4.3   CP Form

Change Proposal – BSCP40/02	**CP No:**CP1480
	Version No: 1.0 *(mandatory by BSCCo)*

Title (mandatory by originator)

Creation of a new authorisation category for corrections to BOA related data.

Description of Problem/Issue (mandatory by originator)

The BSCP18 'Corrections to Bid-Offer Acceptance Related Data' is ambiguous on who may authorise corrections to Bid-Offer Acceptance (BOA) data. This lack of clarity is creating problems for National Grid Electricity Transmission (NGET) when trying to identify the right individual to contact and can cause delays. These delays could mean that corrections to data are not made by the Settlement Final (SF) Run causing incorrect data to enter Settlement that could lead to a Trading Dispute.

Proposed Solution (mandatory by originator)

BSCP38 'Authorisations' should be amended to add a new authorisation category, "E", for the activity of authorising BOA related data corrections. BSCP18 should be amended to make reference to this category. The list of all "E" Authorised Persons (including trading party, authorised person, email and telephone contacts) will acknowledge and agree in the relevant BSCP (or otherwise in writing) that their information will be shared with the Transmission Company specifically for this purpose. The Transmission Company will acknowledge and agree in the relevant BSCP (or otherwise in writing) that it shall not share this information with any other party.

Justification for Change (mandatory by originator)

Delays in obtaining authorisation could mean that data corrections that are not made before the SF run cause incorrect data to enter Settlement affecting imbalance prices. BSCP18 requires an "authorised person" from the Trading Party to agree the change, although it does not specifically say which authorisation is required.

To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? (mandatory by originator)

 Section Q and U

Estimated Implementation Costs (mandatory by BSCCo)

The estimated implementation cost for CP1480 is £8,000. This will be incurred as a result of changes to the Central Registration Agent systems and the necessary document updates.

Configurable Items Affected by Proposed Solution(s) (mandatory by originator)

BSCP18
BSCP38

Impact on Core Industry Documents or System Operator-Transmission Owner Code (mandatory by originator)
N/A

Related Changes and/or Projects (mandatory by BSCCo)
None

Requested Implementation Date (mandatory by originator)
29 June 2017 (June 2017 Release)

Reason:
Next available release date.

Version History (mandatory by BSCCo)
NGET raised version 1.0 of this CP on 28 November 2016.
