

HEADLINE REPORT

MEETING NAME	Unmetered Supplies User Group
Meeting number	119
Date of meeting	7 February 2017
Purpose of paper	Information
Classification	Public
Synopsis	This report sets out the headlines of the most recent UMSUG meeting.

OPEN SESSION PAPERS

1. Measured Central Management System (mCMS) Test Specification – UMSUG119/01

ELEXON invited the UMSUG to provide comments on the draft specification before it is finalised for use.

The UMSUG:

- a) **PROVIDED** comments on the draft mCMS Test Specification; and
- b) **NOTED** that ELEXON will seek the SVG's approval in principle to using the mCMS approach.

2. Update on Burn Hours review – UMSUG119/02

ELEXON updated the UMSUG on the progress of the Burn Hours review.

The UMSUG:

- a) **NOTED** the update on the Burn Hours review; and
- b) **NOTED** that ELEXON will present the updated Burn Hours at the next UMSUG meeting.

3. Proposed approach to testing for extra low voltage equipment – UMSUG119/03

ELEXON invited the UMSUG to recommend that the Supplier Volume Allocation Group (SVG) approves these changes to the Operational Information Document (OID), to take effect in parallel with Version 252 of Market Domain Data (MDD).

The UMSUG:

- a) **REVIEWED** the updated OID redlining;
- b) **AGREED** a finalised version of the redlining to be implemented as version 17.0 of the OID; and
- c) **RECOMMENDED** to the SVG that it approves the updated OID to be effective from 15 March 2017, which is the next MDD version go-live date to follow the 28 February 2017 SVG meeting.
