your systems, documents and processes). Where applicable, please state which of the roles that you operate as will be impacted and any differences in the impacts between each role.*

Will your organisation incur any costs in implementing CP1467?

*If 'Yes', please provide details of these costs, how they arise and whether they are one-off or on-going costs.*

We invite you to give your views using the response form in Attachment C

## 4 Implementation Approach

### Recommended Implementation Date

The Proposer suggests that CP1467 be included in the November 2016 BSC Release as it would be most efficient to implement at the same time as CP1459, from which this CP originated.

#### CP Consultation Question

Do you agree with the proposed implementation approach for CP1467?

*Please provide your rationale.*

We invite you to give your views using the response form in Attachment C

## 5 Initial Committee Views

### **TDC's initial views**

The TDC did not have any initial views on CP1467.

## Appendix 1: Glossary & References

### Acronyms

Acronyms used in this document are listed in the table below.

Acronyms	
Acronym	Definition
BM Unit	Balancing Mechanism Unit
BSCP	Balancing and Settlement Code Procedure
ECVN	Energy Contract Volume Notification
HHDA	Half Hourly Data Aggregator
MSID	Metering System Identifier
MVRN	Metered Volume Reallocation Notification
NHHDA	Non-Half Hourly Data Aggregator
TDC	Trading Disputes Committee
